Beyond Nimby Hazardous Waste Siting In Canada And The United States:

Beyond Nimby Barry George Rabe, 1994 These strategies include continuous public involvement in waste policy deliberations a commitment to pursue siting only among communities that volunteer after extended democratic dialogue and extensive packages of economic compensation and assurances of safe long term facility management Beyond NIMBY Barry Rabe, 2010-12-01 The virtual inability to open new hazardous waste management facilities in Canada and the United States stems directly from a form of community opposition so common and vehement that it is commonly identified as a syndrome Not In My Back Yard or NIMBY Whether such facilities are proposed by governmental agencies or by private waste management firms communities are usually shocked to learn that they have been selected to host these facilities and take collective action to thwart them Such actions have blocked many poorly planned facilities and stimulated greater interest in preventive waste reduction strategies They have also however thwarted the adoption of new waste management technologies and created serious geographic inequities in the distribution of waste management responsibility across the two nations Beyond NIMBY examines positive alternatives to prevailing approaches to siting and the familiar NIMBY outcomes In particular it shows that certain siting strategies in Canadian provinces and American states have created successful siting agreements broad public support and comprehensive systems of waste management and prevention These strategies include continuous public involvement in waste policy deliberations a commitment to pursue siting only among communities that volunteer after extended democratic dialogue and extensive packages of economic compensation and assurances of safe long term facility management Equally important are guarantees that any new facility will be only part of a broader waste strategy for a particular province state or region and will not be allowed to become a magnet for wastes from areas that have not taken serious steps to address their own waste problems The book concludes with the suggestion that these strategies can be applied to other NIMBY blocked proposals such as siting for prisons drug and alcohol treatment centers and nursing homes Rabe s book should contribute to the ongoing debate over hazardous waste facility siting His lucid and convincing cases provide a meaningful starting point to push the level of debate beyond atheoretical anecdotes of success and failure Publius

The Dilemma of Siting a High-Level Nuclear Waste Repository D. Easterling, Howard Kunreuther, 2013-12-01 This book explores siting dilemmas situations in which an authority e g Congress a consortium of utilities deems it in the best interest of society to build a facility such as an incinerator but opponents living near the proposed site thwart the plan Facility developers typically attribute local opposition to selfishness or radically inaccurate views of the risks posed by the facility We examine the validity of these conclusions by looking in depth at the psychological response that arises when residents are faced with the prospect of living near waste disposal facilities The particular siting dilemma considered in this book is the problem of how to dispose of the high level nuclear wastes accumulating at nuclear power plants in the United States These wastes in the form of spent fuel rods will emit dangerous levels of radioactivity for thousands of years anywhere

between 10 000 and 100 000 years depending on the margin of safety one adopts The current proposal is to encase the spent fuel in corrosion resistant canisters and then to bury these canisters deep underground in a geologic repository The two of us became involved with the high level waste issue in 1986 as part of an interdisciplinary research team hired by the State of Nevada The charge of this team was to estimate the socioeconomic impacts that would accompany a repository if it were built at Yucca Mountain approximately 100 miles northwest of Las Vegas

Facility Siting in the AsiaPacific Fung Tung,S. Hayden Lesbirel,Kin-che Lam,2011-07-18 This volume explores the management of conflicts arising from the siting of unwanted projects in the AsiaPacific a region inadequately explored by the relevant literature The work includes studies on a variety of locations including Hong Kong Japan Mainland China Taiwan Vietnam Singapore and others Contributions are drawn from several leading scholars intimately familiar with the locations under study and employ theoretical comparative and policybased approaches to analysis of environmental conflict risk management and public participation The editors also provide introductory and concluding sections in which the siting issues under discussion are summarized and contextualized The result is a collection that serves as an invaluable aid and source of information for policymakers environmentalists and scholars of the AsiaPacific and elsewhere

Forum for Applied Research and Public Policy ,1996 *The Environmental Case* Judith A. Layzer,Sara R. Rinfret,2023-06-05 Answers to environmental issues are not black and white Debates around policy are often among those with fundamentally different values and the way that problems and solutions are defined plays a central role in shaping how those values are translated into policy The Environmental Case captures the real world complexity of creating environmental policy and this much anticipated Sixth Edition contains 14 carefully constructed cases including a new study of the Salton Sea crisis Through her analysis Sara Rinfret continues the work of Judith Layzer and explores the background players contributing factors and outcomes of each case and gives readers insight into some of the most interesting and controversial issues in U S environmental policymaking

Rationality and the Ideology of Disconnection Michael Taylor,2006-07-24 A powerful and provocative critique of the foundations of Rational Choice theory and the economic way of thinking about the world written by a former leading practitioner The target is a dehumanizing ideology that cannot properly recognize that normal people have attachments and commitments to other people and to practices projects principles and places which provide them with desire independent reasons for action and that they are reflective creatures who think about what they are and what they should be with ideals that can shape and structure the way they see their choices The author s views are brought to bear on the economic way of thinking about the natural environment and on how and when the norm of fair reciprocity motivates us to do our part in cooperative endeavors Throughout the argument is adorned by thought provoking examples that keep what is at stake clearly before the reader s mind

Conflicts, Participation and Acceptability in Nuclear Waste Governance Achim Brunnengräber,Maria Rosaria Di Nucci,2019-07-12 This book is the last part of a trilogy and concludes a long term project that focussed on nuclear waste

governance in 24 countries It deals with core themes of the disposal of high level radioactive waste HLW e g the wicked problems of housing nuclear waste disposal facilities public participation and public discourse voluntarism and compensation in siting as well as the role of advisory bodies and commissions The volume reflects on the diverse factors that shape the debate on what can be considered an acceptable solution and on various strategies adopted in order to minimise conflicts and possibly increase acceptability The various theoretical and empirical contributions shed light on several mechanisms and issues touched upon in these strategies such as the role of trust voluntarism economic interests at stake compensation ethics governance and participation

Regulatory Encounters Lee Axelrad, Robert A. Kagan, 2000-10-02 This is a pathbreaking contribution to a much neglected area of academic study Bridget M Hutter London School of Economics *Regulatory Encounters* is an extremely impressive book that contains rich varied and convincing case studies on an important topic American adversarial legalism R Shep Melnick Boston College

Canadian Issues in Environmental Ethics Wesley Cragg, Allan Greenbaum, Alex Wellington, 1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business labour and First Nations representatives What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice These are the sorts of issues in applied ethics that are tackled in this collection of essays the vast majority of which have been written especially for this volume It is the first Canadian collection of its kind The book is divided in to sections detailing with such topics as the environment and the economy ethical issues relating to non human animals issues of gender and issues relating to native peoples Most of the authors are philosophers though specialists in geography geology and the social sciences are also among the contributors Frequent reference is made to theoretical ethical concerns but the focus throughout is on applied ethics and a variety of case studies are included Examples include essays on animal rights and the case of native hunters surface mining in Northern Ontario the Quebec arctic and fishing communities in the Maritimes Comparisons are frequently drawn to policies and ethical questions arising in other countries most prominently the United States

Democracy in Practice Thomas C. Beierle, 2010-09-30 In spite of the expanding role of public participation in environmental decisionmaking there has been little systematic examination of whether it has to date contributed toward better environmental management Neither have there been extensive empirical studies to examine how participation processes can be made more effective *Democracy in Practice* brings together for the first time the collected

experience of 30 years of public involvement in environmental decisionmaking Using data from 239 cases the authors evaluate the success of public participation and the contextual and procedural factors that lead to it Thomas Beierle and Jerry Cayford demonstrate that public participation has not only improved environmental policy but it has also played an important educational role and has helped resolve the conflict and mistrust that often plague environmental issues Among the authors findings are that intensive problem solving processes are most effective for achieving a broad set of social goals and participant motivation and agency responsiveness are key factors for success Democracy in Practice will be useful for a broad range of interests For researchers it assembles the most comprehensive data set on the practice of public participation and presents a systematic typology and evaluation framework For policymakers political leaders and citizens it provides concrete advice about what to expect from public participation and how it can be made more effective Democracy in Practice concludes with a systematic guide for use by government agencies in their efforts to design successful public participation efforts

The Social Contours of Risk Roger E. Kasperson, Jeanne Kasperson, 2022-02-15 We live in a risk society where the identification distribution and management of risks from new technology environmental factors or other sources are crucial to our individual and social existence In The Social Contours of Risk Volumes 1 and 2 two of the world's leading and most influential analysts of the social dimensions of risk bring together their most important contributions to this fundamental and wide ranging field Volume II centres on the analysis and management of risk in society in international business and multinationals and globally The acceptability of risk to an individual depends on the context whether the larger society or in for example a corporate framework Their work clarifies the structures and processes for managing risks in the private sector and the factors that produce or impede effective decisions The authors demonstrate that corporate culture is crucial in determining risk management They analyse the transfer of corporate risk management systems from industrial to developing countries and how globalization is spreading and creating new kinds of risk the combination of traditional and modern hazards presented by climate change technology transfer and economic growth They describe the new priorities and capacities needed to deal with these enhanced vulnerabilities around the globe

Environmental Politics and Policy, 1960s-1990s Otis L. Graham, 2010-11-01 This volume of original essays tells the story of how the agenda of the environmental movement in America has changed from the time Rachel Carson sounded her famous clarion call in the early 1960s up to our current era when the globalization of environmental issues has affected both the severity of the problems we all face and the political difficulty of dealing with them Besides the editor whose Introduction and Epilogue frame the book the contributors include well known journalist Roy Beck activist civil servant Leon Kolankiewicz environmental scholar Michael E Kraft historian Martin V Melosi and political scientist David Vogel This volume was originally published as a special issue of The Journal of Policy History

Moral Sentiments and Material Interests Herbert Gintis, 2005 Moral Sentiments and Material Interests presents an innovative synthesis of research in different disciplines to argue that

cooperation stems not from the stereotypical selfish agent acting out of disguised self interest but from the presence of strong reciprocators in a social group Presenting an overview of research in economics anthropology evolutionary and human biology social psychology and sociology the book deals with both the theoretical foundations and the policy implications of this explanation for cooperation Chapter authors in the remaining parts of the book discuss the behavioral ecology of cooperation in humans and nonhuman primates modeling and testing strong reciprocity in economic scenarios and reciprocity and social policy The evidence for strong reciprocity in the book includes experiments using the famous Ultimatum Game in which two players must agree on how to split a certain amount of money or they both get nothing

The Government Taketh Away Leslie A. Pal,R. Kent Weaver,2003-04-01 Democratic government is about making choices Sometimes those choices involve the distribution of benefits At other times they involve the imposition of some type of loss a program cut increased taxes or new regulatory standards Citizens will resist such impositions if they can or will try to punish governments at election time The dynamics of loss imposition are therefore a universal if unpleasant element of democratic governance The Government Taketh Away examines the repercussions of unpopular government decisions in Canada and the United States the two great democratic nations of North America Pal Weaver and their contributors compare the capacities of the U S presidential system and the Canadian Westminster system to impose different types of losses symbolic losses gun control and abortion geographically concentrated losses military base closings and nuclear waste disposal geographically dispersed losses cuts to pensions and to health care and losses imposed on business telecommunications deregulation and tobacco control Theory holds that Westminster style systems should all things being equal have a comparative advantage in loss imposition because they concentrate power and authority though this can make it easier to pin blame on politicians too The empirical findings of the cases in this book paint a more complex picture Westminster systems do appear to have some robust abilities to impose losses and US institutions provide more opportunities for loss avoiders to resist government policy in some sectors But in most sectors outcomes in the two countries are strikingly similar The Government Taketh Away is essential for the scholar and students of public policy or comparative policy It is also an important book for the average citizen who wants to know more about the complexities of living in a democratic society where the government can give but how it can also sometimes painfully taketh away

Review of the Army Non-Stockpile Chemical Materiel Disposal Program National Research Council,Division on Engineering and Physical Sciences,Commission on Engineering and Technical Systems,Board on Army Science and Technology,Committee on Review and Evaluation of the Army Non-Stockpile Chemical Materiel Disposal Program,2000-01-03 This study is a review and evaluation of the U S Army s Report to Congress on Alternative Approaches for the Treatment and Disposal of Chemical Agent Identification Sets CAIS CAIS are test kits that were used to train soldiers from 1928 to 1969 in defensive responses to a chemical attack They contain samples of chemicals that had been or might have been used by opponents as chemical warfare agents The Army s

baseline approach for treating and disposing of CAIS has been to develop a mobile treatment system called the Rapid Response System RRS which can be carried by several large over the road trailers *The Waste Crisis* Hans Y. Tammemagi, 1999-12-16 As populations continue to increase society produces more and more waste Yet it is becoming increasingly difficult to build new landfills and the existing landfills are causing significant environmental damage Finding solutions is not simple the problem is enormous in size vital in terms of its impact on the environment and complex in scope This book provides a vast look at solid waste management in North America and seeks solutions to the waste crisis It describes the magnitude and complexity of the problem focusing on municipal wastes and placing them in the perspective of other wastes such as hazardous biochemical and radioactive debris It describes the components of an integrated waste management program including recycling composting landfills and waste incinerators and it presents in detail the scientific and engineering principles underlying these technologies To illustrate both the problems and solutions of waste management programs the authors provide seven case histories among them the Fresh Kills Staten Island New York the East Carbon Landfill Utah and the Lancaster County Municipal Waste Incinerator Pennsylvania The Waste Crisis is unique in its attempt to analyze waste management in a broader societal context and to propose solutions based on basic principles And by doing so it encourages readers to challenge commonly held perceptions and to seek new and better ways of dealing with waste As such this book deserves a place on the bookshelf of anyone who deals with or feels the need to confront the growing problems of waste management *Effective Advocacy* Mary Alice Haddad, 2021-03-23 An examination of successful environmental advocacy strategies in East Asia that shows how advocacy can be effective under difficult conditions The countries of East Asia China Japan South Korea and Taiwan are home to some of the most active and effective environmental advocates in the world And the governments of these countries have adopted a range of innovative policies to fight pollution and climate change Japan leads the world in emissions standards China has become the world's largest producer of photovoltaic panels and Taiwan and Korea have undertaken major green initiatives In this book Mary Alice Haddad examines the advocacy strategies that persuaded citizens governments and businesses of these countries to change their behavior

Environmental Impact Assessment David P. Lawrence, 2003-11-24 This book challenges the prevailing assumption that Environmental Impact Assessment EIA should be structured around a unitary EIA process The book begins by identifying through a scenario eight recurrent problems in EIA practice The characteristics of multiple variations of conventional EIA processes at both the regulatory and applied levels are then presented The residual problems that remain after the conventional processes are described and assessed providing the springboard for a description and analysis of eight alternative EIA processes
