France Since The Revolution Texts And Contexts:

France Since the Revolution Claire Gorrara, Rachael Langford, 2003-01 France since the Revolution Texts and Contexts introduces students to modern France by exploring the emergence and development of France's five Republics and the values and ideals of French republicanism Starting with the events of the French Revolution of 1789 each of the chapters in the book focuses on a flashpoint in French history the Revolution of 1848 the Paris Commune of 1870 the Dreyfus affair of the 1890s the First and Second World Wars the Brazzaville conference of 1944 May 1968 and the campaign for political parity for women in the 1990s Written by specialists from a range of disciplines including history cultural studies politics and French area studies these chapters address a series of contexts providing an overview of events and a critical interpretation of how such upheavals have affected the history of France's Republics Questions of gender race and class are pivotal to such analyses Complementing this emphasis on contexts are a number of texts available in French and English that give a flavour of how individual French men and women experienced their times As an introductory book for undergraduates France since the Revolution does not assume extensive previous knowledge and contains a complete glossary of the key names used in chapters as well as a time line for reference and suggestions for further reading An important resource for students and teachers alike this accessible book gives its readers a firm base in nineteenth and twentieth century French history and culture from which to develop more specialized interests

Contexts, Subtexts and Pretexts Brian James Baer, 2011 This volume presents Eastern Europe and Russia as a distinctive translation zone despite significant internal differences in language religion and history The persistence of large multilingual empires which produced bilingual and even polyglot readers the shared experience of belated modernity and the longstanding practice of repressive censorship produced an incredibly vibrant profoundly politicized and highly visible culture of translation throughout the region as a whole The individual contributors to this volume examine diverse manifestations of this shared translation culture from the Romantic Age to the present day revealing literary translation to be at times an embarrassing reminder of the region's cultural marginalization and reliance on the West and at other times a mode of resistance and a metaphor for cultural supercession This volume demonstrates the relevance of this region to the current scholarship on alternative translation traditions and exposes some of the Western assumptions that have left the region underrepresented in the field of Translation Studies

European Contexts for English Republicanism Gaby Mahlberg, Dirk Wiemann, 2016-04-22 European Contexts for English Republicanism offers new perspectives on early modern English republicanism through its focus on the Continental reception of and engagement with seventeenth century English thinkers and political events Looking both at political ideas and at the people that shaped them the collection examines English republican thought in its wider European context during the later seventeenth and eighteenth century In a number of case studies the contributors

assess the different ways in which English republican ideas were not only shaped by the thought of the ancients but also by contemporary authors from all over Europe such as Hugo Grotius or Christoph Besold. They demonstrate that English republican thinkers did not only act in dialogue with Continental authors and scholars; their ideas in turn also left a long lasting legacy in Europe as they were received, transformed and put to new uses by thinkers in France, Italy, the Netherlands, Germany and Poland. Far from being an exclusively transatlantic affair, as much of the established scholarship suggests, English republican thought also left its legacy on the European Continent, finding its way into wider debates about the rights and wrongs of the English Civil War and the nature of government. While later translations of English republican works also influenced the key thinkers of the French Revolution and the liberals of the nineteenth century, bringing together a range of fresh and original essays by British and European scholars in the field of early modern intellectual history and English studies, this collection of essays revises a one-sided approach to English republicanism and widens the scope of study beyond linguistic and national boundaries by looking at English republicans and their continental networks and legacy.

Translation Classics in Context Paul F. Bandia, James Hadley, Siobhán McElduff, 2024-07-31. *Translation Classics in Context* carefully considers the relationship between translation and the classics. It presents readers with revelatory and insightful case studies that investigate translations produced as part of nexuses of colonial resistance and liberation across Africa and in Ireland; translations of novels and folklore collections that influence not just other fictions but stage productions and entire historical disciplines; struggles over Ukrainian and Russian literature and how it is shaped and transferred; and the role of the academy and the curriculum in creating notions of classic translations. Along the way it covers oral poetry, saints, scholars, Walter Scott and Jules Verne, not to mention Leo Tolstoy and the Corpse Bride making her way from folklore to Frankenstein and into the world of Disney animation. Contributors are all leading scholars and the book is accessible and engaging, assuming no specialist knowledge. Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license.

Text, Context, Pretext H. G. Widdowson, 2008-04-15. Written by a leading researcher in the field, this fascinating examination of the relations between grammar, text and discourse is designed to provoke critical discussion on key issues in discourse analysis which are not always clearly identified and examined. Written by a leading researcher in the field, it continues the enquiry into discourse analysis that Zellig Harris initiated 50 years ago, which raised a number of problematic issues that have remained unresolved ever since. It introduces the notion of pretext as an additional factor in the general interpretative process, focuses attention specifically on the work of critical discourse analysis (CDA) in light of the issues discussed.

The Idea of the Sciences in the French Enlightenment G. Matthew Adkins, 2013-11-29. This book traces the development of the idea that the sciences were morally enlightening through an intellectual history of the secretaries of the French Royal Academy of Sciences and their associates from the mid-seventeenth century to the end of the eighteenth century. Academy secretaries such as Fontenelle and Condorcet were critical to the emergence of a central feature of the narrative of Enlightenment in that they encouraged the notion that the philosophical spirit of the Scientific Revolution already present among the educated classes should guide the necessary reformation of society and government according to the ideals of scientific reasoning. *The Idea of the Sciences* also tells an intellectual history of political radicalization, explaining especially how the marquis de Condorcet came to believe that the sciences could play a central role in guiding the outcome of the Revolution of 1789. Published by University of Delaware Press. Distributed worldwide by Rutgers University Press.

Translation and the Intersection of Texts, Contexts and Politics Mohammed Albakry, 2017-07-27. This book analyzes the impact of historical, political and sociocultural contexts on the reading, rewriting and translating of texts. The authors base their arguments on their experiences of translating or researching different text types, taking in fiction, short stories, memoirs, religious texts, scientific treatises and news reports from a variety of different languages and cultural traditions. In doing so, they cover a wide range of contexts and time periods, including Early Modern Europe, post-1848 Switzerland, nineteenth-century Portugal, Egypt in the early twentieth century under British colonial rule, Spain under Franco's dictatorship and contemporary Peru and China. They also consider the theoretical and pedagogical implications of their conclusions for translation students and practitioners. This edited collection will be of great interest to scholars working in translation studies, applied linguistics and on issues of cultural difference.
