Monstrous Liminality Robert G. Beghetto, 2022-01-24 This book examines the transformation of the figure of the stranger in the literature of the modern age in terms of liminality As a spectral monster that has a paradoxical and liminal relationship to both the sacred and the secular the figure of the modern stranger has played a role in both adapting and shaping a culturally determined understanding of the self and the other With the advent of modernity the stranger the monster and the spectre became interconnected Haunting the edges of reason while also being absorbed into normal society all three together with the cyborg manifest the vulnerability of an age that is fearful of the return of the repressed Yet these figures can also become re appropriated as positive symbols able to navigate between the dangerous and chaotic elements that threaten society while serving as precarious and ironic symbols of hope or sustainability The book shows the explanatory potential of focusing on the resacralizing in a paradoxical and liminal manner of traditionally sacred concepts such as messianic time and the utopian and the conflicts that emerged as a result of secularized modernity s denial of its own hybridization This approach to modern literature shows how the modern stranger a figure that is both paradoxically immersed and removed from society deals with the dangers of failing to be re assimilated into mainstream society and is caught in a fixed or permanent state of liminality a state that can ultimately lead to boredom alienation nihilism and failure These monstrous aspects of liminality can also be rewarding in that traversing difficult and paradoxical avenues they confront both traditional and contemporary viewpoints enabling new and fresh perspectives suspended between imagination and reality past and future nature and artificial In many ways the modern stranger as a figure of literature and the cultural imagination has become more complicated and challenging in the post modern contemporary age both clashing with and encompassing people who go beyond simply the psychological or even spiritual inability to blend in and out of society However while the stranger may be altering once again the defining or essentializing the figure could result in the creation of

other sets of binaries and thereby dissolve the purpose and productiveness of both strangeness and liminality The intention of Monstrous Liminality is to trace the liminal sphere located between the secular and sacred that has characterized modernity itself This space has consequently altered the makeup of the stranger from something external into a figure far more liminal which is forced to traverse this uncanny space in an attempt to find new meanings for an age that is struggling The Fantastic Other Brett Cooke, George E. Storming the Reality Studio Larry McCaffery,1991 The term cyberpunk entered the literary landscape in 1984 to describe William Gibson's pathbreaking novel Neuromancer Cyberpunks are now among the shock troops of postmodernism Larry McCaffery argues in Storming the Reality Studio marshalling the resources of a fragmentary culture to create a startling new form Artificial intelligence genetic engineering multinational machinations frenetic bursts of prose collisions of style celebrations of texture although emerging largely from science fiction these features of cyberpunk writing are as this volume makes clear integrally related to the aims and innovations of the literary avant garde By bringing together original fiction by well known contemporary writers William Burroughs Thomas Pynchon Don DeLillo Kathy Acker J G Ballard Samuel R Delany critical commentary by some of the major theorists of postmodern art and culture Jacques Derrida Fredric Jameson Timothy Leary Jean Fran ois Lyotard and work by major practitioners of cyberpunk William Gibson Rudy Rucker John Shirley

Pat Cadigan Bruce Sterling Storming the Reality Studio reveals a fascinating ongoing dialog in contemporary culture What emerges most strikingly from the colloquy is a shared preoccupation with the force of technology in shaping modern life It is precisely this concern according to McCaffery that has put science fiction typically the province of technological art at the forefront of creative explorations of our unique age A rich opporunity for reading across genres this anthology offers a new perspective on the evolution of postmodern culture and ultimately shows how deeply technological developments have influenced our vision and our art Selected Fiction contributors Kathy Acker I G Ballard William S Burroughs Pat Cadigan Samuel R Delany Don DeLillo William Gibson Harold Jaffe Richard Kadrey Marc Laidlaw Mark Leyner Joseph McElroy Misha Ted Mooney Thomas Pynchon Rudy Rucker Lucius Shepard Lewis Shiner John Shirley Bruce Sterling William Vollman Selected Non Fiction contributors Jean Baudrillard Jacques Derrida Joan Gordon Veronica Hollinger Fredric Jameson Arthur Kroker and David Cook Timothy Leary Jean Fran ois Lyotard Larry McCaffery Brian McHale Dave Porush Bruce Sterling Darko Suvin Takayuki Tatsumi Paperback Inferno Index Kevin R. <u>Fiction 2000</u> George Edgar Slusser, T. A. Shippey, 1992 Will novels and stories be relevant in the next millennium when the boundaries between illusion and reality and observer and observed may dissipate in a whirl of images signals and data. This essay collection divines the prospects of fiction in the information age by examining cyberpunk literature A movement less than a decade old cyberpunk is driven by deep concerns about society ethics and new technology and has been defined as the literature of the first generation of science fiction writers actually to live in a science fiction world. These essays were first presented at the 1989 annual J Lloyd Eaton Conference on Science Fiction and Fantasy Literature the field s most

prestigious international gathering They address concerns common not only to cyberpunk and traditional science fiction scholars critics and writers but to their counterparts outside the genre as well Interdisciplinary in perspective the essays consider the origins of cyberpunk the appropriation of its conventions by the mass media the literature s paradoxical retrogressive iconoclastic nature cyberpunk s affinities to and deviations from both traditional science fiction and postmodernist literature the parameters and components of the cyberpunk canon and the movement s future course Some essays are theoretical but all are grounded in works familiar to serious science fiction readers Neuromancer Frontera Deserted Cities of the Heart Islands in the Net Great Sky River the Mirrorshades anthology and others cyberpunk TV and cinema like the Max Headroom programs Blade Runner and Tron and precursory literature including Frankenstein Le Roman de l avenir Ralph I24C 41 and A Clockwork Orange Useful for its views on a volatile science fiction subgenre Fiction 2000 is also valuable for what it tells us about the fate of mainstream literature The Year's Best Science Fiction: Fifteenth Annual Collection Gardner Dozois, 1998-05-15 Gardner Dozois science fiction s foremost editor consistently selects the field s best work each year with this showcase anthology This year s collection presents sterling short stories from veterans and newcomers alike including Stephen Baxter Alan Brennert Carolyn Ives Gilman James Patrick Kelly Geoffrey A Landis Paul J McAuley Robert Reed William Sanders Howard Waldrop and many others Rounded out with Dozois s insightful Summation of the Year in SF and a long list of Honorable Mentions this anthology is the book for every science fiction fan **Starlight** Damien Broderick, 1995 Including studies of leading science fiction and cyberpunk texts Damien Broderick considers the characteristic writing marketing and reception of sci fi which distinguish it as a genre Companion to Science Fiction Mark Bould, Andrew M.
