Articulating The World Conceptual Understanding And The Scientific Image:

Articulating the World Joseph Rouse, 2015-11-13 Naturalism as a guiding philosophy for modern science both disavows any appeal to the supernatural or anything else transcendent to nature and repudiates any philosophical or religious authority over the workings and conclusions of the sciences A longstanding paradox within naturalism however has been the status of scientific knowledge itself which seems at first glance to be something that transcends and is therefore impossible to conceptualize within scientific naturalism itself In *Articulating the World* Joseph Rouse argues that the most pressing challenge for advocates of naturalism today is precisely this to understand how to make sense of a scientific conception of nature as itself part of nature scientifically understood Drawing upon recent developments in evolutionary biology and the philosophy of science Rouse defends naturalism in response to this challenge by revising both how we understand our scientific conception of the world and how we situate ourselves within it *Articulating the World* Joseph Rouse, 2015-11-13 Naturalism both disavows any appeal to the supernatural or anything else transcendent to nature and repudiates any philosophical or religious authority over the workings and conclusions of the sciences Paradoxically however scientific knowledge itself appears to transcend nature seemingly making it impossible to conceptualize within scientific naturalism In *Articulating the World* Joseph Rouse takes up this challenge drawing on recent developments in evolutionary biology and the philosophy of science to defend naturalism by revising both how we understand our scientific conception of the world and how we situate ourselves within it The Call for Recognition R. Krishnaswamy, 2023-03-24 This book builds a case for how social norms are neither mere conventions nor are they merely anthropological phenomena which are relativistic In other words it talks about how socio political norms are built out of our natural social behaviour but at the same time also have objective normative validity The volume puts forth an alternative model called the recognitional model which can help us address some of the socio political concerns we face in today's world It addresses the problem with a purely legalistic framework of addressing social injustice in that law due its universalistic assumptions regarding human nature tends to glide over the particular differences that might exist between people This book discusses how we know that in our daily lives we value people not only because that person is a legal human being but also because that person is our father mother our teacher etc There is a whole network of acts of social respect that we engage in with the other in our social sphere which the legal framework can't quite capture This volume sheds light on the political consequence of legal reasoning in that it is formalistic in the sense that legal relations can't successfully codify the immediate epistemic context from which social identities emerge An introspective work this book will be of great interest to scholars and researchers of linguistics political philosophy law and human rights and social theory Do Men Mother Andrea Doucet, 2018-04-09 The second edition of Andrea Doucet's *Do Men Mother* builds upon the award winning first edition to further illuminate fathers' candid reflections on caring and the intricate social worlds that men and women inhabit as they love and let go of their children Including

interviews with over one hundred fathers from truck drivers to insurance salesmen physicians to artists Doucet illustrates how men are breaking the mould of traditional parenting models This edition expands her argument wider and deeper building on changes to the theoretical work that informs the field her own intellectual trajectory and the fieldwork of revisiting six fathers and their partners a decade after her initial interviews She continues to examine key questions such as What leads fathers to trade earning for caring How do fathers navigate through the maternal worlds of mothers and infants Are men mothering or are they redefining fatherhood In asking and unravelling the question Do men mother this study tells a compelling story about Canadian parents radically re envisioning child care and domestic responsibilities in the twenty first century

Pragmatic Naturalism Richard J. Bernstein, 2020-08-18 Richard J Bernstein argues that despite the apparent chaotic debates about naturalism there has recently been a series of powerful arguments that support a version of naturalism that is in the spirit of John Dewey s pragmatic naturalism After presenting a sketch of Dewey s pragmatic naturalism he critically examines the works of a variety of thinkers Robert Brandom John McDowell Richard Rorty Wilfrid Sellars Peter Godfrey Smith Philip Kitcher Bjorn Ramberg David Macarthur Steven Levine Mark Johnson Robert Sinclair Huw Price and Joseph Rouse to show how they have contributed analytic finesse to the articulation of Dewey s vision of pragmatic naturalism As Bernstein shows Dewey s philosophical legacy is very much alive today in some of the best recent philosophic discussions

The Ethics of Conceptualization Matthieu Queloz, 2025-01-31 Philosophy strives to give us a firmer hold on our concepts But what about their hold on us Why place ourselves under the sway of a concept and grant it the authority to shape our thought and conduct Another conceptualization would carry different implications What makes one way of thinking better than another The Ethics of Conceptualization develops a framework for concept appraisal Its guiding idea is that to question the authority of concepts is to ask for reasons of a special kind reasons for concept use which tell us which concepts to adopt adhere to or abandon thereby shoring up or undercutting the reasons for action and belief that guide our deliberations Traditionally reasons for concept use have been sought either in timeless rational foundations or in concepts inherent virtues such as precision and consistency Against this the book advances two main claims that we find reasons for concept use in the conceptual needs we discover when we critically distance ourselves from a concept by viewing it from the autoethnographic stance and that

sometimes concepts that conflict or exhibit other vices such as vagueness or superficiality are just what we need By considering which concepts we need rather than which are absolutely best we can reconcile ourselves to the contingency of our concepts determine the proper place of efforts to tidy up thought and adjudicate between competing conceptions of things even things as contested as liberty or free will A needs based approach separates helpful clarification from hobbling tidy mindedness and authoritative definition from conceptual gerrymandering This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations

After Positivism Nicholas Hoover Wilson, Damon Mayrl, 2024-04-30 What is the value of comparison for research in historical sociology Today social scientists regularly express doubt about the positivist premises that have long justified comparison s use that cases can be unproblematically compared as though they are independent of one another that comparison can reliably yield valid causal inference and that comparative methods can grapple with questions of meaning sequence and process that are central to historical explanation Yet they remain reluctant to abandon comparison altogether not least because comparisons are still manifestly useful in the research process After Positivism presents a bold new set of

warrants and methodologies for comparison that takes these criticisms fully into account The contributors to this book marshal a wide array of postpositivist approaches to knowledge to reconstruct the analytic potential of comparison for a new generation of social scientists In addition to providing fresh answers to classic questions about case selection and causal inference authors ponder the role comparison plays in a world where social phenomena are demonstrably time space and concept dependent where causation is typically conjunctural where social structures and groups emerge and die and where important objects of inquiry can be understood only in terms of relationships emergent properties or contingent and irregular effects Engaging and timely this book will be of interest to all those who seek to improve our explanations of historical change in social scientific research Ways of Home Making in Care for Later Life Bernike Pasveer, Oddgeir Synnes, Ingunn Moser, 2020-01-21 This is a book on how home is made when care enters the lives of people as they grow old at home or in homely institutions Throughout the book contributors show how home is a verb it is something people do Home is thus always in the making temporal contested and open to negotiation and experimentation By bringing together approaches from STS anthropology health humanities and health care studies the book points to the importance of people s tinkering and experiments with making home as it is here that home is being made and unmade Normativity and Naturalism in the Philosophy of the Social Sciences Mark Risjord, 2016-01-22 Normativity and Naturalism in the Social Sciences engages with a central debate within the philosophy of social science whether social scientific explanation necessitates an appeal to norms and if so whether appeals to normativity can be rendered scientific This collection brings together contributions from a diverse group of philosophers who explore a broad but thematically unified set of questions many of which stem from an ongoing debate between Stephen Turner and Joseph Rouse both contributors to this volume on the role of naturalism in the philosophy of the social sciences Informed by recent developments in both philosophy and the social sciences this volume will set the benchmark for contemporary discussions about normativity and naturalism This collection will be relevant to philosophers of social science philosophers interested in the rule following and metaphysics of normativity and theoretically oriented social scientists *The Routledge Handbook of Liberal Naturalism* Mario De Caro, David Macarthur, 2022-03-14 The central question of naturalism the relation of philosophy to science was one of the defining strands of twentieth century thought and remains a major source of debate and controversy Today many argue that philosophy should fold itself into the sciences especially the natural sciences Liberal naturalists argue that such scientific naturalism demands reductive and Procrustean conceptions of knowledge and reality Moreover many philosophical problems are beyond the scope of the sciences such as the nature of persons the normativity of the space of reasons and how best to understand the peculiar mix of objectivity and subjectivity of ethics and art The Routledge Handbook of Liberal Naturalism is the first collection to present a comprehensive overview of liberal naturalism a philosophical outlook that lies between scientific naturalism and supernaturalism Comprising 37 chapters by an international team of contributors it examines

important cutting edge topics including what is liberal naturalism is metaphysics a viable project naturalism in the history of philosophy including Hume Dewey and Quine contemporary liberal naturalists such as P F Strawson John McDowell Hilary Putnam and John Rawls related kinds of naturalism including subject naturalism common sense naturalism and biological naturalism the bearing of liberal naturalism on contemporary debates in epistemology philosophy of mind ethics and aesthetics Essential reading for students and researchers in all areas of philosophy this volume will be of particular interest for those studying philosophical naturalism philosophy of science metaphysics epistemology philosophy of mind ethics and aesthetics

Characterizing the Robustness of Science Léna Soler, Emiliano Trizio, Thomas Nickles, William Wimsatt, 2012-03-23 Mature sciences have been long been characterized in terms of the successfulness reliability or trustworthiness of their theoretical experimental or technical accomplishments Today many philosophers of science talk of robustness often without specifying in a precise way the meaning of this term This lack of clarity is the cause of frequent misunderstandings since all these notions and that of robustness in particular are connected to fundamental issues which concern nothing less than the very nature of science and its specificity with respect to other human practices the nature of rationality and of scientific progress and science's claim to be a truth conducive activity This book offers for the first time a comprehensive analysis of the problem of robustness and in general that of the reliability of science based on several detailed case studies and on philosophical essays inspired by the so called practical turn in philosophy of science

Structure and Thought Daniel Sacilotto, 2024-02-15 Offers a new understanding of representational cognition that synthesizes postwar philosophical approaches to the question of objective knowledge This study develops a novel account of representational cognition explaining how cognitive systems progressively come to map the structure of their worlds Daniel Sacilotto offers a constructive response to the critique of representation formulated throughout the post Kantian philosophical tradition Rather than a skepticism or idealism whereby thinking can grasp appearances but never the real representation Sacilotto shows is a constitutive dimension of cognitive systems creative capacity to know and intervene in the world of which they are part Structure and Thought Toward a Materialist Theory of Representational Cognition integrates various lines in contemporary philosophy including those often seen as incommensurable or in irresolvable tension with one another Sacilotto thus advances a productive synthesis of a materialist ambition to provide a creative and historical understanding of cognition with a structural realist account of representation He shows how the different forms of sensory discursive and theoretical mediation that characterize human cognition are conducive to a realist epistemological framework that explains how the possibility of knowledge about a mind independent reality is conceivable

The Single-Minded Animal Preston Stovall, 2021-09-15 This book provides an account of discursive or reason governed cognition by synthesizing research in the philosophy of language the philosophy of mind and evolutionary anthropology Using the grasp of a natural language as a model for the autonomous or self governed rationality of discursive cognition the author uses a semantics for individual

intentions shared intentions and normative attitudes as a framework for understanding what it is to be a rational animal This semantics interprets claims about shared intentions and claims about what people ought and may do as the expression of plans of action that involve taking the points of view of other people within a community This has important consequences for our understanding of both the natural basis and the social relevance of intentional and normative mental states In order to distinguish the strong and weak modal force which characterizes normativity but not shared intentionality the author argues that a notion of single minded practical cognition is necessary This account of single mindedness is then used to shed light on the autonomy or self government characteristic of discursive cognition as manifest in a linguistic community whose members are able to adopt the standpoints of others Drawing together research in philosophy and the related sciences the formal account of the semantic content of the claims we use to give expression to shared intentional and normative mental states integrates well with research in cognitive science evolutionary anthropology and social psychology concerning the ontogenetic and phylogenetic development of shared intentionality and norm psychology in human beings and other primates The Single Minded Animal will appeal to researchers and advanced students working on shared intentionality normativity rationality cognitive science social and developmental psychology and evolutionary anthropology

Science as Social Existence Jeff Kochan, 2017-12-18 In this bold and original study Jeff Kochan constructively combines the sociology of scientific knowledge SSK with Martin Heidegger s early existential conception of science Kochan shows convincingly that these apparently quite different approaches to science are in fact largely compatible even mutually reinforcing By combining Heidegger with SSK Kochan argues we can explicate elaborate and empirically ground Heidegger s philosophy of science in a way that makes it more accessible and useful for social scientists and historians of science Likewise incorporating Heideggerian phenomenology into SSK renders SSK a more robust and attractive methodology for use by scholars in the interdisciplinary field of Science and Technology Studies STS Kochan s

ground breaking reinterpretation of Heidegger also enables STS scholars to sustain a principled analytical focus on scientific subjectivity without running afoul of the orthodox subject object distinction they often reject Science as Social Existence is the first book of its kind unfurling its argument through a range of topics relevant to contemporary STS research These include the epistemology and metaphysics of scientific practice as well as the methods of explanation appropriate to social scientific and historical studies of science Science as Social Existence puts concentrated emphasis on the compatibility of Heidegger s existential conception of science with the historical sociology of scientific knowledge pursuing this combination at both macro and micro historical levels Beautifully written and accessible Science as Social Existence puts new and powerful tools into the hands of sociologists and historians of science cultural theorists of science Heidegger scholars and pluralist philosophers of science

Towards a New Scientific Realism Jan Voosholz, 2025-08-30 This book presents an argument for a new type of scientific realism beyond naturalism correlationism and what the author terms objective realism To achieve this positive philosophical proposal Jan Voosholz develops a thorough critique of current debates surrounding realism and antirealism in philosophy of science as well as those concerning new and speculative realism Moreover in order to provide a new outlook for the philosophy of the natural sciences this book advances and introduces decisive arguments to that debate from speculative and new realist discussions in ontology and epistemology Consequently it develops a unique starting point for a pluralistic philosophy of nature Any proponent or adversary of new speculative perspectival or pragmatic realism ontic or epistemic structural realism scientific pluralism feminist or structural empiricism selective scepticism non reductive or reductive naturalism with an interest in general philosophy of science should take the careful reconstruction of the debates and the novel arguments presented in this book into account Readers interested in philosophy and the sciences with an interest in these areas of theoretical philosophy will find in this book an informative and comprehensive outline of the state of the art in the epistemology and ontology of the natural sciences

Climate, God and Uncertainty Arthur C. Petersen, 2023-11-28 Climate God and Uncertainty moves beyond Bruno Latour s thought to understand what climate change means for philosophical anthropology and wider culture What are for example the philosophical implications of climate change and its associated uncertainties Referring mainly to works by Latour William James and Heinrich Rickert Petersen develops transcendental naturalism to reinterpret the interface between science and politics in the context of climate change He highlights for instance issues such as the religious disenchantment of nature the scientific disbelief in a plurality of value laden perspectives and the disregard for non modern worldviews in politics In developing its argument the book makes a methodological intervention on the sort of naturalism that guides both Latour s work and a large part of the academic field called science and religion Praise for Climate God and Uncertainty The challenges of a changing climate raise disturbing questions about being human in the world ones that cannot adequately be answered through scientific inquiry In this original interrogation and extension of the work of Bruno Latour Petersen constructs a philosophical position that takes seriously the

realities of a changing natural world the human search to ground our sense of value and the possibility of God Climate God and Uncertainty is an exciting new addition to the small but growing literature on climate change religion and philosophy Mike Hulme University of Cambridge This innovative and exciting work explores the rich potential of transcendental naturalism as a bridge between science and religion Drawing on the work of William James Heinrich Rickert and Bruno Latour Petersen maps out a fresh approach that goes beyond current accounts of naturalism opening up a deeply satisfying account of our engagement with the natural world Alister McGrath Emeritus Andreos Idreos Professor of Science and Religion University of Oxford How to live with the pervasive reality of uncertainty and a plurality of perspectives in science religion and politics without playing down the sciences and our responsibilities The transcendental naturalism Arthur Petersen articulates in this book respects science while leaving room for other elements wonder judgements and values and the way we construct provisional models of reality These issues are especially acute in the context of climate change when we face the interplay of science and policy Petersen stresses the importance of imagination to articulate meaning and of recognising a plurality of value laden perspectives striving for responsible action and sensitivity to that which may escape planning and policy This book can be read fruitfully in at least two ways as a highly relevant reflection on religion and science in the face of climate change and as a profound philosophical analysis of pluralism and provisionality and hence of living with uncertainty Willem B Drees Professor Emeritus of Philosophy of Religion and Ethics Leiden University and of Philosophy of the Humanities Tilburg University *Collingwood on Philosophical Methodology* Karim Dharamsi, Giuseppina D'Oro, Stephen Leach, 2019-01-17 This book discusses Collingwood's conception of the role and character of philosophical analysis It explores questions such as is there anything distinctive about the activity of philosophizing If so what distinguishes philosophy from other forms of inquiry What is the relation between philosophy and science and between philosophy and history For much of the twentieth century philosophers philosophized with little self awareness Collingwood was exceptional in the attention he paid to the activity of philosophizing This book will be of interest both to those who are interested in Collingwood's philosophy and more generally to all who are interested in the question what is philosophy
