Beyond Certification:

Beyond Certification Scott Poynton, 2017-09-08 This book is free to download in PDF and EPub formats Is certification the solution Can it deliver urgently needed improvements to complex problems like deforestation and the exploitation of people In this controversial new book Scott Poynton founder of The Forest Trust makes a compelling case for a new approach to social and environmental problems that goes beyond certification Certification emerged from the 1992 Rio Earth Summit amidst great hope Since then despite a proliferation of certification schemes in twenty five industry sectors the destructive and irresponsible exploitation of natural and human resources has grown still worse Beyond Certification reviews the positive aspects of certification of which there are many but argues that we can no longer afford to gloss over its failures The book offers an alternative model VT TV based on Values Transparency Transformation and Verification which the author has been exploring and implementing with over 70 companies and industries around the world These companies are transforming the story of the raw materials they use wood palm oil pulp and paper stone charcoal soy beef sugar dairy rubber coffee cocoa and coconut Mining companies are also exploring this approach making decisions aligned with fundamental values and what they know to be right The results Trust is emerging as former combatants awake to the importance of working together Guns have been removed from forests land set aside for protection worker rights and conditions improved and long standing conflicts have been resolved as people confront their legacies Beyond Certification does not claim that this VT TV model is the only solution Rather it shows how new and seemingly radical thinking can catalyze positive change Included the limits of roundtable certification illustrated with real practical examples the intricacies of the change process how companies move from destructive to more responsible practices how to implement more holistic economically effective durable systems to better protect people and the environment [AWS Certified Developer Associate Certification and Beyond](#) Rajesh
