Data Co Ltd and China Xiongan Group Digital City Science and Technology Co The theme of this conference is Scientific and Technological Information Resource Management and Service in the Age of Digital Intelligence and it is intended to invite famous experts and scholars in related fields to make special reports and select outstanding authors to make sub forum reports to discuss hot topics such as intelligent technology of scientific and technological intelligence scenario based application of intelligence service market based development of data elements and eco construction of intelligence partners We are looking forward to discussing hot topics such as intelligent technology of scientific and technological intelligence scenario based application of intelligence services market oriented development of data elements and ecological construction of intelligence partners We warmly welcome people from all walks of life who are engaged in related fields to participate in the conference and exchange ideas

How To Read And Critique A Scientific Research Article: Notes To Guide Students Reading Primary Literature (With Teaching Tips For Faculty Members) Foong May Yeong,2014-01-16 Given the explosion of information and knowledge in the field of Life Sciences adapting primary literature as materials in course work as part of active learning seems to be more effective in improving scientific literacy among science undergraduates than the pure transmission of content knowledge using traditional textbooks In addition students also read research articles as part of undertaking laboratory research projects useful for preparing them for graduate school As such a good grasp of reading and analytical skills is needed for students to understand how their research project contributes to the field that they are working in Such skills are being taught at UK and USA universities In Asia this approach in teaching has not yet been as widespread although similar ideas are beginning to be used in education Written as a quick guide for undergraduate students and faculty members dealing with scientific research articles as part of a module or research project this book will be useful especially in Asia for students and faculty members as the universities look to incorporating the use of scientific research articles in their undergraduate teaching For Life Science students the first time they encounter a primary literature can be rather daunting though with proper guidance they can overcome the initial difficulties and become confident in dealing with scientific articles This guidebook provides a structured approach to reading a research article guiding the reader step by step through each section with tips on how to look out for key points and how to evaluate each section Overall by helping undergraduate students to overcome their anxieties in reading scientific literature the book will enable the students to appreciate better the process of scientific investigations and how knowledge is derived in science
