Star Ark Rachel Armstrong, 2016-11-13

As space ventures have become more numerous leading scientists and theorists have offered ways of building a living habitat in a hostile environment taking an ecosystems view of space colonization The contributors to this volume take a radical multi disciplinary view of the challenge of human space colonization through the ongoing project Persephone This book fundamentally challenges prevalent ideas about sustainability and proposes a new approach to resource austerity and conservation and providing truly sustainable approaches that are life promoting Readers will learn the details of the plans for Persephone a real project that is part of the company Icarus Interstellar s plans for the design and engineering of a living interior on a worldship to be constructed in Earth s orbit within 100 years Although the timeframe itself is only an estimate since it is contingent on many significant developments including funding and technological advances the industry consensus is that within 100 years we will see manned space exploration beyond our solar system This notion is shared by organizations such as the Initiative for Interstellar Studies and the DARPA funded 100 year starship project This book specifically develops the principles for the construction of a living habitat within a worldship a multi generational starship that contains its own world that supports colonists as it travels across great distances between stars at a speed much slower than light Far from being a sterile industrial setup such as the ISS or even being a bucolic suburbia as proposed by Gerard O Neill in the 1970s this worldship will provide the pre conditions for sustaining life beyond Earth s environment which may also lead to the evolution of non terrestrial ecologies Drawing on the principles of ecopoiesis and insights offered by the Biosphere 2 experiment that demonstrated what we have to learn about ecosystem construction this book proposes first designing the soils of such a space It should then be possible to set up the conditions that a first generation of colonists may experience in leaving our solar system to find new worlds to settle perhaps in spreading life throughout the universe Although the book takes a unique view of ecology and sustainability within the setting of a traveling starship it is equally concerned with the human experience on artificial worlds Chapters come from a range of multi disciplinary thinkers who shed light on the brave new future ahead from different angles

Answers hundreds of questions on the most interesting of topics: planet Earth. It's right under our feet every day. Earth and all its glorious components. From fossils, rocks and minerals to caves, earthquakes and volcanic eruptions. The Handy Geology Answer Book traces the formation of the universe and the planet, investigating the layers of the planet and explaining the formation of mountains and bodies of water. Questions and answers are also devoted to physical and chemical processes, fossil fuels, the effects of global warming on glaciers, world morphological features and even the geology of other planets. It answers nearly 1,000 of the most frequently asked questions on the complexities that shaped our planet. It is also a trivia buff's delight with the stats for Earth's deepest, the Mariana, the deepest known ocean trench, lowest, the shoreline of the Dead Sea, highest, Mt Everest, the longest river, the Nile, and the largest freshwater lake, Lake Superior, along with the how and why of these features. Easy to understand and use. The Handy Geology Answer Book is invaluable for students and general science readers of all ages. With numerous photos and illustrations, this informative book also includes a resource section on educational places, government organizations and other references, a helpful bibliography, an extensive index and a glossary of terms, adding to its usefulness. From the microscopic formation of crystals to the titanic eons long processes that result in islands, volcanoes, mountains, glaciers, oceans, continents and even planets, you'll learn about the events that created today's world and the changes that continue to affect Earth every day. the publishers weekly, 1875. *Solid-Earth Sciences and Society*, National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on the Status and Research Objectives in the Solid-Earth Sciences, 1993-02-01.
