

As online learning becomes more common and more resources are converted to digital forms, some people have suggested that public libraries should be shut down and, in their place, everyone should be given an iPad with an e-reader subscription.

Proponents of this idea state that it will save local cities and towns money because libraries are expensive to maintain. They also believe it will encourage more people to read because they won't have to travel to a library to get a book; they can simply click on what they want to read and access the material wherever they may be. They could also access more materials because libraries won't have to buy hard copies of books; they can simply download as many digital copies as they need. However, it would be a serious mistake to replace libraries with tablets.

First, digital books and resources are associated with less learning and more problems than printed resources. A study done on tablet versus book reading found that people read 20-30% slower on tablets, retain less information, and understand only 10% less of what they read compared to people who read the same information in print. Additionally, staring too long at a screen has been shown to cause numerous health problems, including blurred vision, dizziness, dry eyes and headaches among others at much higher instances than reading print does. People who use tablets and mobile devices excessively also have a higher incidence of more serious health issues such as fatigue, shoulder and back pain, carpal tunnel syndrome, and muscle strain. I know that whenever I read from my e-reader for too long, my eyes begin to feel tired and my neck hurts. We should not add to these problems by giving people, especially young people, more reasons to look at screens.
