On Top of the Cloud Hunter Muller,2011-12-21 Praise for ON TOP OF THE CLOUD 21st century CIOs have a dual responsibility driving down costs and creating new business value Managing this seeming dichotomy is the domain of top business executives everywhere and CIOs everywhere are learning to step it up The original research contained in Hunter's book serves as a practical road map for IT strategy in today's ultra competitive markets Randy Spratt EVP CIO and CTO McKesson Corporation This is a thoughtfully written book and the timing is perfect

Hunter really understands the challenges confronting transformational CIOs in today's markets and he captures the choices they face as they work to create value for their organizations while driving down the costs of doing business in the modern world. The wealth of information contained in this book makes it truly valuable to career IT leaders and future CIOs alike.

Mark Polansky, Senior Client Partner and Managing Director, Information Technology Center of Expertise, Korn Ferry International, North America: The cloud involves more than just technology. It's really more of a new business model. Hunter grasps the central truth about cloud computing and that's why this is a valuable book. Hunter understands the issues and conveys them in a conversational tone that is truly refreshing.

Dave Smoley, SVP and CIO, Flextronics International: You may think this is a book about technology, well it's not. It's a book about leadership packed with stories about real leaders finding new customers and markets, transforming the way their organizations work and adding value with the next generation of technology as the enabler. The cloud holds real potential. Read this book to see how top CIOs are positioning their companies.

Tony Leng, Managing Director, Diversified Search: Hunter has the unique ability to distill the best thinking of world-class CIOs into something you can act on. If you are a technology executive trying to find the right balance between generating business value and managing IT costs, this is the right book for you.

On Top of the Cloud will be especially useful for transformational CIOs tasked with developing their company's strategies for technology-driven business growth.

Randy Krotowski, CIO, Global Upstream, Information Technology, Chevron Corporation: **Learning What to Ignore**

Conrad P. Pritscher, 2013-02-11: The acceptance of reason with uncertainty can help learners successfully manage their occupations and lives during the accelerations prominent in the 21st century. As William Ayers states, Pritscher tilts his lance at the petrified orthodoxy we call teaching and learning, inviting us on a wild journey into the heart of education. The book elaborates on David Geoffrey Smith's question: Why does so much educational research today seem so unenlightening, repetitive and incapable of moving beyond itself? The answer must be because it is paradigmatically stuck and cannot see beyond the parameters of its current imaginal space. The book offers help to go beyond the current imaginal space through what is called *kaplearning*. *Kaplearning* can help the reader to defamiliarize the common by facilitating letting go. Pritscher takes an *avant garde* approach to learning, pushing the boundaries of the long-accepted norm, certainty and order, and modernizing education by trading the old optimal way with a new skill to reason with uncertainty. This resilience to ambiguity is precisely where human intelligence has full advantage over machine intelligence. Pritscher's book is impressive and remarkably well-timed, as recent articles in *Nature* show that online game players can make surprising breakthroughs in science with a well-chosen confluence of effective sources and a bit of creativity with protein folding. Citizen science has led to solutions that scientists and computer simulators have struggled for years proving that even with little or no scientific training, knowing what to ignore can invite innovating ways to think and execute. Pritscher's clear and wise insight will definitely serve as an inspiration for the next generation of educators and prepare the necessary skills for young learners to successfully compete in the future.
