

WHAT WE LEAVE BEHIND

by the author of *Endgame*

DERRICK JENSEN
AND ARIC MCBAY

"This is a fierce book. . . . Its basic premise—that we're in worse trouble than we understand, and that a little change around the edges won't help—is precisely the message that needs to get out."

—Bill McKibben

What We Leave Behind By Derrick Jensen:

What We Leave Behind Derrick Jensen, Aric McBay, 2011-01-04 *What We Leave Behind* is a piercing impassioned guide to living a truly responsible life on earth. Human waste once considered a gift to the soil has become toxic material that has broken the essential cycle of decay and regeneration. Here award winning author Derrick Jensen and activist Aric McBay weave historical analysis and devastatingly beautiful prose to remind us that life human and nonhuman will not go on unless we do everything we can to facilitate the most basic process on earth the root of sustainability one being's waste must always become another being's food. *The Derrick Jensen Reader* Derrick Jensen, 2012-07-03 In an age marked by seemingly unstoppable environmental collapse and the urgent quest for solutions environmental philosopher Derrick Jensen the voice of the growing deep ecology movement reveals for us new seeds of hope. Here for the first time in *The Derrick Jensen Reader* are collected generous selections from his prescient unflinching books on the problem of civilization and the path to true resistance. In the acclaimed *A Language Older Than Words* Jensen dissects his own abusive childhood to examine the pathology of Western culture and shares with us the power and beauty of an alliance with the natural world. He continues to use the lens of his own experience as well as the wisdom of philosophers activists and teachers to expose oppression and call us to action in his other early works *Listening to the Land* *A Culture of Make Believe* *Strangely Like War* and *Walking on Water*. We see his analysis deepen when he asks us to accept that the only moral response to biocide is resistance in the two volume *Endgame* a truth he explores further in *Thought to Exist in the Wild*. *What We Leave Behind* the graphic novel *As The World Burns* and in his two novels *Songs of the Dead* and *Lives Less Valuable*. And in *Dreams* Jensen's latest work he leads us still further toward his vision for a healed planet freeing us to see beyond the limits of our present culture to a future luminous with meaning. **Tangled Roots** Matt Soltys, 2012 *Dreams* Derrick Jensen, 2011-01-04 Jensen's furthest reaching book yet *Dreams* challenges the destructive nihilism of writers like Richard Dawkins and Sam Harris who believe that there is no reality outside what can be measured using the tools of science. He introduces the mythologies of ancient cultures and modern indigenous peoples as evidence of alternative ways of understanding reality informed by thinkers such as American Indian writer Jack Forbes theologian and American Indian rights activist Vine Deloria Shaman Martin Prechtel Dakota activist and scholar Waziyatawin and Okanagan Indian writer Jeannette Armstrong. He draws on the wisdom of Dr Paul Stamets author of *Mycelium Running How Mushrooms Can Help Save the World* sociologist Stanley Aronowitz who discusses science's lack of accountability to the earth and many more. As in his other books Jensen draws heavily from his own life experience living alongside the frogs redwoods snails birds and bears of the upper northwest about which he writes with exquisite tenderness. Having taken on the daunting task of understanding one's dreams as a source of knowledge Jensen achieves the near impossible in this breathtakingly brave and ambitious new work. **Capitalism in the Anthropocene** John Bellamy Foster, 2022-08-23 Over the last 11 700 years during which human civilization developed the earth has existed

within what geologists refer to as the Holocene Epoch Now science is telling us that the Holocene Epoch in the geological time scale ended replaced by the onset of a new more dangerous Anthropocene Epoch which began around 1950 The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System marking a changed reality in which human activities are now the main geological force impacting the earth as a whole generating at the same time an existential crisis for the world's population What caused this massive shift in the history of the earth In this comprehensive study John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest The result is a planetary emergency that threatens all present and future generations throwing into question the continuation of civilization and ultimately the very survival of humanity itself Only by addressing the social aspects of the current planetary emergency exploring the theoretical historical and practical dimensions of the capitalism's alteration of the planetary environment is it possible to develop the ecological and social resources for a new journey of hope

Political Spirituality in the Face of Climate Collapse James W. Perkinson, 2024-07-08 This book takes its motive force from our contemporary climate crisis It seeks to reorient human and especially Christian understanding towards a more ecologically focused indigenously informed way of living James W Perkinson argues that our current eco climatic and socio political emergency is the culmination of a 5 000 year history of supremacist settlement in which city states first emergent in Mesopotamia and Egypt not only begin coercively organizing labor into surplus production and ecosystems into inordinate and destructive yields of goods but in the process also simultaneously deform the Spirit World haloing of natural phenomenon into outsized service of imperial reach Perkinson recognizes globalized humanity as an emerging monstrosity destroying both human culture and the world How we re envision and revalue at our critical juncture our inescapable interdependence with the more than human world as peer and teacher and even elder is the central theme that throbs below the surface of the very disparate topics commanding attention in each chapter

The Ecological Rift John Bellamy Foster, Brett Clark, Richard York, 2011-11-01 Humanity in the twenty first century is facing what might be described as its ultimate environmental catastrophe the destruction of the climate that has nurtured human civilization and with it the basis of life on earth as we know it All ecosystems on the planet are now in decline Enormous rifts have been driven through the delicate fabric of the biosphere The economy and the earth are headed for a fateful collision if we don't alter course In *The Ecological Rift Capitalism's War on the Earth* environmental sociologists John Bellamy Foster Brett Clark and Richard York offer a radical assessment of both the problem and the solution They argue that the source of our ecological crisis lies in the paradox of wealth in capitalist society which expands individual riches at the expense of public wealth including the wealth of nature In the process a huge ecological rift is driven between human beings and nature undermining the conditions of sustainable existence a rift in the metabolic relation between humanity and nature that is irreparable within capitalist society since integral to its very laws of motion Critically examining the sanguine arguments of mainstream economists and

technologists Foster Clark and York insist instead that fundamental changes in social relations must occur if the ecological and social problems presently facing us are to be transcended Their analysis relies on the development of a deep dialectical naturalism concerned with issues of ecology and evolution and their interaction with the economy Importantly they offer reasons for revolutionary hope in moving beyond the regime of capital and toward a society of sustainable human development

And Social Justice for All Lisa Van Engen, 2019-02-26 Equips parents to inspire kids to take on social injustice at any age With the constant barrage of difficult stories through news and social media today's kids are increasingly aware of the real problems real people confront every day And they're quicker than ever to come to parents and other trusted adults to ask how they can help or why they're not already doing so And Social Justice for All equips Christian families to tackle social justice issues together It inspires them to bring light and love to a dark and scary world Educator and mom Lisa Van Engen creates innovative resources to engage kids in understanding and responding to fourteen justice issues such as clean water creation care immigration and refugees hunger race and poverty After placing each issue in kid friendly context she offers interactive features High interest conversation starters for each age group to challenge thinking and assumptions A family devotional to anchor each social justice issue in God's Word Engaging age tiered activities for reading playing observing creating connecting and experimenting in God's world Tips and internet links to extend awareness and invest resources in social justice Throughout each chapter children speak their own thoughts about injustice and what they think God is calling them to do By looking at both the roots of injustice and what Christians can do right now to help And Social Justice for All empowers both adults and children to encounter a broken world with insight and empathy Simple yet powerful it lights the path for families to make a real God directed difference together

What Every Environmentalist Needs to Know About Capitalism Fred Magdoff, John Bellamy Foster, 2011-06-01 There is a growing consensus that the planet is heading toward environmental catastrophe climate change ocean acidification ozone depletion global freshwater use loss of biodiversity and chemical pollution all threaten our future unless we act What is less clear is how humanity should respond The contemporary environmental movement is the site of many competing plans and prescriptions and composed of a diverse set of actors from militant activists to corporate chief executives This short readable book is a sharply argued manifesto for those environmentalists who reject schemes of green capitalism or piecemeal reform Environmental and economic scholars Magdoff and Foster contend that the struggle to reverse ecological degradation requires a firm grasp of economic reality Going further they argue that efforts to reform capitalism along environmental lines or rely solely on new technology to avert catastrophe misses the point The main cause of the looming environmental disaster is the driving logic of the system itself and those in power no matter how green are incapable of making the changes that are necessary *What Every Environmentalist Needs To Know about Capitalism* tackles the two largest issues of our time the ecological crisis and the faltering capitalist economy in a way that is thorough accessible and sure to provoke debate in the environmental movement

This is Environmental Ethics: An Introduction Wendy Lynne Lee, 2022-07-18 Provides students and scholars with a comprehensive introduction to the growing field of environmental philosophy and ethics Mitigating the effects of climate change will require global cooperation and lasting commitment Of the many disciplines addressing the ecological crisis philosophy is perhaps best suited to develop the conceptual foundations of a viable and sustainable environmental ethic This is Environmental Ethics provides an expansive overview of the key theories underpinning contemporary discussions of our moral responsibilities to non human nature and living creatures Adopting a critical approach author Wendy Lynne Lee closely examines major moral theories to discern which ethic provides the compass needed to navigate the social political and economic challenges of potentially catastrophic environmental transformation not only but especially the climate crisis Lee argues that the ethic ultimately adopted must make the welfare of non human animals and plant life a priority in our moral decision making recognizing that ecological conditions form the existential conditions of all life on the planet Throughout the text detailed yet accessible chapters demonstrate why philosophy is relevant and useful in the face of an uncertain environmental future Questions which environmental theory might best address the environmental challenges of climate change and the potential for recurring pandemic Discusses how inequalities of race sex gender economic status geography and species impact our understanding of environmental dilemmas Explores the role of moral principles in making decisions to resolve real world dilemmas Incorporates extensive critiques of moral extensionist and ecocentric arguments Introduces cutting edge work done by radical deep green writers animal rights theorists eco phenomenologists and ecofeminists This is Environmental Ethics is essential reading for undergraduate students in courses on philosophy geography environmental studies feminist theory ecology human and animal rights and social justice as well as an excellent graduate level introduction to the key theories and thinkers of environmental philosophy

Anarcho-primitivism , **Deep Green Resistance** Derrick Jensen, Aric McBay, Lierre Keith, 2011-01-04 For years Derrick Jensen has asked his audiences Do you think this culture will undergo a voluntary transformation to a sane and sustainable way of life No one ever says yes Deep Green Resistance starts where the environmental movement leaves off industrial civilization is incompatible with life Technology can t fix it and shopping no matter how green won t stop it To save

this planet we need a serious resistance movement that can bring down the industrial economy Deep Green Resistance evaluates strategic options for resistance from nonviolence to guerrilla warfare and the conditions required for those options to be successful It provides an exploration of organizational structures recruitment security and target selection for both aboveground and underground action Deep Green Resistance also discusses a culture of resistance and the crucial support role that it can play Deep Green Resistance is a plan of action for anyone determined to fight for this planet and win

Earth at Risk Derrick Jensen, Lierre Keith, 2012-08-01 In America four hundred people own the wealth of more than half of the American population We should not be saying tax the rich but instead we should be saying take their money and redistribute it take their property and redistribute it Arundhati Roy Industrial civilization is devouring the planet and the future The oceans are acidifying whole mountains have been laid to waste and the climate is teetering into chaos Every biome is approaching collapse And fifty years of environmentalism hasn't even slowed the rate of destruction Yet environmentalists are not considering strategies that might actually prevent the looming biocide we are facing Until Earth at Risk Earth at Risk Building a Resistance Movement to Save the Planet is an annual conference featuring environmental thinkers and activists who are willing to ask the hardest questions about the seriousness of our situation The conference is convened by Derrick Jensen acclaimed author of Endgame who has argued that we need a resistance movement against civilization itself The twelve people in this volume present an impassioned critique of the dominant culture from every angle William Catton Jr explains ecological overshoot Thomas Linzey gives a fiery call for community sovereignty Jane Caputi exposes patriarchy's mythic dismemberment of the Goddess Aric McBay discusses historically effective resistance strategies and Stephanie McMillan takes down capitalism One by one they build an unassailable case that we need to deprive the rich of their ability to steal from the poor and the powerful of their ability to destroy the planet These speakers offer their ideas on what can be done to build a real resistance movement one that includes all levels of direct action action that can actually match the scale of the problem Earth at Risk includes Derrick Jensen author of Endgame A Language Older than Words and many others Lierre Keith author of The Vegetarian Myth Food Justice and Sustainability coauthor of Deep Green Resistance Strategy to Save the Planet Nora Barrows Friedman journalist and photographer correspondent for outlets such as The Electronic Intifada Al Jazeera and Truthout.org Jane Caputi author of The Age of Sex Crime Gossips Gorgons and Crones The Fates of the Earth and Goddesses and Monsters Women Myth Power and Popular Culture William Catton Jr sociologist author of Overshoot The Ecological Basis of Revolutionary Change and Bottleneck Humanity's Impending Impasse Gail Dines a founding member of Stop Porn Culture author of Pornland How Porn Has Hijacked Our Sexuality Thomas Linzey executive director of the Community Environmental Legal Defense Fund Aric McBay coauthor of Deep Green Resistance Strategy to Save the Planet Stephanie McMillan cartoonist author of The Beginning of the American Fall organizer for the anti capitalist anti imperialist collective One Struggle Riki Ott marine biologist author of Not One Drop Betrayal and Courage in the Wake

Maritime Heritage in Crisis Richard M. Hutchings, 2016-12-08 Maritime heritage landscapes are undergoing a period of unprecedented crisis severely impacted by coastal development population growth and climate change Presenting archaeology and CRM as a grave threat this volume offers an important lesson on the relationship between neoliberal heritage regimes and global ecological breakdown

The Environmental Humanities Robert S. Emmett, David E. Nye, 2017-10-06 A concise overview of this multidisciplinary field presenting key concepts central issues and current research along with concrete examples and case studies The emergence of the environmental humanities as an academic discipline early in the twenty first century reflects the growing conviction that environmental problems cannot be solved by science and technology alone This book offers a concise overview of this new multidisciplinary field presenting concepts issues current research concrete examples and case studies Robert Emmett and David Nye show how humanists by offering constructive knowledge as well as negative critique can improve our understanding of such environmental problems as global warming species extinction and over consumption of the earth's resources They trace the genealogy of environmental humanities from European Australian and American initiatives also showing its cross pollination by postcolonial and feminist theories Emmett and Nye consider a concept of place not synonymous with localism the risks of ecotourism and the cultivation of wild areas They discuss the decoupling of energy use and progress and point to OECD countries for examples of sustainable development They explain the potential for science to do both good and harm examine dark visions of planetary collapse and describe more positive possibilities alternative practices including localization and degrowth Finally they examine the theoretical impact of new materialism feminism postcolonial criticism animal studies and queer ecology on the environmental humanities

Natural Resources and Sustainability Daniel E. Vasey, Sarah E. Fredericks, Lei Shen, Shirley Thompson, 2011-12-08 *Natural Resources and Sustainability* explores how human needs and desires from sustenance and shelter to recreation and travel have spurred the consumption of Earth's material resources Scientists ecologists and other expert authors present the

historical impact of commercial activities in industries as varied as fisheries agriculture energy and mineral extraction discuss the global distribution and use of renewable and nonrenewable resources and focus on innovative approaches for the future Readers will learn why renewal doesn't necessarily put a resource beyond harm and why the no free lunch adage applies to all natural resources *Denying the Source* Merrell-Ann S. Phare, 2011-02-15 Provocative passionate and populist RMB Manifestos are short and concise non-fiction books of literary critical and cultural studies First Nations are facing some of the worst water crises in Canada and throughout North America Their widespread lack of access to safe drinking water receives ongoing national media attention and yet progress addressing the causes of the problem is painfully slow First Nations have had little say in how their waters are or are not protected They have been excluded from many important decisions as provinces operate under the view that they own the water resources within provincial boundaries and the federal government takes a hands-off approach The demands for access to waters that First Nations depend upon are intense and growing Oil and gas mining ranching farming and hydro development all require enormous quantities of water and each brings its own set of negative impacts to the rivers lakes and groundwater sources that are critical to First Nations Climate change threatens to make matters even worse Over the last 30 years the courts have clarified that First Nations have numerous rights to land and resources including the right to be involved in decision making This book is a call to respect the water rights of First Nations and through this create a new water ethic in Canada and beyond *Shadowing the Anthropocene: Eco-Realism for Turbulent Times* Adrian Ivakhiv, 2018 A spectre is haunting humanity the spectre of a reality that will outwit and in the end bury us The Anthropocene or The Human Era is an attempt to name our geological fate that we will one day disappear into the layer cake of Earth's geology while highlighting humanity in the starring role of today's Earthly drama In *Shadowing the Anthropocene* Adrian Ivakhiv proposes an ecological realism that takes as its starting point humanity's eventual demise The only question for a realist today he suggests is what to do now and what quality of compost to leave behind with our burial The book engages with the challenges of the Anthropocene and with a series of philosophical efforts to address them including those of Slavoj Žižek and Charles Taylor Graham Harman and Timothy Morton Isabelle Stengers and Bruno Latour and William Connolly and Jane Bennett Along the way there are volcanic eruptions and revolutions ant cities and dog parks data clouds and space junk pagan gods and sacrificial altars dark flow souls of things and jazz Ivakhiv draws from centuries-old process relational thinking that harkens back to Daoist and Buddhist sages but gains incisive reinvigoration in the philosophies of Charles Sanders Peirce and Alfred North Whitehead He translates those insights into practices of engaged Anthropocenic bodymindfulness aesthetic ethical and ecological practices for living in the shadow of the Anthropocene
