in Europe that are suggestive of reincarnation The first section provides a brief history of the belief in reincarnation among Europeans The second section considers eight cases from the first third of the twentieth century that were not independently investigated but were reported and sometimes published by the persons concerned The third section covers 32 cases from the second half of the twentieth century that were investigated by the author Many of these cases involved either children who exhibited unusual behavior attributed to a previous life or adults who experienced recurrent or vivid dreams attributed to a previous life In the fourth section the author compares European cases suggestive of reincarnation with those of other countries and cultures
