Cowie,1978 Hare Simon Carnell,2010-04-01 Once described as the fastest hairiest most lascivious and most melancholy of mammals the hare was also believed to never close its eyes occasionally grow horns and have the ability to change its sex More than just a speedy but lazy character in popular children's fables the hare is remarkable for its actual behavior and the intriguing myths that have developed around it Here Simon Carnell examines how this animal has been described symbolized visually depicted and sought for its fur flesh and exceptional speed Carnell tracks the hare from ancient Egypt where a hieroglyph of a hare stood for the concept of existence itself to Crucifixion scenes Buddhist lore and Algonquin creation myths to the serial works of Joseph Beuys and even to an art installation in a Dutch brothel The hare shows up in both surprising and expected places it was the principal subject of the first hunting treatise it appears in the first signed and dated picture of a single animal and it was credited in early medicine with the most curative properties of any animal Combining recent natural history with an extensive and richly illustrated focus on visual art Hare is highly accessible and packed with details about a historically fascinating animal **The Way of the Hare** Marianne Taylor,2017-06-15 An exploration of the relationship between humans and the charismatic and elusive hare To the people of rural Britain hares are deeply beloved perhaps above all other animals They thrive in abundance in imagery but can be maddeningly elusive in reality In our stories ancient and modern they are magical uncanny and illogical beings which commune with the moon vanish at will and lose their minds when spring arrives Yet despite the breadth and depth of its legends the brown hare of the lowlands is a relative newcomer to our islands and our real ancient hare is the mountain hare of the most unforgiving high mountainsides Hares of myth have godly powers but real earthbound hares walk a dangerous line they are small animals with many predators but have no burrow or tunnel to shelter them from danger They survive by a combination of two skills honed to unimaginable extremes hiding in plain sight and running faster than anything and anyone The need to excel as hiders and runners ultimately directs every aspect of hare biology and behaviour as well as inspiring our own wild ideas about hare kind This book explores hares as they are and as we imagine them and the long and often bloody history of our association with these enigmatic animals Elegant studies of molecular biology and biomechanical physics help us understand how hares are put together while centuries of game estate records reveal how humans have commodified and exploited them But it is ultimately

the moments spent in the company of wild hares that allow us to bring together myth and reality to celebrate the magic of the living animal
