Exploring Gender and Sikh Traditions Doris R. Jakobsh, 2021-09-01 This volume gathers scholars who focus on gender through a variety of disciplines and approaches to Sikh Studies The intersections of religion and gender are here explored based on an understanding that both are socially constructed Far from being static as so often presented in world religions textbooks religious traditions are constantly in flux responding to historical cultural and social contexts So too is the Sikh tradition in terms of practices ideologies rituals and notions of identity We here conclude that a Sikh tradition does not exist instead there are numerous forms thereof In this volume Sikhism is presented as a collection of Sikh traditions Gender studies in line with women's liberation masculine and feminist studies have long examined and have long deconstructed the patriarchy but also move to identify other subordinate dominant relations between individuals Indeed there are numerous forms of discrimination and power structures that simultaneously create a multiplicity of oppression Intersectionality has become the basis of an increasingly systematized production of contemporary discourses on feminism and gender analysis as is evidenced by the varied contributions in this volume

The Ethics of Gender-specific Disease Mary Ann Gardell Cutter, 2012 Our understanding of gender carries significant bioethical implications An errant account of gender specific disease can lead to overgeneralizations undergeneralizations and misdiagnoses It can also lead to problems in the structure of health care delivery the creation of policy and the development of clinical curricula In this volume Cutter argues that gender specific disease and related bioethical discourses are philosophically integrative Gender specific disease is integrative because the

descriptive roles of gender disease and their relation are inextricably tied to their prescriptive roles within frames of reference. An integrative account of gender specific disease carries ethical implications because our understanding of gender specific disease is evaluative and our evaluations of gender specific disease entail judgments concerning the praiseworthiness and blameworthiness of a clinical event. Cutter supports a both and emphasis on context and integration in relation to gender specific disease and bioethical analyses. While the text mainly focuses on gender specific diseases that affect women, Cutter also includes examples involving men, children and members of the LGBT community.

Gender Gaps and the Social Inclusion Movement in ICT Williams, Idongesit, Millward, Olga, Layton, Roslyn, 2018-12-14. Despite advancements in technological and engineering fields, there is still a digital gender divide in the adoption, use and development of information communication technology (ICT) services. Featuring coverage on a broad range of topics such as digital identity, human rights and social inclusion, this book is ideally designed for policymakers, academicians, researchers, students and technology developers seeking current research on gender inequality in ICT environments.

Language, Gender and Sexual Identity Heiko Motschenbacher, 2010. This book makes an innovative contribution to the relatively young field of Queer Linguistics. Subscribing to a poststructuralist framework, it presents a critical deconstructionist perspective on the discursive construction of heteronormativity and gender binarism from a linguistic point of view. On the one hand, the book provides an outline of Queer approaches to issues of language, gender and sexual identity that is of interest to students and scholars new to the field. On the other hand, the empirical analyses of language data represent material that also appeals to experts in the field. The book deals with repercussions of the discursive materialisation of heteronormativity and gender binarism in various kinds of linguistic data. These include stereotypical genderlects, structural linguistic gender categories, especially from a contrastive linguistic point of view, the discursive sedimentation of female and feminine generics, linguistic constructions of the gendered body in advertising and the usage of personal reference forms to create characters in Queer Cinema. Throughout the book, readers become aware of the wounding potential that gendered linguistic forms may possess in certain contexts.

Gender Inequality in the Ordained Ministry of the Church of England Alex D.J. Fry, 2023-09-14 This book offers a fresh social scientific analysis of how theologically conservative male clergy respond to the ordination of women to the priesthood and their consecration as bishops within the Church of England The question of women's place in the formal structures of England's Established Church remains contested For many to prevent women from occupying such offices is often understood to be a matter of inequality whereas those who oppose their ordination see it as a matter of obedience to God's will Tensions have become heightened in a culture that increasingly promotes the rights of individuals who have historically been marginalised and that challenges traditional social roles This volume explores the

gender attitudes held by clergy in the Anglo Catholic and evangelical traditions of the Church and considers how these gender attitudes shape the way they think about women's ordination and how they interact with female colleagues. It also considers the contribution of a range of social phenomena to the formation of these gender attitudes. The author draws on and develops a variety of sociological and psychological theories that help to explain the processes that lead to the formation of clergy attitudes towards gender more broadly. *Gender Protest and Same-Sex Desire in Antebellum American Literature* Dr David Greven, 2014-03-28 Expanding our understanding of the possibilities and challenges inherent in the expression of same sex desire Greven identifies a pattern of what he calls gender protest in the writings of Margaret Fuller Edgar Allan Poe Herman Melville and Nathaniel Hawthorne. As Greven shows antebellum authors took up the taboo subjects of same sex desire and female sexuality and were adept in their use of a variety of rhetorical means for expressing the inexpressible.

Through a variety of key case studies it reveals significant gaps in the legal conceptualisation of domestic violence between human rights standards on the one hand and the national legal systems examined those of Ireland and Lithuania on the other. The book reveals that contrary to gender based universal human rights approaches and despite recent legislative reforms the

legal concept of domestic violence is gender blind It fails to capture gender based empirical realities on the ground rendering national legal systems devoid of an empirically informed theoretical basis for addressing the problem Despite the differences in the contextual backgrounds of the two case study countries the legislation on domestic violence is underpinned by patriarchal beliefs in both This book employs a gender based examination of the issue that will be of key interest to scholars legal practitioners civil society actors and students of feminist legal theory gender equality gender in international law gender and human rights and conceptual democracy
