Ronald Reichertz,2000 Analysing Lewis Carroll s Alice books in the context of children s literature from the seventeenth through the nineteenth century Ronald Reichertz argues that Carroll s striking originality was the result of a fusion of his narrative imagination and formal and thematic features from earlier children s literature The Making of the Alice Books includes discussions of the didactic and nursery rhyme verse traditionally addressed by Carroll s critics while adding and elaborating connections established within and against the continuum of English language children s literature Drawing examples from a wide range of children s literature Reichertz demonstrates that the Alice books are infused with conventions of and allusions to earlier works and identifies precursors of Carroll s upside down looking glass and dream vision worlds Key passages from related books are reprinted in the appendices making available many hard to find examples of early children s literature **An Arrested Heart**
