Between East And West Across The Borderlands Of Europe:

Between East and West Anne Applebaum, 1994 journey into the past and present of the lands east of Poland and west of Russia The Americanization of Europe Alexander Stephan, 2006 Using Germany as a case study of the impact of American culture throughout a period characterized by a totalitarian system two destructive wars ethnic cleansing and economic disaster this book explores the political and cultural parameters of Americanization and anti Americanism

Intermarium Marek Jan Chodakiewicz, 2017-09-08 History and collective memories influence a nation its culture and institutions hence its domestic politics and foreign policy That is the case in the Intermarium the land between the Baltic and Black Seas in Eastern Europe The area is the last unabashed rampart of Western Civilization in the East and a point of convergence of disparate cultures Marek Jan Chodakiewicz focuses on the Intermarium for several reasons Most importantly because as the inheritor of the freedom and rights stemming from the legacy of the Polish Lithuanian Ruthenian Commonwealth it is culturally and ideologically compatible with American national interests It is also a gateway to both East and West Since the Intermarium is the most stable part of the post Soviet area Chodakiewicz argues that the United States should focus on solidifying its influence there The ongoing political and economic success of the Intermarium states under American sponsorship undermines the totalitarian enemies of freedom all over the world As such the area can act as a springboard to addressing the rest of the successor states including those in the Caucasus Central Asia and the Russian Federation Intermarium has operated successfully for several centuries It is the most inclusive political concept within the framework of the Commonwealth By reintroducing the concept of the Intermarium into intellectual discourse the author highlights the autonomous and independent nature of the area This is a brilliant and innovative addition to European Studies and World Culture **Beyond Boundaries** ,2016-08-29 Despite the recent growth in university courses on European

Studies and Cultural Studies and notwithstanding increasing public concern about questions of national identity within Europe there is currently little material available which explores the diversity of European identities specifically within the context of European literary and filmic culture In tackling ten novels six plays four films three short stories three books of travel writing and one diary covering fifteen nationalities in all the authors of this volume are seeking to fill this gap The twelve essays contain detailed textual analysis embedded within a framework of cultural theory whose most celebrated reference points include Freud Edward Said Benedict Anderson and Homi Bhabha This volume is aimed not only at specialists in identity studies and those concerned with the artistic landscape of a wider Europe including Russia the Balkans Finland and Turkey It will also interest those preoccupied with building an imaginative and imagined identity for Europe an identity which might help to sustain it as a political entity and lend it greater popular legitimacy than it enjoys at present

European Integration Since the 1920s Mark Hewitson, 2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re examines why

the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of citizens As a consequence supranational bodies such as the European Commission have been accompanied and often overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in important respects as a type of confederation The volume addresses a series of large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique experiment of the European Union

Radano, Philip V. Bohlman, 2000-12 A specter lurks in the house of music and it goes by the name of race write Ronald Radano and Philip Bohlman in their introduction Yet the intimate relationship between race and music has rarely been examined by contemporary scholars most of whom have abandoned it for the more enlightened notions of ethnicity and culture Here a distinguished group of contributors confront the issue head on Representing an unusually broad range of academic disciplines and geographic regions they critically examine how the imagination of race has influenced musical production reception and scholarly analysis even as they reject the objectivity of the concept itself Each essay follows the lead of the substantial introduction which reviews the history of race in European and American non Western and global musics placing it within the contexts of the colonial experience and the more recent formation of world music Offering a bold new revisionist agenda for musicology in a postmodern postcolonial world this book will appeal to students of culture and race across the humanities and social sciences **Over the Wall/after the Fall** Sibelan Elizabeth S. divided attitudes toward new European approaches to sustainable development An entrenched set of forestry and land management practices with roots in the Soviet and pre Soviet eras confront growing international pressures on a small country to conform to current Western notions of environmental responsibility notions often perceived by Latvians to be at odds with local interests While the case is that of Latvia the dynamics Schwartz explores have wide applicability and speak powerfully to broader theoretical discussions about sustainable development social constructions of nature the sources of nationalism and the impacts of globalization and regional integration on the traditional nation state Photographic Memories Rob Kroes,2007 The role of photographs in the formation of public memories *The Baltic States* Thomas Lane,Artis Pabriks,Aldis Purs,David J. Lessons of History Klas-Göran Karlsson, 2024-06-11 Lessons of history are often referred to in public discourse but seldom in scholarly discussions This book seeks to change this by introducing an innovative analytical model of historical lessons starting from the basic three fold perspective that everyone simultaneously is history shares history and makes history Not all history however is useful for extracting lessons Here what are called borderline historical events which demonstrate both time specific and time transcending qualities are suggested as useful didactic material Scholarly works on the Holocaust and Soviet terror from Raul Hilberg's and Robert Conquest's classical works of the 1960s to more recent books by Jan Gross and Timothy Snyder are analyzed to identify lessons of history and how they have changed during a full half century

Geopolitics at the End of the Twentieth Century Nurit Kliot, David Newman, 2013-11-05 An excellent examination of how the collapse of the Soviet Union and the impact of globalization have brought about changes not only to the territorial configuration sovereignty of states and their boundaries but also to traditional notions of state boundaries sovereignty and social order These essays focus on the key regional and geopolitical characteristics of this global reordering with an emphasis on Eastern Europe and South Asia They discuss the territorial reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno territorial demands as borders are transversed by the movement of peoples information and finance and as the lines of territorial demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and ethnic identities continue to be formed and reformed Each section ends with articles which focus on literature on geopolitics and boundaries This is an invaluable addition to our understanding of contemporary world affairs
