Between Darkness And Light The Universe Cycle 1:

Dark Nebulae, Dark Lanes, and Dust Belts Antony Cooke, 2012-01-28 There are voids obscuring all kinds of objects in the cosmos Voids may be within an object or between an object and us Dark Nebulae Dark Lanes and Dust Lanes looks out into the deep sky at those apparent dark regions in space which are among the most compelling telescopic destinations for amateur observers One famous example is Barnard's dark nebulae those striking dark clouds set against the background of stars in the Milky Way But there are countless other less well known examples These dark regions are often ignored altogether or commented upon only briefly in astronomy books and it is all too easy to overlook the treasure trove they offer the observer Dark Nebulae Dark Lanes and Dust Lanes is a great source of practical information for observers Such voids may be successfully observed using conventional observing methods but they are often far better seen with technologies such as light pollution filters CCD video cameras and image intensifiers This book explains the optimal ways to observe each object in detail

Rediscovering Genesis Gerald Ostroot, 2009-11 Rediscovering Genesis is an exciting new look at the evolution creation controversy Its author is neither scientist nor theologian so he can present an objective point of view The premise of the book is that both religion and science describe the same Universe and must be compatible It accomplishes that goal by exposing the hidden assumptions and self imposed restriction of both disciplines and challenging them It documents the changes needed from both disciplines The book presents a well researched effort to root out the causes of the evolution creation controversy and to discover a solution that includes both disciplines While the book is aimed at a Christian audience it has much to offer to the less committed individuals as well It will be of special interest to those who have been or are currently being exposed to the Theory of Evolution in our educational systems It will be invaluable to the parents of those students It will serve as a guide to educators It will be of interest to all that are aware of the present controversy The book is divided into two parts The first part looks at the biblical creation account in the first 4 chapters of Genesis By incorporating our modern knowledge into this account it becomes compatible with both the scientific account of our beginning and the literal seven days of creation described in the Bible That is a necessary first step in resolving the controversy between science and religion Part 1 goes on to bring a new deeper understanding of our relationship with our Creator Part two brings us face to face with two major roadblocks to accepting a world view that includes a Creator 1 the problem of suffering in our world and 2 the evolution creation controversy The first roadblock the problem of suffering occurs only in the teaching of Christianity It occurs because we misunderstand the relationship of the Creator with His creation Understanding this special relationship starts in Genesis Misunderstanding and misinformation have marked the second the evolution creation controversy from the very beginning This book explains the facts that are important for general understanding It goes on to closely examine the scientific definition of life and shows where it leads This is also a necessary step in resolving the evolution science controversy Throughout the book the overriding theme is authority and its important

function in our lives It is the common ground where both science and religion can merge Find out how it can change your world view and your life

The Story of the Waters Richard Lucas,2013-09-11 In the Story of the Waters I will demonstrate where the teachings of the Bible and the teachings of science almost seem to merge Faith truly is the substance of things not seen Science tries to tell the story of the beginning of the universe and how everything came to be Well the Bible tells that story too but when it comes to looking back to that very first moment when there was no singularity the Bible completes that story One of the first arguments on this subject is usually how could God have made all of this in just 7 days when the universe is billions of years old I believe this is clearly and simply explained Because science leaves God out of their equations they often get stuck and a new theory is needed These most often come from the imaginations of some of the most brilliant minds in physics Two of the big things that they have been trying to answer are Why is the universe expanding at an accelerating rate and is it caused by dark matter and what is it What is the force that unifies all of the forces of science or the unified field theory You will find that the Story of the Waters is an inspired writing that answers all of these questions and much more

The Age of Everything Matthew Hedman,2008-08-13 Taking advantage of recent advances throughout the sciences Matthew Hedman brings the distant past closer to us than it has ever been Here he shows how scientists have determined the age of everything from the colonization of the New World over 13 000 years ago to the origin of the universe nearly fourteen billion years ago Hedman details for example how interdisciplinary studies of the Great Pyramids of Egypt can determine exactly when and how these incredible structures were built He shows how the remains of humble trees can illuminate how the surface of the sun has changed over the past ten millennia And he also explores how the origins of the earth solar system and universe are being discerned with help from rocks that fall from the sky the light from distant stars and even the static seen on television sets Covering a wide range of time scales from the Big Bang to human history The Age of Everything is a provocative and far ranging look at how science has determined the age of everything from modern mammals to the oldest stars and will be indispensable for all armchair time travelers We are used to being told confidently of an enormous measurable past that some collection of dusty bones is tens of thousands of years old or that astronomical bodies have an age of some billions But how exactly do scientists come to know these things That is the subject of this quite fascinating book As told by Hedman an astronomer each story is a marvel of compressed exegesis that takes into account some of the most modern and intriguing hypotheses Steven Poole Guardian Hedman is worth reading because he is careful to present both the power and peril of trying to extract precise chronological data These are all very active areas of study and as you read Hedman you begin to see how researchers have to be both very careful and incredibly audacious and how much of our understanding of ourselves through history through paleontology through astronomy depends on determining the age of everything Anthony Doerr Boston Globe
