It's the Economy, Stupid Christos A Djonis,2018-05-17 Since the end of World War II most people around the world regarded the United States as the land of opportunity The baby boomers and Generation X knew it best as the land of milk and honey It was a place where

people could easily raise a family and with hard work could achieve anything they set their mind to The American Dream a dream of a land where life is better richer and fuller for everyone was alive Much has changed though in the past four decades Most Americans today do not realize that since the early 1990s when the world markets began to merge and globalization took place America went through a significant transformation Today the America of yesterday a place where children grew up to ultimately earn more than their parents is no longer reality but in most cases just wishful thinking In today's globalized world working in America no longer feels any different than earning a living in Europe or Japan Indeed income levels and employment opportunities now appear to be similar Are they though Do Americans still have the edge or has the American Dream finally slipped away Is it possible to conceive that American workers could be disadvantaged when compared to those living and working in other countries While most people live their everyday lives never knowing one thing is clear Recently political catchphrases such as Make America Great Again deeply resonated with frustrated Americans on both sides of the political divide more so than election pollsters and the media anticipated during the 2016 presidential election Undoubtedly anxiety about the future is in the air but what causes it Can the past be restored One thing is certain Americans cannot afford to remain complacent with the status quo Visit the author's webpage [HERE](#) **Teaching**

Principles of Microeconomics Mark Maier, Phil Ruder, 2023-01-06 Abundant with practical advice and ready to use teaching examples this dynamic guide will help both new and experienced instructors of Principles of Microeconomics to reconsider and refine their courses Mark Maier and Phil Ruder assemble the wisdom of 25 eminent scholars of economic education on how best to introduce students to the discipline and inspire a long lasting passion for microeconomics **The Age of Surveillance Capitalism** Shoshana Zuboff, 2019-01-31 THE TOP 10 SUNDAY TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF THE YEAR ONE OF BARACK OBAMA'S TOP BOOKS OF THE YEAR Shortlisted for The Orwell Prize 2020 Shortlisted for the FT Business Book of the Year Award 2019 Easily the most important book to be published this century I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas Zadie Smith The Guardian The challenges to humanity posed by the digital future the first detailed examination of the unprecedented form of power called surveillance capitalism and the quest by powerful corporations to predict and control us The heady optimism of the Internet's early days is gone Technologies that were meant to liberate us have deepened inequality and stoked divisions Tech companies gather our information online and sell it to the highest bidder whether government or retailer Profits now depend not only on predicting our behaviour but modifying it too How will this fusion of capitalism and the digital shape our values and define our future Shoshana Zuboff shows that we are at a crossroads We still have the power to decide what kind of world we want to live in and what we decide now will shape the rest of the century Our choices allow technology to enrich the few and impoverish the many or harness it and distribute its benefits The Age of Surveillance Capitalism is a deeply reasoned examination of the threat of unprecedented power free from democratic

oversight As it explores this new capitalism s impact on society politics business and technology it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization Most critically it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves
