Art Practice As Research Inquiry In The Visual Arts:

Art Practice as Research Graeme Sullivan, 2010 Art Practice as Research Second Edition continues to present a compelling argument that the creative and cultural inquiry undertaken by artists is a form of research. The text explores themes, practices, and contexts of artistic inquiry and positions them within the discourse of research. Sullivan argues that legitimate research goals can be achieved by choosing different methods than those offered by the social sciences. The common denominator in both approaches is the attention given to rigor and systematic inquiry. Artists emphasize the role of the imaginative intellect in creating, criticizing, and constructing knowledge that is not only new but also has the capacity to transform human understanding.

Art Practice as Research Graeme Sullivan, 2005 This book will publish in a new edition on December 1, 2009. We are no longer supplying instructors with complimentary review copies of this edition. If you need an urgent desk copy of the existing edition for a class this semester, please call 1 800 818 7243 and we will be pleased to process your request.

In this rich and layered reflection on visual arts practice as research, Graeme Sullivan launches a passionate and convincing case that rewrites the definitions of art and research as it unapologetically claims for the visual arts the respect and admiration of the academy.

Jessica Hoffman Davis, Harvard University

Art Practice as Research Inquiry in the Visual Arts presents a compelling argument that the creative and cultural inquiry undertaken by artists is a form of research. The text explores themes, practices, and contexts of artistic inquiry and positions them within the discourse of research. Author Graeme Sullivan argues that legitimate research goals can be achieved by choosing different methods than those offered by the social sciences. The common denominator in both approaches is the attention given to rigor and systematic inquiry. Artists emphasize the role of the imaginative intellect in creating, criticizing, and constructing knowledge that is not only new but also has the capacity to transform human understanding. The book is divided into three content areas that provide a unique framework for carrying out inquiry in the visual arts.

Contexts for Visual Arts Research is a historical review that positions the visual arts as a culturally grounded and institutionally bound area of artistic and educational inquiry.

Theorizing Visual Arts Practice presents the thesis that visual arts practice is a theoretically robust area of inquiry and a transformative approach to creating and critiquing knowledge.

Visual Arts Research Practices describes a range of strategies and approaches to planning and carrying out visual arts research.

is a historical review that positions the visual arts as a culturally grounded and institutionally bound area of artistic and educational inquiry.

This will also be an invaluable reference for anyone with an interest in interdisciplinary research in the social sciences and the role of imaginative inquiry in human understanding.

COMMUNICATION RESEARCH TRENDS *Art Practice in a Digital Culture* Hazel Gardiner, Charlie Gere, 2016-04-15 Much as art history is in the process of being transformed by new information communication technologies often in ways that are either disavowed or resisted art practice is also being changed by those same technologies One of the most obvious symptoms of this change is the increasing numbers of artists working in universities and having their work facilitated and supported by the funding and infrastructural resources that such institutions offer This new paradigm of art as research is likely to have a profound effect on how we understand the role of the artist and of art practice in society In this unique book artists art historians art theorists and curators of new media reflect on the idea of art as research and how it has changed practice Intrinsic to the volume is an investigation of the advances in creative practice made possible via artists engaging directly with technology or via collaborative partnerships between practitioners and technological experts ranging through a broad spectrum of advanced methods from robotics through rapid prototyping to the biological sciences
