correlates directly to Kardong's Vertebrates Comparative Anatomy Function Evolution text. This lab manual carefully guides students through dissections and is richly illustrated. First and foremost, the basic animal architecture is presented in a clear and concise manner. Throughout the dissections, the authors pause strategically to bring the students' attention to the significance of the material they have just covered.

DNA Technology I. Edward Alcamo, 2000-04-26. DNA Technology Second Edition is a survey of biotechnology written to enlighten readers about the breakthroughs made possible by the science and technologies associated with current DNA research. Ed Alcamo gives the educated layperson a survey of DNA by presenting a brief history of genetics, a clear outline of techniques that are in use, and indications of breakthroughs in cloning and other DNA advances. Appropriate for a wide range of courses for non-biology majors, including a DNA for Lawyers course or allied health and nursing courses. After reading this book, individuals will feel more confident in their ability to understand contemporary newspaper and magazine articles referring to DNA technology and human genetics. Business people will make more confident decisions in their dealings with biotechnology issues. Lawyers and jurists will have a better appreciation of DNA fingerprinting. Persons with genetic disease will have a clearer understanding of their afflictions and understand the bases for possible cures. Agriculturists will have insight into the genetic basis for gene-altered plants and animals. And the general public will better appreciate the nature and reasons for the Human Genome Project now in progress.
