Huff, 1969 [How to Lie with Statistics](#) Cooltura Cooltura, 2025-09-24 According to the author himself Darrell Huff his objective in writing *How to Lie with Statistics* was to offer a manual so that anyone could detect well disguised deceptions Bill Gates himself recommended this book a few years ago In this case the reader will find a detailed synthesis to discover the tricks with which the media politicians and advertising try to deceive us every day by manipulating figures and graphs especially useful in times of pandemic *SUMMARY - How To Lie With Statistics By Darrell Huff* Shortcut Edition, 2021-06-01 Our summary is short simple and pragmatic It allows you to have the essential ideas of a big book in less than 30 minutes By reading this summary you will learn how to defend yourself against the misused statistics that litter our daily lives You will also learn the importance of statistical samples to be wary of missing data how to identify misleading graphs how to manipulate statistical jargon to your advantage what questions to ask yourself to avoid falling into the trap set by certain statistics Statistics are very useful but they can be misused to sell a product convince voters or attract attention For example a local newspaper with its focus on crime may make its readers believe that they live in a dangerous place and a study explaining that after ingesting a certain medication colds tend to disappear may make people buy a product that is as effective as no treatment at all Statistics have the devious advantage of appearing factual which is what makes them attractive but in the mouth of a dishonest person they can fool even the most discerning readers This book serves not as an instruction manual for crooks but as a self defense manual for their potential victims honest people Buy now the summary of this book for the modest price of a cup of coffee [How to Lie with Statistics](#) Darrell Huff, 2023-03-30 A great introduction to a crucial topic Bill Gates Perhaps the most popular book on statistics ever published It's a marvel gave me a peek behind the curtain of statistical manipulation showing me how the swindling was done so that I would not be fooled again Tim Harford In 1954 Darrell Huff decided enough was enough Fed up with politicians advertisers and journalists using statistics to sensationalise inflate confuse oversimplify and on occasion downright lie he decided to shed light on their ill informed and sneaky ways *How to Lie with Statistics* is the result the definitive and hilarious primer in the ways statistics are used to deceive With over one and half million copies sold around the world it has delighted generations of readers with its cheeky takes on the ins and outs of samples averages errors graphs and indexes And in the modern world of
