Entman, Andrew Rojecki, 2024-05-31 Living in a segregated society white Americans learn about African Americans not through personal relationships but through the images the media show them The Black Image in the White Mind offers the most comprehensive look at the intricate racial patterns in the mass media and how they shape the ambivalent attitudes of Whites toward Blacks Using the media and especially television as barometers of race relations Robert Entman and Andrew Rojecki explore but then go beyond the treatment of African Americans on network and local news to incisively uncover the messages sent about race by the entertainment industry from prime time dramas and sitcoms to commercials and Hollywood movies While the authors find very little in the media that intentionally promotes racism they find even less that advances racial harmony They reveal instead a subtle pattern of images that while making room for Blacks implies a racial hierarchy with Whites on top and promotes a sense of difference and conflict Commercials for example feature plenty of Black characters But unlike Whites they rarely speak to or touch one another In prime time the few Blacks who escape sitcom buffoonery rarely enjoy informal friendly contact with White colleagues perhaps reinforcing social distance in real life Entman and Rojecki interweave such astute observations with candid interviews of White Americans that make clear how these images of racial difference insinuate themselves into Whites thinking Despite its disturbing readings of television and film the book s cogent analyses and proposed policy guidelines offer hope that America's powerful mediated racial separation can be successfully bridged Entman and Rojecki look at how television news focuses on black poverty and crime out of proportion to the material reality of black lives how black experts are only interviewed for black themed issues and how black politics are distorted in the news and conclude that while there are more images of African Americans on television now than there were years ago these images often don't reflect a commitment to racial comity or community building between the races Thoroughly researched and convincingly argued Publishers Weekly Drawing on their own research and that of a wide array of other scholars Entman and Rojecki present a great deal of provocative data showing a general tendency to devalue blacks or force them into stock categories Ben Yagoda New Leader Winner of the Frank Luther Mott Award for best book in Mass Communication and the Robert E Lane Award for best book in political psychology The Gendered West Gordon Morris Bakken, Brenda Farrington, 2013-09-13 First Published in 2001 This anthology of western history articles emphasizes the New Western History that emerged in the 1980s and adds to it a heavy dose of legal history a field frequently ignored or misunderstood by the New Western historians From first contact American Indians knew that Europeans did not understand the gendered nature of America Confusion regarding the role of women within tribes and bands continued from first contact well into the late nineteenth century The journal articles that follow give readers a true sense of the gendered West Racial and ethnic heritage played a role in female

experience whether Hispanic Japanese or Irish Women s work was part western history but women did not confine themselves to plow handles or brothels Women were very much a part of most occupations or in the process of breaking down barriers of access They worked in the fields for wages as well as for family welfare and prosperity Women demanded access to the professions whether teaching or law accounting or medicine The process of eliminating barriers varied in time and space but the struggle was constant Yet the story of women in polygamous Utah or Idaho was different and an integral part of the fabric of western history Because of their beliefs and practices these women suffered at the hands of the federal government and persevered Mexican American Women Activists Mary Pardo, 1998-06-19 When we see children playing in a supervised playground or hear about a school being renovated we seldom wonder about who mobilized the community resources to rebuild the school or staff the park Mexican American Women Activists tells the stories of Mexican American women from two Los Angeles neighborhoods and how they transformed the everyday problems they confronted into political concerns By placing these women s experiences at the center of her discussion of grassroots political activism Mary Pardo illuminates the gender race and class character of community networking She shows how citizens help to shape their local environment by creating resources for churches schools and community services and generates new questions and answers about collective action and the transformation of social networks into political networks By focusing on women in two contiguous but very different communities the working class inner city neighborhood of Boyle Heights in Eastside Los Angeles and the racially mixed middle class suburb of Monterey Park Pardo is able to bring class as ell as gender and ethnic concerns to bear on her analysis in ways that shed light on the complexity of mobilizing for urban change Unlike many studies the stories told here focus on women s strengths rather than on their problems We follow the process by which these women empowered themselves by using their own definitions of social justice and their own convictions about the importance of traditional roles Rather than becoming political participants in spite of their family responsibilities women in both neighborhoods seem to have been more powerful because they had responsibilities social networks and daily routines separate from the men in their communities Pardo asserts that the decline of real wages and the growing income gap means that unforunately most women will no longer be able to focus their energies on unpaid community work She reflects on the consequences of this change for women s political involvement as well as on the politics of writing about women and politics

Gross, Andrew Needham, 2023-02-28 Over the past 250 years energy transitions have occurred repeatedly the rise of coal in the nineteenth century the explosion of oil in the twentieth century the nuclear utopianism of the 1950s and 1960s These transitions have been as revolutionary as any political or economic upheaval and they required changes in infrastructure and behavior Yet new energies never wholly replace old ones This volume historicizes energy production and consumption while demonstrating how energy use has reshaped everything from social life and economic organization to political governance It foregrounds the importance of energy for big historical questions about capitalism democracy inequality the environment and identity and it argues that energy systems themselves merit attention as key agents of historical change Given the urgency of climate change and the central position that energy plays in causing and potentially solving global warming this volume engages history as a discipline in the debate over what may be most monumental energy transition of all time the shift away from fossil fuels Community Action and Organizational Change Brenton D.
