Beyond Reasonable Drought Photographs Of A Changing Land And Its People:

Beyond Reasonable Drought, 2009 There has been nothing like it in living memory Theories about cycles and seasons struggle to explain it It is beyond reasonable drought Early this century a group of photographers crisscrossed the nation and captured a seismic shift in the way Australians were living their lives Caught in these photographer s lenses were the faces and the stories of communities caught in this shift People whose lives were being transformed as the rains over much of Australia s bread basket and beyond stopped falling regularly and the land altered These concerned photographers formed Many Australian Photographers MAP Group with the intention of showing us all the true state of the nation the resilience the ingenuity the despair and the hope of Australia as we leave the safety of history and head into an unknown future

Endurance Deb Anderson, 2014-11-05 Endurance presents stories of ordinary Australians grappling with extraordinary circumstances providing insight into their lives their experiences with drought and their perceptions of climate change The book opens with the physical impacts science politics and economics of drought and climate change in rural Australia It then highlights the cultural and historical dimensions taking us to the Mallee wheat belt where researcher Deb Anderson interviewed farm families from 2004 to 2007 as climate change awareness grew Each story is grouped into one of three themes Survival Uncertainty and Adaptation Illustrated with beautiful colour photographs from Museum Victoria Endurance will appeal to anyone with an interest in life stories rural Australia and the environment [The Earth as Transformed by Human Action](#) B. Meyer, 1993-01-29 The Earth as Transformed by Human Action is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere **Daily Graphic** Sam Clegg, 1992-08-10 **Southern**
