Haas, 1968 **Beyond the Nation-State** Ernst B. Haas, 2024-08-22 Of all of the books produced by Ernst B Haas during his career *Beyond the Nation State* contains the most complete and definitive statement of neofunctionalism the theory of transnational integration for which he is best known Focusing on the International Labor Organization ILO *Beyond the Nation State* was one of the first efforts to analyse systematically the dynamics and effects of a global international institution Regarded as a classic in comparative politics and international relations and among students of European integration this book enjoyed a renaissance with the end of the cold war reinvigorated European integration and resumed interest in communitarian theorising about forms of global governance which relied on a heightened role for international institutions and their associated policy communities First published in 1964 *Beyond the Nation State* was part of larger project described by others as neofunctionalism regional integration and soft constructivism which animated Haas throughout his career *Beyond the Nation State* continues to provide valuable guidelines for describing and understanding contemporary IR and is reissued with a new introduction by Peter M Haas John G Ruggie Philippe Schmitter and Antje Wiener placing this important work in a current context **Beyond the Nation-state; Functionalism and International Organization [by] Ernst B. decision making in international organizations and whether non state actors for example non governmental organizations and multinational corporations are influential The authors assess the new patterns of decision making to determine whether they are relatively open or closed privileged networks The organizations examined include the Council of Europe the United Nations the EU G8 the World Trade Organization International Maritime Organizations the World Health Organization and the OECD

The European Commission and the Integration of Europe Liesbet Hooghe, 2001 What kind of European Union do top Commission officials want Should the European Union be supranational or intergovernmental Should it promote market liberalism or regulated capitalism Should the Commission be Europe's government or its civil service This 2002 book examines top officials preferences on these questions through analysis of unique data from 137 interviews Understanding the forces that shape human preferences is the subject of intense debate Hooghe demonstrates that the Commission has difficulty shaping its employees preferences in the fluid multi institutional context of the European Union Top officials preferences are better explained by experiences outside rather than inside the Commission political party country and prior work leave deeper imprints than directorate general or cabinet Preferences are also influenced more by internalized values than by self interested career calculation Hooghe's findings are surprising and will challenge a number of common assumptions about the workings and motives of the European Commission

The Political Economy of Communications Kenneth Dyson,Peter Humphreys,2023-10-20 First published in 1990 The Political Economy of Communications explores the central theme of the relationship between politics and markets in policy development The contributors show how governments have been drawn into increasing interdependency by technological and market developments with international institutions like the European Community becoming more important in these policy areas They argue that neither government ideologies nor market and technological forces offer an adequate account of the processes of change in communications policy These conclusions lead to a critique of central theories of international political economy notably neo liberalism and the authors advocate instead a neo pluralist perspective for the study of political economy of communications an approach that takes institutions much more seriously as a central unit of analysis The book will be of interest to students of international relations European studies and media and telecommunication studies as well as to political scientists and economists concerned with public policy

Burges,2016-01-22 Latin America occupies an increasingly prominent position within the global political economic and cultural consciousness with intra regional governance structures and multilateral processes now a key topic of interest to foreign policy and

international business circles It has become abundantly clear that outside of Latin America there is a poor understanding of how the shifting sands of regional power are impacting not only on how regional countries fit into the global system but also on how intra regional relations are viewed and managed The contributions to this collection investigate these issues examining how changing global power dynamics are in turn impacting on national foreign policies and regional governance structures The book focuses first and foremost on the Latin American view outwards not the US or European view to the south This book was originally published as a special issue of the Journal of Iberian and Latin American Research
