**Landscape and Utopia** Jody Beck, 2022-12-22 This book examines three landmark utopian visions central to 20th century landscape

architectural planning and architectural theory The period between the 1890s and the 1940s was a fertile time for utopian thinking Significant geographic shifts of large populations radically altered relations between capital and labor rapid technological developments large investments in transportation and energy infrastructure and repetitive economic disruptions motivated many individuals to wholly reimagine society including the connections between social relations and the built environment Landscape and Utopia examines the role of landscapes in the political imaginations of the Garden City the Radiant City and Broadacre City Each project uses landscapes to propose a reconstruction of the relationships between land labor and capital but while the projects are well known the role played by landscapes has been largely left unexamined Similarly the radical anti capitalism that underpinned each project has similarly been for the most part left out of contemporary discussions This book sets these projects within a historical and philosophical context and opens a discussion on the role of landscapes in society today This book will be a must read for instructors students and researchers of the history and theory of landscape architecture planning and architecture as well as utopian studies cultural and social history and environmental theory

Letters on the Autonomy Project Janet Matina Sarbanes, 2022 In the face of rising authoritarianism and on the heels of urgent struggle autonomy calls to us How might we excavate the theory and history of autonomous politics to arrive at new possibilities for radical democracy and the radical imaginary How can we rethink the ways in which artistic autonomy is theorized and practiced beyond the shrunken horizon of liberal individualism How might we understand political and artistic autonomies as linked rather than diametrically opposed And what role does radical pedagogy have to play in all of this Framed by the thought of Cornelius Castoriadis and engaging with Marxist Black Radical and Feminist approaches to liberation as well as movements such as Occupy Black Lives Matter Me Too Letters on the Autonomy Project understands

autonomy to be the capacity of a society a community or an individual to modify its form As Castoriadis argues the struggle for self determination requires unlimited questioning of the way things are but also that we do or make something new in light of this interrogation Autonomy is thus equally a project for thought for education for politics and for art Provided by publisher Revisiting "Social Factors" Georgia Lindsay,Lusi Morhayim,2015-09-18 Research in Social Factors also called Environment and Behavior Studies or Person Environment Relations is research into the human experience of the built environment Even since its heyday in the 1970s and 1980s as a response to the perceived failures of Modernism Social Factors continues to ask questions about how people use space and what meaning that space holds This edited collection brings together cutting edge research and contemporary issues into one book Divided into two parts the chapters in this collection demonstrate the continuing relevance of and the wide array of topics in the field The first section History and Future Outlook addresses the field itself investigating its history and common terms and updating seminal work The second section Perspectives on the User surveys contemporary research into the human side of design understanding the built environment through the lens of valuing the user a term which encompasses everyone from Native Americans to children to adults with disabilities to entire cities devastated by tornadoes Contributors to this volume include emerging and established scholars as well as practitioners and touch on issues of sustainability history culture new media disaster recovery health and recreation This book will particularly appeal to scholars looking to keep abreast of current issues students of the field endeavouring to understand their chosen subject and practitioners exploring new strategies in understanding the clients they serve The array of topics and perspectives examined here demonstrates a renaissance of Social Factors **Demanding Justice in The Global South** Jean Grugel,Jewellord Nem Singh,Lorenza Fontana,Anders Uhlin,2016-12-10 The politics of claiming rights and strategies of mobilisation exhibited by marginalised social groups lie at the heart of this volume Theoretically the authors aims to foster a holistic and multi faceted understanding of how social and economic justice is claimed either through formal corporatist or organised mechanisms or through ad hoc informal or individualised practices as well as the implications of these distinctive activist strategies The collection emphasises both the difficulties of political mobilisation and the distinctive methods employed by various social groups across a variety of contexts to respond and overcome these challenges Crucially the authors approach involves a conceptualisation of social movements and local mobilisation in terms of the language of rights and justice claims making through more organised as well as everyday political practices In so doing the book bridges the literature on contentious politics the politics of claiming social justice and everyday politics of resistance Pre-trial detention in 20th and 21st Century Common Law and Civil Law Systems Marion Charret-Del Bove,Fabrice Murlon,2014-06-19 Pre trial detention refers to the period when a person after being arrested is detained so as to determine the nature of the offences and the characterization of the charges This notion is part and parcel of the legal proceedings of a criminal investigation and aims at striking a fragile balance between protecting the State and

respecting individual freedoms Lots of examples can be quoted to illustrate the various pre trial detention modalities in common law and civil law traditions including the duration of custody custody rights right to silence right to the presence of a lawyer modalities and control of pre trial detention and procedures in case of wrongful detention This book makes an important contribution to the newly researched topic of pre trial detention from a theoretical and empirical point of view Papers alternatively consider various issues they analyse the philosophical principles and policies underlying pre trial detention and look at the different forms it takes according to several countries on a more technical and pragmatic level they raise the question of the use of an appropriate terminology and the problem of translation that may arise from the differences between the studied legal systems Finally they consider the checks and balances mechanisms put in place to limit the negative effects of the measures restricting liberty This volume contains a selection of contributions by academics specialized in law and comparative criminal procedure political science history sociology linguistics and legal translation and offers a comparative analysis of countries with differing legal traditions

Anti-Oppressive Social Work Practice Karen Morgaine, Moshoula Capous-Desyllas, 2014-07-01

Anti Oppressive Social Work Practice is the first text to fully integrate concepts of anti-oppressive practice with generalist practice course content. This comprehensive approach introduces concepts of social justice and offers detailed insight into how those principles intersect with the practice of social work at the micro, mezzo, and macro levels. The book covers ethics, values, and social work theory and discusses the fundamentals of working with individuals, families, groups, organizations, and communities. The book also highlights policy and social movement activism and practice within a global context. Maintaining an integrative approach throughout, authors Karen Morgaine and Moshoula Capous-Desyllas effectively bridge the gap between anti-oppressive principles and practice and offer a practical, comprehensive solution to schools approaching reaccreditation under the mandated CSWE Standards. Provides an important step in the ongoing evolution of generalist practice in social work. It continues a rich tradition that challenges the profession to become more and more explicit about the revolutionary aspect of practice.
