Unique Alison Allen-Gray, 2004 When Dominic discovers he had an older brother who died before he was born he realizes the reason why he is such a disappointment to his father His brother was a brilliant academic and promising scientist but Dominic prefers to spend his time painting Dominic heads for Cambridge to find out more about his brother and discovers much more than he ever bargained for after his brother's death his father had him cloned and the result was Dominic How can Dominic ever live with this mindblowing discovery If the truth is ever made public it could put people's lives in danger including his own BLTackles this very current issue of cloning in a way that makes readers realize the human consequences of scientific advances Engineering the Human Bert Jaap Koops, Christoph H. Lüthy, Annemiek Nelis, Carla Sieburgh, J.P.M. Jansen, Monika S. Schmid, 2013-02-12

The volume is a collection of articles treating the topic of human improvement/enhancement from a variety of perspectives philosophical literary medical genetic sociological legal etc The chapters in this volume treat not only those aspects that most immediately come to mind when one thinks of human enhancement such as genetic engineering cloning artificial implants and artificial intelligence etc Somewhat less obvious aspects include evolutionary perspectives in connection with the prolongation of the human lifespan plastic surgery since its beginnings and questions such as whether the distinction between natural and artificial can really be drawn at all and how it has been conceived across the ages or what the legal implications are of recent developments and techniques Many papers make links to the representation of these developments in popular culture from Jules Verne through Aldous Huxley to the movie Gattaca address the hopes and fears that come with them as well as the question how realistic these are While all chapters are written by scientists at the international top of their respective fields all are accessible to a non-specialist audience and eminently readable We believe that they represent a state of the art overview of questions that are of interest to a large audience The book thus targets a non-specialist audience with an interest in philosophical sociological scientific and legal issues involved in both traditional and recent matters concerning the desire of mankind to improve itself the human body the human mind and the human condition It is unique in that it brings together all these aspects within a coherent and cohesive collection

Representations of Technology in Science Fiction for Young People Noga Applebaum,2009-09-10 In this new book Noga Applebaum surveys science fiction novels published for children and young adults from 1980 to the present exposing the anti technological bias existing within a genre often associated with the celebration of technology Applebaum argues that perceptions of technology as a corrupting force particularly in relation to its use by young people are a manifestation of the enduring allure of the myth of childhood innocence and result in young adult fiction that endorses a technophobic agenda This agenda is a form of resistance to the changing face of childhood and technology s contribution to this change Further Applebaum contends that technophobic literature disempowers its young readers by implying that the technologies of the future are inherently dangerous while it neglects to acknowledge children s complex yet pleasurable interactions with technology today The study looks at works by well known authors including M T Anderson Monica Hughes Lois Lowry Garth Nix and Philip Reeve and explores topics such as ecology cloning the impact of technology on narrative structure and the adult child hierarchy While focusing on the popular genre of science fiction as a useful case study Applebaum demonstrates that negative attitudes toward technology exist within children s literature in general making the book of considerable interest to scholars of both science fiction and children s literature
