It's the Economy, Stupid Christos A Djonis,2018-05-17 Since the end of World War II most people around the world regarded the United States as the land of opportunity The baby boomers and Generation X knew it best as the land of milk and honey It was a place where

people could easily raise a family and with hard work could achieve anything they set their mind to The American Dream a dream of a land where life is better richer and fuller for everyone was alive Much has changed though in the past four decades Most Americans today do not realize that since the early 1990s when the world markets began to merge and globalization took place America went through a significant transformation Today the America of yesterday a place where children grew up to ultimately earn more than their parents is no longer reality but in most cases just wishful thinking In today's globalized world working in America no longer feels any different than earning a living in Europe or Japan Indeed income levels and employment opportunities now appear to be similar Are they though Do Americans still have the edge or has the American Dream finally slipped away Is it possible to conceive that American workers could be disadvantaged when compared to those living and working in other countries While most people live their everyday lives never knowing one thing is clear Recently political catchphrases such as Make America Great Again deeply resonated with frustrated Americans on both sides of the political divide more so than election pollsters and the media anticipated during the 2016 presidential election Undoubtedly anxiety about the future is in the air but what causes it Can the past be restored One thing is certain Americans cannot afford to remain complacent with the status quo Visit the author's webpage [HERE](#) **Teaching**

oversight As it explores this new capitalism s impact on society politics business and technology it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization Most critically it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves
