The Oxford Handbook of Urban Economics and Planning Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics

LeDoux,Bobby Bingle,Daniel M. Haybron,Batja Mesquita,Michele Moody-Adams,Songyao Ren,Anna Sun,Yolonda Y. Wilson,2023-05-09 The happiness agenda is a worldwide movement that claims that happiness is the highest good happiness can be measured and public policy should promote happiness Against Happiness is a thorough and powerful critique of this program revealing the flaws of its concept of

happiness and advocating a renewed focus on equality and justice Written by an interdisciplinary team of authors this book provides both theoretical and empirical analysis of the limitations of the happiness agenda The authors emphasize that this movement draws on a parochial Western centric philosophical basis and demographic sample They show that happiness defined as subjective satisfaction or a surplus of positive emotions bears little resemblance to the richer and more nuanced concepts of the good life found in many world traditions Cross cultural philosophy comparative theology and social and cultural psychology all teach that cultures and subcultures vary in how much value they place on life satisfaction or feeling happy Furthermore the ideas promoted by the happiness agenda can compete with rights justice sustainability and equality and even conceal racial and gender injustice Against Happiness argues that a better way forward requires integration of cross cultural philosophical ethical and political thought with critical social science Ultimately the authors contend happiness should be a secondary goal worth pursuing only if it is contingent on the demands of justice *Drug Use in America:*
