Why Loiter Women And Risk On Mumbai Streets By Shilpa Phadke:

Why Loiter? Shilpa Phadke, Sameera Khan, Shilpa Ranade, 2011 Presenting an original take on women's safety in the cities of twenty-first century India, *Why Loiter* maps the exclusions and negotiations that women from different classes and communities encounter in the nation's urban public spaces. Basing this book on more than three years of research in Mumbai, Shilpa Phadke, Sameera Khan, and Shilpa Ranade argue that though women's access to urban public space has increased, they still do not have an equal claim to public space in the city. And they raise the question: can women's access to public space be viewed in isolation from that of other marginal groups? Going beyond the problem of the real and implied risks associated with women's presence in public, they draw from feminist theory to argue that only by celebrating loitering—a radical act for most Indian women—can a truly equal global city be created.

Affective Feminisms in Digital India Meena T Pillai, 2022-09-29 This book studies digital feminist activism in contemporary India. It provides a close and comprehensive analysis of the postmillennial digital moment in India, which has given rise to new modes of women's digital dissent. The volume examines how anti-rape narratives, Feminichy scandals, MeToo movements, and menstrual activism, amongst a host of other performative feminist dissent and their discursive medialities, create affective digital feminisms which both break with and continue the residual and emergent practices within feminisms in India. It looks at digital women's speak from India and focuses on vernacular forms of dissent through which the author aims to decolonize feminist imaginaries from their moorings in the West. The author explores new digital cultural and social geographies where politically untamed women use their precarity to unsettle deep sexist structures and mount a gendered critique of the political economy of the nation-state. An important contribution to the study of feminism in India, the volume will be useful for students and researchers of gender and women's studies, cultural studies, digital sociology, intersectional feminism, transnational feminism, digital humanities, and South Asian studies. It will also be an appeal to readers interested in the history of women's dissent in India.

Contemporary Gender Formations in India Nandini Dhar, 2024-02-27. The volume discusses critical issues surrounding the developments in gender movements in the last two decades in India following the Delhi rape case and the ensuing massive protests in December 2012. A critical documentation of some of the key moments surrounding the contemporary gendered formations and radicalisms in South Asia, the chapters span questions of class, caste, sexuality, digital feminisms, and conflict zones. The book looks at anger, protest, and imaginations of resistance. It showcases the new visibility that digital spaces have opened up to lend voice to survivors who are let down by traditional justice mechanisms and raises questions regarding individualized modes of seeking justice as against traditional collective voices that have always been a hallmark of movements. The volume analyses and criticizes the complicity of the state and the court as agents of reinforcing gender violence, an issue that has not been theorized enough by activists and scholars of violence. Further, it also delves into the MeToo movement and the LoSHA, as both have raised contentious, controversial, and often conflicting debates on the nature of addressing sexual harassment, particularly at the workplace. Calling for further debate and discussions of cyberspace, gender justice, sexual violence, male entitlement, and forms of neoliberal feminism, this volume will be of immense interest to scholars and researchers in the areas of women and gender studies, sociology, and social theory, gender politics, political theory, democracy, protest movements, politics, media, and the internet, political advocacy, and law and legal theory. It will also be a compelling read for anyone interested in gender justice and equal rights.

Women Architects in India Mary N. Woods, 2016-10-04. As the first inclusive study of how women have shaped the modern Indian built environment from the independence struggle until today, this book

reveals a history that is largely unknown not only in the West but also in India. Educated in the 1930s and 1940s, the very first women architects designed everything from factories to museums in the post-independence period. The generations that followed are now responsible for metro systems, shopping malls, corporate headquarters, and IT campuses for a global India. But they also design schools, cultural centers, religious pilgrimage hotels, and wildlife sanctuaries. Pioneers in conserving historic buildings, these women also sustain and resurrect traditional crafts and materials, empower rural and marginalized communities, and create ecologically sustainable architectures for India. Today, although women make up a majority in India's ever-increasing schools of architecture, it is still not easy for them, like their Western sisters, to find their place in the profession. Recounting the work and lives of Indian women as not only architects but also builders and clients opens a new window onto the complexities of feminism, modernism, and design practice in India and beyond. Set in the design centers of Mumbai and Delhi, this book is also one of the first histories of architectural education and practice in two very different cities that are now global centers. The diversity of practices represented here helps us to imagine other ways to create and build apart from starchitecture. And how these women negotiate tradition and modernity at work and at home is crucial for understanding gender and modern architecture in a more global and less Eurocentric context. In a country where female emancipation was important for narratives of the independence movement and the new nation state, feminism was nonetheless eschewed as divisive and damaging to the nationalist cause. Class, caste, tradition, and family restricted but also created opportunities for the very first women architects in India, just as they do now for the growing number of young women professionals today.

The Fear that Stalks Lora Prabhu, Sarah Pilot, 2014-03-11. This book is an attempt to understand the causes, nature, and consequences of gender-based violence in public spaces. It provides a framework that locates gender-based violence within the politics and dynamics of public space and helps us to understand the commonality between these diverse forms of violence, ranging from sexual harassment, sexual assault, moral policing, honour killing, acid throwing, witch hunting, parading naked, tonsuring, rape, and homicide. The writers unpack and examine the idea of a public space, although by and large a notional space; they begin by identifying it as the geographical space between the home and the workplace and then go beyond this to look at the violation faced by homeless women and girls who live on the streets as well as those who work in public spaces in the unorganised sector.
