Clinical Hematology: Principles, Applications, and Molecular Concepts Mary Louise Turgeon, 2025-03-05 Clinical Hematology features strong pedagogy that sets the quality benchmark for hematology competency based content needed by MLT and MLS students and is informed by and mapped to ASCLS Entry Level and Professional Body of Knowledge competencies in hematology hemostasis and coagulation and molecular applications Occupational Exposure to Diacetyl and 2,3-pentanedione Lauralynn Taylor McKernan, 2016 Diacetyl and its substitute 2 3 pentanedione are widely used as flavoring compounds The National Institute for Occupational Safety and Health NIOSH objective in establishing recommended exposure limits RELs for diacetyl and 2 3 pentanedione is to reduce the risk of respiratory impairment decreased lung function and the severe irreversible lung disease obliterative bronchiolitis associated with occupational exposure In this Criteria Document NIOSH reviews the scientific literature concerning potential health effects toxicology and risk assessment pertaining to diacetyl and 2 3 pentanedione Recommendations are provided on engineering controls work practices and personal protective equipment to prevent and control workplace exposures to diacetyl and 2 3 pentanedione NIOSH website Implementing a Comprehensive Research Compliance Program Aurali Dade, Lori Olafson, Suzan M. DiBella, 2015-07-01 The senior research compliance administrator has emerged as a critically important position as universities and other research organizations face an increasingly intricate regulatory environment These administrators are tasked with a special challenge ensuring that their institutions conduct safe ethical and compliant research while also helping researchers understand and meet compliance requirements and achieve their research goals These competing responsibilities can make the role of the research administrator complex however those who serve in this role may find that they have limited preparation for the challenges and little or no formal education in the field Thus the goal of this handbook is to provide practical guidance to research administrators who are responsible for a wide variety of compliance programs

Previous volumes on these topics have focused primarily on educating research faculty staff and students. An assumption in many of these handbooks is that all additional questions related to research ethics and regulations should be directed to the senior research administrator yet the books have limited guidance intended for the senior research administrators themselves. This handbook is designed therefore to serve as a detailed program implementation manual for these administrators who are expected to be conversant on a broad range of complex ethical and regulatory topics and to provide guidance to those conducting research as well as upper administration and others interested in safe ethical and compliant research.

Laboratory Safety for Chemistry Students Robert H. Hill, Jr., David C. Finster, 2016-05-02 Provides knowledge and models of good practice needed by students to work safely in the laboratory as they progress through four years of undergraduate laboratory work. Aligns with the revised safety instruction requirements from the ACS Committee on Professional Training 2015 Guidelines and Evaluation Procedures for Bachelor's Degree Programs. Provides a systematic approach to incorporating safety and health into the chemistry curriculum. Topics are divided into layers of progressively more advanced and appropriate safety issues so that some topics are covered 2-3 times at increasing levels of depth. Develops a strong safety ethic by continuous reinforcement of safety to recognize, assess, and

manage laboratory hazards and to plan for response to laboratory emergencies Covers a thorough exposure to chemical health and safety so that students will have the proper education and training when they enter the workforce or graduate school
