Beyond Monopoly Beyond Monopoly:

Beyond Stalinism Ronald J. Hill, 2014-05-01 First Published in 1992 The present collection of essays brings together the concepts of change and development by using the concept of evolution to explore various forms of change in the communist and post communist world The author s experience of living in the provinces of the Soviet Union later persuaded them of the inappropriateness of at least a rigid application of the concept of totalitarianism This title will also satiate the further interest of the interaction between capitalism or liberal democracy and communism particularly the impact of capitalism s technical innovations on some of communism s basic principles of rule

Transaction Cost Economics and Beyond John Groenewegen, 2012-12-06 This book contains the papers that were presented in 1994 at the conference Transaction Cost Economics and Beyond organized by GRASP at the Tinbergen Institute in Rotterdam. It is generally recognized that transaction cost economics (TCE) is at the heart of the new theory of the firm. It is a well established research program with a well developed theoretical framework and good results in empirical testing. However critics consider the approach too limited to understand the essential characteristics of such complex organizations like firms. Critics plea convincingly for the need to go beyond the original TCE framework and to develop a more pluralistic approach towards issues of economic organization. The new theory of the firm can only be further developed when scholars are willing to debate the issues in an open minded academic way. I thank the participants of the conference very much for putting so much effort in writing their papers and for their contribution to an open and stimulating discussion. It is my wish that this book contributes to the further development of the theory of the firm and that it helps us to a better understanding of the complexities of economic organization. I would like to thank the following organizations for their support: the Tinbergen Institute, the Vereniging Trust Fonds of the Erasmus University, the Faculty of Economics of the Erasmus University and GRASP Group for Research and Advice in Strategic management and Industrial Policy.
