Donnelly,2023-01-01 This book reconsiders audiovisual culture through a focus on human perception with recourse to ideas derived from recent neuroscience It proceeds from the assumption that rather than simply working on a straightforward cognitive level audiovisual culture also functions more fundamentally on a physiological level directly exploiting precise aspects of human perception Vision and hearing are unified in a merged signal in the brain through being processed in the same areas This is illustrated by the startling McGurk Effect whereby the perception of spoken sound is changed by its accompanying image and counterpart effects which demonstrate that what we see is affected by different sounds accompanying sounds This blending of sound and images into a whole has become a universal aspect of culture not only evident in films and television but also in video games and short Internet clips Indeed this aesthetic formation has become the dominant of this period The McGurk Universe attends to how audiovisual culture engages with and mediates between physiological and psychological levels *Psyche and the Literary Muses* Martin S.

Lindauer,2009 *Psyche and the Literary Muses* focuses on the psychology of literature from an empirical point of view rather than the more typical psychoanalytic position and concentrates on literary content rather than readers or writers The book centers on the author s quantitative studies of brief literary and quasi literary forms ranging from titles of short stories and names of literary characters to cliches and quotations from literary sources in demonstrating their contribution to the topics of learning perception thinking emotions creativity and especially person perception and aging More broadly *Psyche* bears on literary studies art and psychology in general as well as interdisciplinarity This book deepens the understanding and appreciation of literature for scholars academics and the general reader **Narrating Architecture** James Madge,Andrew Peckham,2006-09-27 This anthology brings together the best and most interesting papers from the first ten years of *The Journal of Architecture* published together for the first time in a single volume Covering a wide range of topics of central importance to architecture today the papers also address the related topics to which architecture and architectural studies are inextricably linked The invited authors draw on sociology philosophy cultural studies and the sciences to round out the collection and highlight the breadth and vitality of modern architectural studies offering perspectives from different disciplines as well as different corners of the globe *The Study of the Meaning of Life* Zhengyu Sun,2024-10-28 Based on the revelation and analysis of the social self consciousness contained in the individual self consciousness of the meaning of life the book discusses the human life world spiritual world cultural world and meaning world Then it states the life world modes of thought values ideas aesthetic consciousness and ultimate concerns of modern humans It also systematically expounds on the cultivation the truth the nurture the sublimation the support the tension and the source of the spiritual home in perspectives of education science art philosophy theory mentality and ideals Constructing a fulfilling spiritual home for man is the realistic meaning of this book
