Fieldwork Is Not What It Used to Be James D. Faubion, George E. Marcus, 2011-10-15 Over the past two decades anthropologists have been challenged to rethink the nature of ethnographic research the meaning of fieldwork and the role of ethnographers Ethnographic fieldwork has cultural social and political ramifications that have been much discussed and acted upon but the training of ethnographers still follows a very traditional pattern this volume engages and takes its point of departure in the experiences of ethnographers in the making that encourage alternative models for professional training in fieldwork and its intellectual contexts The work done by contributors to *Fieldwork Is Not What It Used to Be* articulates at the strategic point of career making research features of this transformation in progress Setting aside traditional anxieties about ethnographic authority the authors revisit fieldwork with fresh initiative In search of better understandings of the contemporary research process itself they assess the current terms of the engagement of fieldworkers with their subjects address the constructive open ended forms by which the conclusions of fieldwork might take shape and offer an accurate and useful description of what it means to become and to be an anthropologist today *Encyclopedia of Information Science and Technology, First Edition* Khosrow-Pour, D.B.A., Mehdi, 2005-01-31 Comprehensive coverage of critical issues related to information science and technology *Constructing a Place of Critical Architecture in China* Guanghui Ding, 2016-03-09 For the past 30 years The Chinese journal *Time Architecture* Shidai Jianzhu has focused on publishing innovative and exploratory work by emerging architects based in private design firms who were committed to new material theoretical and pedagogical practices In doing so this book argues that the journal has engaged in the presentation and production of a particular form of critical architecture described as an intermediate criticality as a response to the particular constraints of the Chinese cultural and political context The journal's publications displayed a dual critique a resistant attitude to the dominant modes of commercial building practice characterised by rapid and large scale urban expansion and an alternative publishing practice focusing on emerging independent architectural practitioners through the active integration of theoretical debates architectural projects and criticisms This dual critique is illustrated through a careful review and analysis of the history and programme of the journal By showing how the work of emerging architects including Yung Ho Chang Wang Shu Liu Jiakun and Urbanus are situated within the context of the journal's special thematic editions on experimental architecture exhibition group design new urban space and professional system the book assesses the contribution the journal has made to the emergence of a critical architecture in China in the context of how it was articulated debated presented and perhaps even produced within the pages of the publication itself The protagonists of critical architecture have endeavoured to construct an alternative mode of form and space with strong aesthetic and socio political implications to the predominant production of architecture under the current Chinese socialist market economy To rebel against certain forms of domination and suppression by capital and power is by no means to completely reject them rather it is to use thos "Sustainability &
