

GINA 2019 – landmark changes in asthma management

- For safety, GINA no longer recommends SABA-only treatment for Step 1
 - This decision was based on evidence that SABA-only treatment increases the risk of severe exacerbations, and that adding any ICS significantly reduces the risk
- GINA now recommends that all adults and adolescents with asthma should receive ICS-containing controller treatment, to reduce the risk of serious exacerbations
 - The ICS can be delivered by regular daily treatment or, in mild asthma, by as-needed low dose ICS-formoterol
- This is a population-level risk reduction strategy
 - Other examples: statins, anti-hypertensives
 - Individual patients may not necessarily experience (or be aware of) short-term clinical benefit
 - The aim is to reduce the probability of serious adverse outcomes at a population level

Index Medicus, 2002 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings

Influence of Dietary Factors, Nutrients, and the Gut-Lung Axis on Respiratory Health Tomoko Suzuki, Naser Alsharairi, Inês Brandão, 2025-02-21 Dietary habits and nutrients are gaining increasing recognition as modifiable factors influencing respiratory health Food components including vitamins minerals fatty acids and bioactive compounds like flavonoids through their antioxidant and anti inflammatory properties have been associated with ameliorated lung function and attenuated viral infections To illustrate this multiple studies show that the Mediterranean diet known for its emphasis on fruits vegetables whole grains and olive oil has a beneficial effect on respiratory health Furthermore the dynamic interplay between diet and lungs appears to revolve around the immune system making immune interactions a central topic of discussion The substantial influence of the gut microbiota becomes evident when considering that approximately 70 80% of immune cells reside in the gut Hence the gut microbiota emerges as a crucial mediator of the impact of food on health including respiratory health Gut dysbiosis is believed to be associated with the etiology of respiratory lung diseases such as asthma COPD chronic bronchitis emphysema and lung cancer Microbiota derived metabolites such as short chain fatty acids SCFAs produced from the fermentation of non digestible carbohydrates have been reported to regulate gut inflammation Probiotics SCFAs bioactive compounds and dietary fiber as well as restricted dietary patterns have been shown to reduce gut inflammation and play a protective role in respiratory diseases However the exact mechanisms underlying these processes are still to be unravelled

Asthma in Children and Adults - What are The Differences and What Can They Tell us About Asthma? Steve Turner, John W. Upham, 2020-05-15

Difficult and Severe Asthma in Children Andrew Bush, Giorgio Piacentini, Francesca Santamaria, Nicola Ullmann, Renato Cutrera, 2019-09-23 Globally severe asthma is defined by the WHO as either A untreated severe asthma B difficult to treat

severe asthma and C treatment resistant severe asthma Untreated severe asthma is a political problem the children do not have access to the basic tools for asthma management and when this is corrected asthma outcomes are transformed The problem in difficult to treat severe asthma is not the airway disease but co morbidities and behavioral factors This is the group in which there are most asthma deaths underscoring that severe asthma cannot be solely defined by levels of prescribed therapy Treatment resistant severe asthma is rare and challenging and the problem is the airway pathology These children require new and innovative therapies

Kendig and Wilmott's Disorders of the Respiratory Tract in Children - E-Book Andrew Bush,Robin R Deterding,Albert Li,Felix Ratjen,Peter Sly,Heather Zar,Robert W.
