The Voyage of the Beagle Charles Darwin, 2008-12-01 English scientist naturalist and geologist CHARLES DARWIN 1809 1882 transformed our understanding of the planet and our place on it with his theory of evolution through natural selection Much of the basis for his conceptual breakthrough was his research during the five year journey he undertook on the HMS Beagle an English exploratory vessel which sailed South America and the South Pacific from 1831 to 1836 First published in 1839 under the title Journal and Remarks this replica volume reproduces the 1845 second edition originally called Journal of Researches Enthralling both as a tale of travel adventure and as a naturalist s diary The Voyage of the Beagle is even more fascinating for the hints it offers from decades prior to Darwin s publication of 1859 s On the Origin of Species of the observations of the natural world and the thought processes that followed that would combine to revolutionize the field of biology

The Voyage of the Beagle Charles Darwin,2021-04-07 The Voyage of the Beagle by Charles Darwin As important as The Voyage of the Beagle is to the information of the genesis of Darwin s idea of evolution and of an appreciation of his personal struggle for self discovery the book s maximum considerable thing is the insight it provides into the Victorian mind Darwin shared many characteristics with other Victorian intellectuals of his era amongst them Thomas Carlyle John Stuart Mill John Henry Newman and Alfred Lord Tennyson Principally this generation of the 1830 s turned into prompted via a conviction of personal future and a sense of being at the beginning of a new era in which the old approaches of viewing subjects would not practice With the exception of Newman they all got here to include a concept of development both spiritual or social Darwin observed in nature a reason to claim that there was biological progress Indeed he furnished Tennyson as an example with metaphoric proof in his idea of herbar selection of the poet s very own idea of ethical evolution The Voyage of the Beagle displays the mixture of zest for adventure and a sense of challenge that identifies Darwin truly along with his age and era One of the most salient factors of nature which Darwin confronted with unceasing honesty in particular in the Gal pagos Islands was that of cruelty About twenty years after the go back of the Beagle he wrote What a book a devil s chaplain may write on the clumsy wasteful blundering low and horribly merciless works of nature In an experience it is the other facet of the coin of natural choice If Darwin s idea of evolution pointed to the fashionable development of a species it additionally revealed the indifference of nature to people in the species It is exactly Darwin s openness to nature that allowed him to understand this duality and it was his clinical honesty which necessitated his acceptance of his remark that supported the final development of his concept Both of these attributes are already pondered in Darwin s first book The Voyage of the Beagle **The Voyage of the Beagle - a Naturalist's Voyage Round the World** Charles Darwin,2009-03-01 The Voyage of the Beagle is a title commonly given to the book written by Charles Darwin published in 1839 as his Journal and Remarks which brought him considerable fame and respect The title refers to the second survey expedition of the ship HMS Beagle which set sail from Plymouth Sound on 27 December 1831 under the

command of captain Robert FitzRoy While the expedition was originally planned to last two years it lasted almost five the Beagle did not return until 2 October 1836 Darwin spent most of this time exploring on land three years and three months on land 18 months at sea

The Voyage of the Beagle Charles Darwin,2016-09-10 The offer of a position on the Beagle which Charles received on August 30 1831 came through his advisor Henslow at Cambridge Henslow himself had been invited to be the naturalist for the ship but had turned down the opportunity The voyage had been commissioned by the government to map the coast of South America and was being captained by Robert FitzRoy a 26 year old gentleman who had led a ship to South America the year before FitzRoy was eager to have the companionship of someone who unlike the sailors and officers of the ship was of his social class A gentleman naturalist would fit the bill perfectly providing companionship while increasing the usefulness and prestige of the voyage Most well established naturalists like Henslow had proven to be busy or disinclined so the job had fallen to the promising but inexperienced Charles Darwin
