Learning about our world and our past : using the tools and resources of geography and U.S. history : a report of the 1994 NAEP assessment ,1998

Teaching History in the Digital Classroom D.Antonio Cantu,Wilson J. Warren,2016-09-16 While many methods texts have an add on chapter on technology this book integrates the use of technology into every phase of the teaching profession Filled with decision making scenarios and reflective questions that help bring the material to life it covers the development of teaching technologies developing lesson plans and actual instructional models in history and social studies An appendix provides sample lessons sample tests a list of resources and other practical materials

Learning about Our World and Our Past Evelyn K. Hawkins,1998 This report summarizes results from the 1994 National Assessment of Educational Progress NAEP specifically those results concerning geography and U S history The 1994 NAEP asked 4th 8th and 12th grade students a series of questions designed to assess their knowledge level and skills applications in specific subjects This report provides an in depth look at the type of tasks that made up the assessments in geography and U S history and how the students performed on those tasks It makes extensive use of examples of student work and of exercise level statistics in examining performance in different skills areas and on particular assessment exercises Specific attention is given to the ways that students use the tools and resources of history and geography The questions reflected the content and cognitive dimensions deemed essential for an understanding of these subjects One content dimension included four themes change and continuity in U S democracy ideas institutions practices and controversies the gathering and interaction of peoples cultures and ideas economic and technological changes and their relation to society ideas and the environment and the changing role of the United States in the world A second content dimension covers eight time periods Three Worlds and Their Meeting in the Americas beginnings to 1607 Colonization Settlement and Communities 1607 to 1763 The Revolution and the New Nation 1763 to 1815 Expansion and Reform 1801 to 1861 Crisis of the Union Civil War and Reconstruction 1850 to 1877 Development of Modern America 1865 to 1920 Modern America and the World Wars 1914 to 1945 and Contemporary America 1945 to present At every grade the overall geography performance of males was higher than that of females however in U S history overall performances for males and females was significantly different at 12th grade only where males slightly outperformed females In both subject areas the performance of White students was higher than that of Black or Hispanic students MJP

Annual Report - National Historical Publications and Records Commission United States.

National Historical Publications and Records Commission, *The Presence of the Past* Roy Rosenzweig, David Thelen, 1998-11-05 Some people make photo albums collect antiques or visit historic battlefields Others keep diaries plan annual family gatherings or stitch together patchwork quilts in a tradition learned from grandparents Each of us has ways of communing with the past and our reasons for doing so are as varied as our memories In a sweeping survey Roy Rosenzweig and David Thelen asked 1 500 Americans about their connection to the past and how it influences their daily lives and hopes for the future The result is a surprisingly candid series of conversations and reflections on how the past infuses the present with meaning Rosenzweig and Thelen found that people assemble their experiences into narratives that allow them to make sense of their personal histories set priorities project what might happen next and try to shape the future By using these narratives to mark change and create continuity people chart the courses of their lives A young woman from Ohio speaks of giving birth to her first child which caused her to reflect upon her parents and the ways that their example would help her to become a good mother An African American man from Georgia tells how he and his wife were drawn to each other by their shared experiences and lessons learned from growing up in the South in the 1950s Others reveal how they personalize historical events as in the case of a Massachusetts woman who traces much of her guarded attitude toward life to witnessing the assassination of John F Kennedy on television when she was a child While the past is omnipresent to Americans history as it is usually defined in textbooks leaves many people cold Rosenzweig and Thelen found that history as taught in school does not inspire a strong connection to the past And they reveal how race and ethnicity affects how Americans perceive the past while most white Americans tend to think of it as something personal African Americans and American Indians are more likely to think in terms of broadly shared experiences like slavery the Civil Rights Movement and the violation of Indian treaties Rosenzweig and Thelen s conclusions about the ways people use their personal family and national stories have profound implications for anyone involved in researching or presenting history as well as for all those who struggle to engage with the past in a meaningful way

Resources in Education ,1998 **Wise Social Studies in an Age of High-Stakes Testing** Elizabeth Anne Yeager, O. L. Davis, 2005-08-01 The chapters in this volume illustrate how teachers are bringing creativity higher order thinking and meaningful learning activities into particular school settings despite pressures of standards and testing We chose the word wise for the title of this book and we use it frequently to describe the pedagogical practices we have identified The words powerful and ambitious are used as well The larger point as Keith C Barton makes in his chapter is that there is no necessary connection between content standards and high stakes tests on the one hand and lowlevel rote instruction on the other He reminds us as Thornton 1991 and Wiggins 1987 previously have argued that teachers play a crucial role in mediating educational policy and their intentions and interpretations have at least as much influence on classroom practice as does the content of standards and highstakes tests Barton also asserts that this makes it all the more crucial to identify the wisdom of practice that enables teachers to engage students in powerful educational

experiences **Teaching Middle Level Social Studies** Scott L. Roberts, Benjamin R. Wellenreiter, Jessica Ferreras-Stone, Stephanie L. Strachan, Karrie L. Palmer, 2022-03-01 This textbook is a comprehensive and practical guide to teaching middle level social studies Middle level students are just as capable as high school students at engaging in hands on progressive reflective activities yet pedagogical strategies designed specifically for the middle grades are often overlooked in teacher education programs This text provides both progressive and traditional teaching methods and strategies proven effective in the middle level classroom The content of this book consists of conventional chapters such as What is Social Studies and Unit and Curriculum Planning as well as unique chapters such as The Middle Level Learner Best Practices for Teaching State History and Integrating the Core Subjects in Middle Level Social Studies In addition to the unique chapters and lesson plans many additional features of the book will be useful for middle level teaching and learning These features include A list of website resources that provide links to thousands of lesson plans state and national standards and other multimedia tools that can be used in the classroom Individual collaborative and whole class activities that will help methods students develop a better understanding of the topics lessons and strategies discussed High quality lesson ideas and classroom tested teaching strategies embedded throughout the book Images of student work samples that will methods students visualize the finished product that is being discussed An examination of state and national standards that will help guide methods students in their lesson planning **"Why Won't You Just Tell Us the Answer?"** Bruce Lesh, 2023-10-10 Every major measure of students historical understanding since 1917 has demonstrated that students do not retain understand or enjoy their school experiences with history Bruce Lesh believes that this is due to the way we teach history lecture and memorization Over the last fifteen years Bruce has refined a method of teaching history that mirrors the process used by historians where students are taught to ask questions of evidence and develop historical explanations And now in his new book Why Won't You Just Tell Us the Answer he shows teachers how to successfully implement his methods in the classroom Students may think they want to be given the answer Yet when they are actively engaged in investigating the past the way professional historians do they find that history class is not about the boring memorization of names dates and facts Instead it's challenging fun Historical study that centers on a question where students gather a variety of historical sources and then develop and defend their answers to that question allows students to become actual historians immersed in an interpretive study of the past Each chapter focuses on a key concept in understanding history and then offers a sample unit on how the concept can be taught Readers will learn about the following Exploring Text Subtext and Context President Theodore Roosevelt and the Panama Canal Chronological Thinking and Causality The Rail Strike of 1877 Multiple Perspectives The Bonus March of 1932 Continuity and Change Over Time Custer's Last Stand Historical Significance The Civil Rights Movement Historical Empathy The Truman MacArthur Debate By the end of the book teachers will have learned how to teach history via a lens of interpretive questions and interrogative evidence that allows both student and teacher to

develop evidence based answers to history s greatest questions Taking Religion Seriously Across the Curriculum Warren A. Nord, Charles C. Haynes, 1998 The authors chart a middle course in our war over religion and public education one that builds on a developing national consensus among educational and religious leaders While it is not proper for schools to practice religion or proselytize neither is it permissible to make them religion free zones Schools do not take religion seriously as the authors review of textbooks and the new national content standards makes clear In Part One they outline the civic constitutional and educational frameworks that should shape the treatment of religion in the curriculum and classroom In Part Two they explore major issues relating to religion in different domains of the curriculum in elementary education and in middle and high school courses in history civics economics literature and the sciences They also discuss Bible courses and world religions courses and explore the relationship of religion to moral education and sex education **Social Studies** Barbara Slater Stern, 2013-09-27 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company

Wiseman, 2021-04-22 This book examines the discourses on nation building civic identity minorities and the formation of religious identities in school textbooks worldwide It offers up to date practical and scholarly information on qualitative and mixed method textbook analysis as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social political and economic groups affect textbook

production and the curricular aims in different educational systems worldwide Chapters address the role of school textbooks in developing nationhood the creation of citizenship through school textbooks the complexity of gender in normative discourses and the intersection of religion and culture in school textbooks **Annual Report** United States. National Historical Publications and Records Commission,1994 *Teaching History for the Common Good* Keith C. Barton,Linda S. Levstik,2004-07-13 In *Teaching History for the Common Good* Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students historical thinking In many cases disagreements about what should be taught to the nation s children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education The authors review research on students historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes and tools that influence students developing understanding of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In *Teaching History for the Common Good* Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and how it guides their analysis and describe research on children s and adults knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students learning explore four principal stances toward history identification analysis moral response and exhibition review research on the extent to which children and adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers knowledge and practice and argue that for teachers to embrace investigative multi perspectival approaches to history they need more than

knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose Teaching History for the Common Good is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject

Understanding by Design Grant P. Wiggins, Jay McTighe, 2005 What is understanding and how does it differ from knowledge How can we determine the big ideas worth understanding Why is understanding an important teaching goal and how do we know when students have attained it How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high stakes standards based environment Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design* Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998 the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum assessment and instruction With an improved UbD Template at its core the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks Readers will learn why the familiar coverage and activity based approaches to curriculum design fall short and how a focus on the six facets of understanding can enrich student learning With an expanded array of practical strategies tools and examples from all subject areas the book demonstrates how the research based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum Combining provocative ideas thoughtful analysis and tested approaches this new edition of *Understanding by Design* offers teacher designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike
