Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R. Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally

Most Likely to Succeed Tony Wagner, Ted Dintersmith, 2015-08-18 An urgent call for the radical reimagining of American education so that we better equip students for the realities of the twenty first century **An Approach to Algebra. Volume 2** Claudia Patricia Chapa Tamez, 2014-01-14 Since mathematical principles have remained the same all throughout the world for centuries Mathematics has been considered by many the universal language of numbers For some Mathematics causes anxiety or fear because it seems difficult to understand One of the objectives of this eBook is to make the material more visually technologically and multiculturally attractive with the aid of videos pictures games animations and interactive exercises so that Mathematics can become more interesting and accessible for today's worldwide students

since evidence is mounting to support technology advocates claims that 21st century information and communication tools as well as more traditional computer assisted instructional applications can positively influence student learning processes and outcomes Cradler 2002 The role of mathematics in our modern world is crucial for today s global communication and for a multitude of scientific and technological applications and advances Career Ready Education Through Experiential Learning Northrup, Pamela,Rasmussen, Karen,Colson, Robin,2021-03-19 Despite the promise of competency based education CBE learner centered issues related to support retention and program completion rates remain problematic In addition the infrastructure for higher education including issues related to faculty intellectual property workload and curriculum pose barriers and challenges in the design development implementation and delivery of CBE In response administrators faculty designers and developers of competency based experiences must incorporate innovative strategies that are foreign to the traditional institution A strong emphasis on retention and graduation rates must surround the student with support starting with the design and development of the CBE system There are few resources that can help prepare instructional designers advisors academic administrators and faculty to meet the many challenges of designing developing implementing and managing CBE Career Ready Education Through Experiential Learning is an essential reference book that includes strategies for design and development of competency based education CBE programs as well as administrative and delivery strategies as examples of how CBE can be implemented Through a strong theoretical framework chapters present the best practices strategies and practical tips as examples and scenarios that can be used in higher education settings While highlighting education courses programs and lessons across various institutions and educational domains this book is ideal for higher education administrators and policy designers implementors instructional designers curriculum developers faculty public policy leaders students in curriculum and instruction and instructional technology programs along with researchers and practitioners interested in CBE and experiential learning in higher education Navigating MathLand Linda Kasal Fusco,2017-06-21 Navigating MathLand uses a unique lens to focus on how students prefer to learn mathematics The intent of this book is to provide a guide for parents to help them navigate the thirteen years of their children s math education K 12 The book will provide parents with the knowledge and skills they will need to proactively advocate for their children s preparation for the 21st century workforce **Undergraduate Research at Community Colleges** Nancy H. Hensel,2023-07-03 Co published with the Council on Undergraduate ResearchThis book highlights the exciting work of two year colleges to prepare students for their future careers through engagement in undergraduate research It emerged from work in five community college systems thanks to two National Science Foundation grants the Council for Undergraduate Research received to support community colleges efforts to establish undergraduate research programs Chapters one two and three provide background information about community colleges undergraduate research and the systems the author worked with California City University of New York Maricopa Community College District Arizona Oklahoma and Tennessee
