Publication Design Roy Paul Nelson,1991 BetterAt/School Marilee Bowles-Carey,2013-09-19 BetterAt School A Platform for Student Centered Mobile Learning is a report of the outcomes of a research project funded by the Bill Melinda Gates Foundation The goal of the project was to explore ways that interest based learning software might bridge the gap between the Common Core Standards and the lack of motivation frequently found in low income students The BetterAt School project built upon research begun in 2005 at IIT Institute of Design ID funded by the John D and Catherine T MacArthur Foundation This work centered on identifying ways that digital media could be beneficial to interest based learning One of the initiatives that emerged from that was the Electronic Learning Record which quickly developed into BetterAt A core assumption of this work was that learning is enhanced when it relates to a student s goals and interests For kids from home environments where they see a variety of jobs and people with choices about their future the standard school experience can be supportive For kids without these examples and choices digital media can help by letting them start with their existing interests to expand their view of possible options The initial challenge for the project was to find ways to relate intrinsic interests to the Common Core with the ultimate goal of helping students prepare for college and productive careers We thank the Bill Melinda Gates Foundation and the John D and Catherine T MacArthur Foundation for their support of research at Institute of Design *Books Out-of-print* ,1980 Sustaining Mobile Learning Wan Ng,Therese M. Cumming,2015-07-16 Mobile technologies are one of the fastest growing areas of technology in education For learners they offer an appealing opportunity to transcend teacher defined knowledge and approaches by being able to access multiple alternative sources of information anytime and anywhere While the pace of engagement with and research into the educational applications of mobile technologies has picked up dramatically in the last decade there is no consolidated view of how to sustain the practices or opportunities that are being explored Sustainability is a complex but crucial issue in mobile learning as educational institutions are usually required to make substantial investments in mobile devices and associated technologies time and training to initiate mobile learning programs The complexity of sustainable mobile learning programs is further exacerbated by the fast pace of change of digital technologies where with every change new possibilities are opened up and investments required In addition educators are still attempting to reconcile institutions of formal education with informal mobile learning The book addresses these issues with a particular focus on exploring the challenges surrounding the sustainability of mobile learning in K 12 and higher education investigating the importance of sustaining mobile learning for diverse populations of students globally discussing theoretical models for the sustainability of mobile learning providing the reader with strategies for sustaining mobile learning Presenting new research alongside theoretical models and ideas for practice the book will appeal to researchers academics and postgraduate students in the fields of education and mobile learning as well as those working in teacher education **Mobile Learning in Schools** Jocelyn

Wishart, 2017-10-03 Mobile Learning in Schools explores the potential for using mobile devices in diverse school and college settings around the globe. It evaluates the exciting opportunities mobile initiatives bring and shares experience of where things can go wrong in order to ensure that those embarking on new projects are fully informed. Drawing on a wide range of international perspectives, it unpicks knotty sociocultural issues including lack of sustainability, behavioural and ethical concerns, and explores successful student learning. Key issues considered include mobile learning in primary schools, teaching and learning with mobile devices in secondary schools, opportunities inside and outside school, pedagogical principles and sustainability, mobile learning for initial teacher training and CPD, ethical considerations, behaviour matters, disruption, plagiarism, cheating, cyberbullying, assessing mobile learning. With annotated further reading and questions to trigger reflection and further discussion amongst readers, this thought-provoking text provides a detailed survey of this often controversial topic. Mobile Learning Design Daniel Churchill, Jie Lu, Thomas K.F. Chiu, Bob Fox, 2015-12-21 This book focuses on mobile learning design from both theoretical and practical perspectives. Mobile Learning Mohamed Hamada, 2015 Mobile learning can be seen as learning across multiple contexts through social and content interactions using personal electronic devices such as handheld computers, smart devices, e.g. Smartphone and tablets, notebooks, mobile phones, etc. It reflects how society and its institutions can accommodate and support an increasingly mobile population. Mobile learning is convenient in that it is accessible from virtually anywhere and at any time. Like other forms of e-learning, mobile learning is also collaborative. Sharing is almost instantaneous among everyone using the same content, which leads to the reception of instant feedback and tips. This highly active process can help in improving students' performance and motivation. Mobile learning also brings strong portability by replacing books and notes with mobile devices filled with tailored learning content. The challenges that face e-learning and mobile learning systems come from the growth rate of students' education, contents, services that can be offered, and resources made available. These challenges include optimising resource, computation, storage, and communication requirements, dealing with dynamic concurrency requests, etc. Such challenges highlight the necessity of the use of a platform that meets scalable demands and cost control. This environment is cloud computing. The cloud computing environment rises as a natural platform to provide support to e- and mobile learning systems. The book contains a variety of relevant topics. The first chapter gives an overall view on mobile learning. The next three chapters

discuss the psychological issues related to mobile learning and learners motivation in addition to the contextualisation of mobile learners The following two chapters introduce some theoretical framework for mobile learning and its cloud based applications in addition to a mobile based recommendation system The last four chapters focus on case studies of mobile learning on natural language education
