Beyond Treaties: Rethinking Legal Mechanisms for International Climate Governance Türkan Gülce Budak, 2025-04-05 This open access book examines the implications of the shift towards minilateralism for international climate law analysing how climate related trade measures and Paris Agreement compatible platforms may enhance global climate governance The landscape of international climate change law is evolving from a traditional consensus based treaty model characterized by comprehensive yet often slow moving agreements toward a more pragmatic approach known as minilateralism In this emerging paradigm smaller groups of countries negotiate and implement trade measures aimed at mitigating climate impacts An exemplary case is the European Green Deal which introduces climate related trade measures as a key instrument for achieving sustainability goals within and beyond Europe Additionally countries are exploring minilateral cooperation platforms within the Paris Agreement framework to further their climate objectives The central questions to be addressed in this book are twofold First how can the design of the minilateral schemes comply with the Paris Agreement s international cooperation common but differentiated responsibilities and respective capacities and market based mechanisms principles Second to what extent does the climate related trade measures conform with the WTO regime particularly with the non discrimination principles of the trade law namely most favoured nation and national treatment

Beyond states Raphaela Schweiger, 2023-03-07 This book investigates the role and influence of non state actors NSAs and local authorities in the process leading to the adoption of the 2018 Global Compact for Migration GCM the first intergovernmental negotiation of its kind at the UN The research draws upon methods initially applied to assess global climate negotiations and for the first time analyzes the influence of NSAs and local authorities in an international negotiation on migration It builds on an assessment of the state of the art on global migration governance adding new perspectives and insights The analysis of the influence of NSAs and local authorities is backed by an online survey of participating stakeholders interviews with key actors and hundreds of other primary sources obtained from the process The author finds that the UN system s willingness to onboard NSAs was key to creating the GCM as it stands today While the research finds little direct influence from NSAs during the negotiations the first draft of the GCM was very

much informed by their input Local authorities still new to the global stage made the case for their further inclusion in global migration governance The United Nation's Convention on the Law of the Sea (Treaty Doc. 103-39) United States.

Congress. Senate. Committee on Foreign Relations,2008 *Sovereignty and the Limits of International Law* Todd Berry,2023-11-29 The inspiration for this book comes from negotiations that are taking place under the auspices of the United Nations by an intergovernmental conference for a new International Legally Binding Instrument ILBI under the United Nations Convention on the Law of the Sea UNCLOS on the conservation and sustainable use of marine biological diversity of Areas Beyond National Jurisdiction ABNJ The proposed ILBI is attempting to fill existing gaps under international law over marine biodiversity and Marine Genetic Resources MGR in ABNJ One way it is attempting to do this is by having an Access and Benefit Sharing ABS schema over these resources in ABNJ that the United Nations Convention on Biological Diversity CBD and its Nagoya Protocol NP do not currently cover These existing frameworks that regulate genetic resources are grounded in the notion of sovereignty Effectively States have sovereign rights over their biological resources The ILBI however is attempting to regulate marine biodiversity and MGR in ABNJ Thus the notion that negotiators representing nation States under the auspices of the United Nations can regulate ABNJ is paradoxical are these areas beyond nation States jurisdiction or not Implicitly the negotiators are acting as though they have sovereignty over resources located in what has been historically a sovereign free space Thus the purpose of this book is to investigate this paradox Essentially this book critiques the notion that ABNJ can actually be regulated under the auspices of the United Nations by nation State negotiators
