Approaches to Global Governance Theory Martin Hewson, Timothy J. Sinclair, 1999-08-26 As the debate over global governance heats up *Approaches to Global Governance Theory* offers a guide to this new terrain The contributors advocate approaches to global governance that recognize fundamental political economic technological and cultural dynamics that engage social and political theory and that go beyond conventional international relations theory We are offered here a guide to this new terrain Beginning with a chapter tracing the emergence of global governance analysis in the 1990s *Approaches to Global Governance Theory* also responds to alternative theoretical conceptions James N Rosenau explores the ontology of global governance In addition Robert Latham develops a critique of Rosenau's thinking while Michael G Schechter examines the limits of the Commission for Global Governance's widely publicized 1995 report and Ronen Palan asks critically Who is to be governed by global governance Other chapters develop analyses of global governance phenomena Technological change is addressed by Karen T Litfin on environmental satellites and Edward A Comor on broadcast satellites M Mark Amen examines developments in credit and shifts in political identity are mapped by Yale H Ferguson and Richard W Mansbach Also developments in information and knowledge are considered by Tony Porter In addition chapters advocate new directions for global governance analysis Timothy Sinclair suggests a focus on the level of the commonplace Martin Hewson proposes long term analysis of world order informationalism and Ronnie D Lipschutz makes a case for the importance of global civil society

Approaches to Global Governance Theory Martin Hewson, Timothy J. Sinclair, Timothy Sinclair, 1999-09-02 Showcases diverse theoretical approaches in the emerging area of global governance *Information Technologies and Global Politics* James N. Rosenau, J. P. Singh, 2012-02-01 Returning to the fundamentals of political science namely power and governance this book studies the relationship between information technologies and global politics Key issue areas are carefully examined security including information warfare and terrorism global consumption and production international telecommunications culture and identity formation human rights humanitarian assistance the environment and biotechnology Each demonstrates the validity of the view now prevalent within international relations research the shifting of power and the locus of authority away from the state Three major conclusions are offered First the nation state must now confront support or coexist with other international actors non governmental and intergovernmental organizations multinational corporations transnational social movements and individuals Second our understanding of instrumental and structural powers must be reconfigured to account for digital information technologies Finally and perhaps most importantly information technologies are now reconstituting actor identities and issues *Imperialism and Internationalism in the Discipline of International Relations* David Long, Brian C. Schmidt, 2006-01-01 What were the guiding themes of the discipline of International Relations before World War II The traditional disciplinary history has long viewed this time period as one guided by idealism and then challenged by realism This book reconstructs in detail some of the formative episodes of the

field's early development and arrives at the conclusion that in actuality the early years of International Relations were preoccupied not with idealism and realism but with the dual themes of imperialism and internationalism. Thus the beginnings of the discipline have resonance with the recently revived discourse of empire and the global status and policies of the United States as the world's sole superpower.

Landmines and Human Security Richard A. Matthew, Bryan McDonald, Kenneth R. Rutherford, 2012-02-01 An impressive array of activists, scholars, government officials, journalists, and landmine victims themselves are gathered here to tell the dramatic and inspiring story of the International Campaign to Ban Landmines (ICBL). Organized in the early 1990s, the ICBL is a network of more than one thousand nongovernmental organizations worldwide working for a global ban on landmines. It was an important force behind the treaty to ban antipersonnel landmines that was signed in Ottawa in 1997 and which led to its being awarded the 1997 Nobel Peace Prize along with its coordinator.

Who Gets What? Aslaug Asgeirsdottir, 2009-07-01 Examines the domestic constraints negotiators operate under when nations seek to cooperate.

The Arab-Israeli Conflict Transformed Hemda Ben-Yehuda, Shmuel Sandler, 2012-02-01 The Middle East conflict, be it between the state of Israel and Arab states or between Jews and Palestinians, is a staple of international news. Utilizing both theoretical approaches and empirical evidence, Hemda Ben-Yehuda and Shmuel Sandler argue that despite the recent upswing in violence, particularly over the Palestinian issue, conflict has gradually been giving way since the 1970s to a more orderly regime of conflict management. By integrating ethnonational theoretical literature into their analysis, the authors move beyond the current International Relations debate over the relative merits of realist, neo-realist approaches versus neo-liberal institutional approaches. Ethnic state disputes are the primary source for failing to terminate the Arab-Israeli conflict.

Hierarchy amidst Anarchy Katja Weber, 2000-08-10 Analyzes the underlying basis for state participation in cooperative international structures.

Life After the Soviet Union Nozar Alaolmolki, 2001-10-19 Examines the political, social, and economic issues confronted by each of the newly independent republics in the Transcaucasus and Central Asian regions.

United We Stand? Aaron Belkin, 2012-02-01 It has long been assumed that leaders engage in international conflict to unify their followers, what is often called the rally round the flag hypothesis. Despite its intuitive appeal, however, this hypothesis does not always provide a compelling explanation of the relationship between domestic politics and international conflict. In *United We Stand*, Aaron Belkin shows that in one important realm, civil-military relations, leaders often prefer divisiveness over cohesion. When they feel domestically vulnerable, leaders use international conflict in order to create and exacerbate rivalries among their own military forces to lower the risk of a coup and to contribute to the consolidation and stability of the political order. Case studies include post-Soviet Georgia and Syria.

When Leaders Learn and When They Don't Akan Malici, 2009-01-08 Develops a new and dynamic theory of foreign policy decision making and experiential learning.

Identity and Institutions Neal G. Jesse, Kristen P. Williams, 2012-02-01 How can conflicts between various nationalist ethnic groups be reduced? Combining theory with case studies of Spain and Ireland, Neal G. Jesse and

Kristen P Williams develop an argument favoring a solution that links resolving issues of identity and perceptions of inequality to the establishment of cross national democratic institutions These institutions can affect deeply held attitudes by promoting overlapping identities and pooling sovereignty Overlapping identities reduce tension by creating an atmosphere where different ethnic groups lose their strict definitions of Self and Other Pooling sovereignty across a number of international and national representative bodies leads to increased access to governmental policymaking for all parties involved with each nationalist ethnic group having a stake in government Increased access moreover reduces threat perceptions and ethnic security dilemmas and increases trust all of which play an important role in overcoming such conflicts

Globalization, Security, and the Nation State Ersel Aydinli, James N. Rosenau, 2012-02-01 This volume studies the links among the concepts of globalization security and the authority of the nation state drawing attention to why and how these three concepts are interrelated and why they should be studied together Contributors explore the connections between security and global transformations and the corresponding or resulting changes in state structures that emerge Probing and extending existing paradigms the book offers three regional cases studies the periphery states of the Middle East and North Africa the second world states of the Russian Federation and the core states of the European Union It concludes with three chapters that synthesize the above themes to identify corresponding changes in the patterns of international politics

Sovereignty, Democracy, and Global Civil Society Elisabeth Jay Friedman, Kathryn Hochstetler, Ann Marie Clark, 2012-02-01 Sovereignty Democracy and Global Civil Society explores the growing power of nongovernmental organizations NGOs by analyzing a microcosm of contemporary global state society relations at UN World Conferences The intense interactions between states and NGOs at conferences on the environment human rights women s issues and other topics confirm the emergence of a new transnational democratic sphere of activity Employing both regional and global case studies the book charts noticeable

growth in the ability of NGOs to build networks among themselves and effect change within UN processes Using a multidimensional understanding of state sovereignty the authors find that states use sovereignty to shelter not only material interests but also cultural identity in the face of external pressure This book is unique in its analysis of NGO activities at the international level as well as the complexity of nation states responses to their new companions in global governance

Democratizing Global Politics Rodger A. Payne, Nayef H. Samhat, 2004-03-11 Argues that international institutions are becoming increasingly democratized

Global Governance of Education Maren Elfert, Christian Ydesen, 2023-09-22 This book examines the educational role of three international organizations created as part of the post World War II multilateral architecture the United Nations Educational Scientific and Cultural Organization UNESCO the World Bank and the Organisation for Economic Co operation and Development OECD These organizations have significantly promoted and shaped education as a fundamental feature of the modernization of society and contributed to the globalization of educational norms policies and technologies Drawing on primary source materials and interviews the book provides novel perspectives to the literature on the global governance of education by focusing on the historical entanglements relations and power struggles between these three organizations rather than treating them separately The study sheds light on the homogenizing effects of globalized educational policy making and the shifting power dynamics in the global governance of education This book makes a very distinctive and important contribution to the literature that critically analyses the influence of the global agencies on education globally it goes beyond the standard discursive analyses of policy texts to also explore the history of those organisations through archival research and in depth interviews of the key personnel What emerges is a powerful analysis which locates those agencies within their historical epochs and shines a light on their tensions and micro politics both internally and between organisations Paul Morris Professor of Comparative Education Institute of Education University College London UK A must read historical account of the intermingling boundary setting and competition between the three big intergovernmental organizations IOs in education OECD UNESCO and the World Bank Different from other scholars that document how these IOs have transformed themselves in response to external and internal changes Elfert and Ydesen draw attention to the relational aspect how have these three IOs navigated conflict carved niches and used and abused each other to amplify and expand their own mission How have they done so in an environment that is crowded with intergovernmental and international organizations each with a claim to govern education globally Gita Steiner Khamsi Professor of Comparative and International Education Teachers College Columbia University UNESCO Chair of Comparative Education Policy of the Geneva Graduate Institute of International and Development Studies This volume is a thoughtful and timely work of scholarship Understanding the roles of UNESCO the OECD and the World Bank is central to understanding contemporary education in global perspective Elfert and Ydesen s historical analysis sets out in rigorous detail how these organisations have evolved and what has shaped and driven this evolution The historical analysis is complemented by contemporary

World Financial Orders Paul Langley, 2003-08-27 World Financial Orders challenges the predominance of neo liberalism as a mode of knowledge about contemporary world finance and claims that it neglects the social and political bases as well as the malign consequences of change He looks to the field of International Political Economy IPE to construct an alternative mode one that critically restores society and politics An historical approach to IPE is advanced that accounts for modern world finance since the seventeenth century as a succession of structurally distinct hierarchical social orders This book will be of interest to those working in the field of IPE and to those scholars researchers and students from across the social sciences who seek to challenge the common sense neo liberal explanation of contemporary world finance *Global Governance in Question* Susanne Soederberg, 2006-02-20 Like many buzzwords global governance is as poorly understood as it is popular In contrast to most mainstream accounts this book examines global economic governance as an integral moment of contemporary capitalism presenting a critical insight into its real nature and the interests that it serves This book begins by asking what has not been discussed in the mainstream debates and why Drawing on a Marxist perspective Susanne Soederberg explores neglected issues including transnational debt and the increasingly coercive nature of US aid to so called failed states She argues that mainstream understandings fail to engage with the wider contradictions that characterise global capitalism In consequence there is no explanation of the changing nature of American empire and capitalist power in the world
