Earth: Essays on Looking Outward Sylvia Engdahl, 2019-11-11 Much has been said about the positive effect of the photos of Earth obtained by Apollo 8 which for the first time showed our planet as a globe a fragile refuge amid barren surroundings and thereby launched the environmental movement The negative impact the subconscious apprehension resulting from realization that space is an actual place containing little that is familiar to us and perhaps much that we do rather not meet is not spoken of But it may be no less significant Could this be one of the reasons why widespread interest in space died so soon after the first moon landing For the past fifty years space advocates have been puzzled and frustrated by the slowness of progress in space and the failure of the public to grasp its importance not only to the future of humankind but to the preservation of Earth's environment But is it really cause for discouragement In this book Sylvia Engdahl argues that in the light of history it is not surprising that acceptance of a new outlook on the universe is slow All past human advances have been made by visionary minorities without the support of their contemporaries and our transformation into a spacefaring species will be no exception This book also includes all of Engdahl's earlier essays about space such as *Space and Human Survival* which has been popular on the Web for nearly twenty years plus new ones about the priority of Mars and the question of whether we'll ever meet hostile aliens In addition an Epilogue contains the quotations from her Web page *Space Quotes to Ponder* about why a presence in space is vital to humankind X Ray is enabled and includes biographical information about all the quotation authors as well as the people mentioned in the essays

Crossover Fiction Sandra L. Beckett, 2010-11-24 In *Crossover Fiction* Sandra L. Beckett explores the global trend of crossover literature and explains how it is transforming literary canons concepts of readership the status of authors the publishing industry and bookselling practices This study will have significant relevance across disciplines as scholars in literary studies media and cultural studies visual arts education psychology and sociology examine the increasingly blurred borderlines between adults and young people in contemporary society notably with regard to their consumption of popular culture

The Future of Being Human and Other Essays Sylvia Engdahl, 2020-01-28 What will humans be like in the future According to science fiction author Sylvia Engdahl they will be no different from what they're like now There will be many innovations in technology and ways of daily life but people are people wherever and whenever they happen to live and that's not going to change In this book Engdahl departs from the theme of space colonization on which her past essays available in her book *From This Green Earth* have focused and discusses such topics as artificial intelligence paranormal psi powers healthcare policy and the coming loss of personal privacy Her controversial views on these subjects will inspire thought about what the future is likely to bring

Children's Books and Their Creators Anita Silvey, 1995 Unique in its coverage of contemporary American children's literature this timely single volume reference covers the books our children are or should be reading now from board books to young adult novels Enriched with dozens of color illustrations and the voices of authors and illustrators themselves it is a cornucopia of delight 23 color 153 b/w illustrations

Envoy of the Flame Sylvia Engdahl, 2022-09-19

Ardith Moran is elated by the prospect of contact with extraterrestrial civilizations elated enough to stake her life on her conviction that they exist after the exploratory expedition's leaders turn back. The last thing she expects is to fall in love with an alien much less for their love to play a key role in saving Earth from tyranny and eventual ruin. As a member of the Anthropological Service he is willing to make sacrifices and expects her to do the same. Can she, influenced by the legacy of the now legendary Captain of Estel, convince Earthborn people that they can't retreat from the universe? Or will Earth's authorities succeed in killing her to suppress the evidence only she and her fellow envoys can provide. Please note: The original edition of this book published in June 2021 which has a woman's face on the cover has been withdrawn. This is a revised edition published in September 2022. Stewards of the Flame Sylvia Engdahl, 2022-02-25. When starship captain Jesse Sanders is detained by a dictatorial medical regime on the colony planet Undine, he is plunged into a life involving ordeals and joys unlike anything he has ever imagined. *Encyclopedia of Science Fiction* Don D'Amassa, 2015-04-22. Presents articles on the science fiction genre of literature including authors, themes, significant works, and awards. **The Planet-Girded Suns: Our Forebears' Firm Belief in Inhabited Exoplanets** Sylvia Engdahl, 2012-06-01. Interest in exoplanets, the worlds of other stars, is not new. From the late 17th century until the end of the 19th, almost all educated people believed that the stars are suns surrounded by inhabited planets, a belief that was expressed not in science fiction but in serious speculation, both scientific and religious, as well as in poetry. Only during the first half of the 20th century was it thought that life-bearing exoplanets are rare. This is not a science book; rather, it belongs to the category known as History of Ideas. First published by Atheneum in 1974, it tells the story of the rise, fall, and eventual renewal of widespread conviction that we are not alone in the universe. In this 2012 updated edition, the chapters dealing with modern speculation have been revised to reflect the progress science has made during the past 40 years, including the actual detection of planets orbiting other stars. However, it is not intended to be more than a brief introduction to today's views; its focus is on little-known facts about those of the past. Why should we care what our forebears believed? Now the question of ET life is a matter for investigation by science. Yet it's significant that most educated people of past centuries were convinced that other inhabited worlds exist without any scientific evidence whatsoever. This historical fact reveals that human beings have an instinctive sense of kinship with the wider universe and a desire to see the realms that lie beyond this one small planet, and perhaps eventually to go there. Our ancestors conceived of such voyages only in a spiritual sense, as occurring after death. But we, who have taken our first small steps into space, are aware that our descendants may set foot on the worlds of other suns. Just as in the 17th century people were initially upset by the new knowledge that the stars are suns scattered in space rather than lights fixed to a nearby sphere, the growing awareness that Earth is not safely isolated from whatever lies beyond makes many of our contemporaries uneasy. Thus today's predominant feelings about spaceships are ambivalent. Nevertheless, if an impulse toward belief that we are not alone in the universe is indeed an innate characteristic of human beings, as the past

spread of belief in inhabited exoplanets suggests we can be sure that those who follow us will not turn back from becoming spacefarers

Promise of the Flame Sylvia Engdahl, 2022-02-25 Three hundred people isolated on a raw new planet in the hope that their psi powers will become the foundation of a culture that can someday shape the future of humankind If they don't starve first If they don't lose heart in the face of hardships beyond any they imagined And if their kids can be reared to believe in the dream and advance both their technology and their psi powers from one generation to the next Starship Captain Jesse Sanders hasn't expected to be responsible for the settlement Peter is the leader the visionary on whose inspiration they all depend But Peter has his hands full not only with maintaining morale but with grueling ordeals of his own So the job of ensuring the colony's survival falls on Jesse And in the end he must stake his life in a desperate attempt to prevent the loss of all they have gained This is a sequel to *Stewards of the Flame* but it can be read independently Unlike Engdahl's other earlier novels it is not a YA book and is not appropriate for middle school readers

The Far Side of Evil Sylvia Engdahl, 2003-03-01 On completion of her training as an agent of the interstellar federation's Anthropological Service Elana is sent to a world whose people may soon destroy their civilization Since not enough is understood about the situation to justify any interference with their evolution the Service has no power to act its agents must go as helpless observers posing as natives in the hope of gaining knowledge that may help to save other worlds This passive role proves intolerable to the young inexperienced agent assigned to the same city as Elana a city under totalitarian rule After falling in love with a local girl who has become Elana's closest friend he identifies too completely with the natives and unwittingly endangers the entire world by a well meant but ill advised attempt to intervene Forced to assume responsibility for undoing the damage Elana finds that only she at great cost can prevent an immediate war of annihilation Although this novel has the same heroine as the author's Newbery Honor book *Enchantress from the Stars* it is not a sequel but a completely separate and very different story not intended for readers below high school age which is also enjoyed by adults The two books are in no way dependent on each other and can be read in either order

Journey Between Worlds Sylvia Engdahl, 2006-03-01 Melinda Ashley has a plan for her life and a trip to Mars isn't part of it When she receives a spaceliner ticket as a high school graduation gift from her dad she is dismayed but reluctantly agrees to go with him in part because she's infuriated by her fiancé's high handed declaration that she can't Her outlook begins to change when she meets Alex Preston a second generation Martian colonist who is going home after college on Earth Alex believes settling Mars is important He's looking forward to the role he expects to play in the colony's future Melinda finds this hard to understand yet she is more and more drawn to him and while on Mars to his family Torn between what she has always wanted and upsetting new feelings she wonders if she can ever again be content It takes tragedy and a terrifying experience on the Martian moon Phobos to make her aware of what really matters to her

Herald of the Flame Sylvia Engdahl, 2014-10-15 As captain of his own starship Estel Terry Steward born Terry Radnor is committed to spreading acceptance of psi powers and other advanced mind

capabilities throughout the colonies of humankind Barred from contact with his beloved planet Maclairn he now journeys from world to world heralding the hopeful future about which he alone knows the full truth But the opponents of mind powers are gaining strength and on Earth the persecution of people who develop such abilities is increasing Soon targeted by bounty hunters Terry risks everything that matters to him in a desperate attempt to defeat Maclairn s enemies not guessing that if he lives long enough he is destined for an even greater role in human history than he has played as a defender of its cause **The Writers Directory** ,2013
