Beyond Capital István Mészáros, 2018-11-01 Not only profound in its analysis but also so passionately inspired by sympathy for the downtrodden and their struggle for liberation Daniel Singer *The Nation* This is an important book heavy in size and tone It belongs in every serious library Choice **Beyond Capital**, 2024 **Beyond Capital** István Mészáros (filozófus), 1995 *Beyond Leviathan* István Mészáros, 2022-02-22 A field defining masterwork this posthumous publication maps the evolution of the idea of the state from ancient Greece to today István Mészáros was one of the greatest political theorists of the twentieth century Left unfinished at the time of his death *Beyond Leviathan* is written on the magisterial scale of his previous book *Beyond Capital* and meant to complement that work It focuses on the transcendence of the state along with the transcendence of capital and alienated labor while traversing the history of political theory from Plato to the present Aristotle More Machiavelli and Vico are only a few of the thinkers discussed in depth The larger objective of this work is no less than to develop a full edged critique of the state in the Marxian tradition and set against the critique of capital Not only does it provide for the first time an all embracing Marxian theory of the state it gives new political meaning to the notion of the withering away of the state In his definitive seminal work Mészáros seeks to illuminate the political preconditions for a society of substantive equality and substantive democracy *Beyond Capital* Meszaros Istvan, 2000

The End of Western Hegemonies? Marie-Josée Lavallée, 2022 In the face of recent trends like growing authoritarianism and xenophobic nationalism the rise of the Far Right the explosion of economic and social inequalities heightened geopolitical contest and global capitalism's endless crisis and the impacts of shocks like the Covid 19 pandemic discourses about the decline of the West no more look like mere ruminations of a handful of cultural depressives and politically disillusioned they sound increasingly realistic This volume addresses this issue by mapping and analyzing the forms mechanisms strategies and effects in the past the present and the future of Western hegemonies namely asymmetrical relations that bring advantages or at least secure the superiority of Western state and non state actors in politics economics and culture broadly understood Over the past decades and centuries Westerners never ceased claiming supremacy in all these spheres A host of these relations were initiated through colonialism and imperialism and perpetuated through informal imperialism but there are other channels political interference inequalities between countries and attempts at affirming the supremacy of the so called Western way of life was also secured through the military might and economic power of great Western actors This book explores sites of Western hegemonies and contributes to understanding the mechanisms through which international hierarchies are formed and maintained Bringing together the research of scholars from various fields in the humanities and social sciences political science international relations political philosophy sociology history postcolonial studies criminology and linguistics this volume develops a multidisciplinary outlook on the issue of Western hegemonies that allows uncovering resemblances between various forms of asymmetrical relations and their mechanisms **The Socialist**

Alternative Michael Lebowitz, 2010-07-01 A good society Michael Lebowitz tells us is one that permits the full development of human potential In this slim lucid and insightful book he argues persuasively that such a society is possible That capitalism fails his definition of a good society is evident from even a cursory examination of its main features What comes first in capitalism is not human development but privately accumulated profits by a tiny minority of the population When there is a conflict between profits and human development profits take precedence Just ask the unemployed those toiling at dead end jobs the sick and infirm the poor and the imprisoned But if not capitalism what Lebowitz is also critical of those societies that have proclaimed their socialism such as the former Soviet Union and China While their systems were not capitalist and were capable of achieving some of what is necessary for the development of human potential they were not good societies A good society as Lebowitz defines it must be marked by three characteristics social ownership of the means of production social production controlled by workers and satisfaction of communal needs and purposes Lebowitz shows how these characteristics interact with and reinforce one another and asks how they can be developed to the point where they occur more or less automatically that is become both a society s premises and outcomes He also offers fascinating insights into matters such as the nature of wealth the illegitimacy of profits the inadequacies of worker controlled enterprises the division of labor and much more

The Accumulation of Waste Ali Kadri, 2023-08-21 Phenomenal waste has surfaced as the social form and substance of value In capital s totalizing process which commodifies all that comes in its way wasting classes consume the wasted classes This book addresses the metamorphosis of value into waste and it focuses on wars as industries of perfect waste Whereas wasted man is visibly the prevalent commodity on sale this central element in the commodity relation is rarely mentioned In line with this the book examines how waste as a surrogate value eludes the crises of capital and maintains its resilience

The Necessity of Social Control István Mészáros, 2015 As John Bellamy Foster writes in his foreword to the present book István Mészáros is one of the greatest philosophers that the historical materialist tradition has yet produced His work stands practically alone today in the depth of its analysis of Marx s theory of alienation the structural crisis of capital the demise of Soviet style post revolutionary societies and the necessary conditions of the transition to socialism His dialectical inquiry into social structure and forms of consciousness a systematic critique of the prevailing forms of thought is unequalled in our time Mészáros is the author of magisterial works like Beyond Capital and Social Structures of Forms of Consciousness but his work can seem daunting to those unacquainted with his thought Here for the first time is a concise and accessible overview of Mészáros s ideas designed by the author himself and covering the broad scope of his work from the shortcomings of bourgeois economics to the degeneration of the capital system to the transition to socialism

The Work of Sartre István Mészáros, 2012-07 This landmark book first published in 1979 met acclaim as a doubly important work of radical philosophy Its subject Jean Paul Sartre was among the twentieth century s most controversial and influential philosophers its author István Mészáros was himself establishing a reputation for profound contributions to the

Marxian tradition which would continue into the next century The Work of Sartre was thus considered essential for its insights on Sartre and as a piece of M sz ros s developing politico philosophical project In this completely updated and expanded volume M sz ros examines the manifold aspects of Sartre s legacy as novelist playwright philosopher and political actor and in so doing casts light upon the entire oeuvre situating it within the historical and social context of Sartre s time Although critical of aspects of Sartre s philosophy M sz ros celebrates his unyielding commitment to the struggle against the power of capital and elucidates what this means for the individual in their search for freedom *The Socialist Imperative* Michael A. Lebowitz, 2015-07-22 In a little more than a decade economist Michael A Lebowitz has written several major works about the transition from socialism to capitalism Beyond Capital winner of the Deutscher Prize Build It Now The Socialist Alternative and The Contradictions of Real Socialism Here he develops and deepens the analysis contained in those pathbreaking works by tracing major issues in socialist thought from the nineteenth century through the twenty first Lebowitz explores the obvious but almost universally ignored fact that as human beings work together to produce society s goods and services we also produce something else namely ourselves Human beings are shaped by circumstances and any vision of socialism that ignores this fact is bound to fail or at best reproduce the alienation of labor that is endemic to capitalism But how can people transform their circumstances in a way that allows them to re organize production and at the same time fulfill their human potential Lebowitz sets out to answer this question first by examining Marx s Critique of the Gotha Programme and from there investigates the experiences of the Soviet Union and more recent efforts to build socialism in Venezuela He argues that socialism in the twenty first century must be animated by a central vision in three parts social ownership of the means of production social production organized by workers and the satisfaction of communal needs and communal purposes These essays repay careful reading and reflection and prove Lebowitz to be one of the foremost Marxist thinkers of this era [Ibss: Economics: 1995](#) Compiled by the British Library of Political and Economic Science at the London School of Economics, 1996 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences **Imperialism with Reference to Syria** Ali Kadri, 2019-03-08 This extended essay investigates the meaning of imperialism in Syria providing a valuable addition to the ongoing debate on the Syrian crisis through the lens of imperialism modern warfare and geopolitics It offers a detailed analysis of how the Syrian war has been the product of imperialist ambitions The author begins by situating the Syrian conflict in the regional historical continuum positing that the modern imperialist war visited upon Syria is both a production domain intrinsic to capital and an application of the law of value assuming a highly destructive form Such processes particularly the measure of war as a component of accumulation by waste and militarism are peculiar to the imperialism of the United States which the author argues is the sole imperialist power at play in Syria and globally With so many international forces vying with one another in this country and some prominent

Western scholars equally ascribing imperialism to the US Russia and China defining who the imperialist is can help to clear some of the fog in the war of positions as a misplaced or ideologically motivated assessment can provide the wrong party with a justification for prolonging the war This book will be of interest to academics in the social sciences and Middle Eastern studies but will also appeal to all readers with an interest in patterns of global development postcolonialism and neoliberal imperialism

The Contradictions of "Real Socialism" Michael A. Lebowitz, 2012-08 What was real socialism the term which originated in twentieth century socialist societies for the purpose of distinguishing them from abstract theoretical socialism In this volume Michael A Lebowitz considers the nature tendencies and contradictions of those societies Beginning with the constant presence of shortages within real socialism Lebowitz searches for the inner relations which generate these patterns He finds these in particular in what he calls vanguard relations of production a relation which takes the apparent form of a social contract where workers obtain benefits not available to their counterparts in capitalism but lack the power to decide within the workplace and society While these societies were able to claim major achievements in areas from health care to education to popular culture the separation of thinking and doing prevented workers from developing their capacities as fully developed human beings The relationship within real socialism between the vanguard as conductor and a conducted working class however did not only lead to the deformation of workers and those elements necessary for the building of socialism it also created the conditions in which enterprise managers emerged as an incipient capitalist class which was an immediate source of the crises of real socialism As he argued in *The Socialist Alternative Real Human Development* Lebowitz stresses the necessity to go beyond the hierarchy inherent in the relation of conductor and conducted and beyond the vanguard Marxism which supports this to create the conditions in which people can transform themselves through their conscious cooperation and practice i e a society of free and associated producers

The Imperialist Question in Middle East and North Africa Matteo Capasso, Ali Kadri, 2025-10-27 This book reveals how today's devastating conflicts across Gaza Syria and the broader Middle East represent imperialism in its most destructive form Leading Area Studies scholars move beyond fragmented analyses to examine how US led imperial power functions as a comprehensive system from Tunisia's financial dependency to the weaponization of feminist discourse in justifying violence Central to this analysis is the concept of accumulation by waste demonstrating how systematic destruction has become imperialism's primary mechanism for maintaining regional control Through diverse case studies spanning North Africa to the Arabian Peninsula the authors illuminate how military interventions financial domination and ideological warfare work in concert to preserve Western hegemony Yet this collection also documents emerging alternatives from Palestinian resistance in Gaza to China's development model pathways beyond imperial control are taking shape This book is essential reading for anyone seeking to understand the forces shaping our world and the struggles necessary to transform it This volume speaks to students scholars and policymakers across International Relations Political Economy Marxist Studies Middle Eastern Studies and Critical

Security Studies Originally published as a special issue of Middle East Critique this edition features three additional chapters and a thoroughly updated introduction that addresses recent developments across the region **Frontier Making in the Amazon** Antonio Augusto Rossotto Ioris, 2020-01-21 This book discusses the outcomes of more than ten years of research in the southern tracts of the Amazon region and addresses the expansion of the agricultural frontier consolidation of the agribusiness based economy and expansion of regional infrastructure roads dams urban centres etc It combines extensive empirical evidence with the international literature on frontier making and regional Amazonian development and adopts a critical politico geographical perspective that will benefit scholars in various other disciplines This book is intended to push the current theoretical and methodological boundaries regarding the controversies and impacts of agribusiness in the region A new international scientific network led by the author is investigating the broader context of the themes analysed here
