Winner of the Frederick Jackson Turner Award Winner of the Isaac and Tamara Deutscher Memorial Prize Winner of the C L R James Award A ProMarket Best Political Economy Book of the Year Men in hardhats were once the heart of America's working class now it is women in scrubs What does this shift portend for our future Pittsburgh was once synonymous with steel But today most of its mills are gone Like so many places across the United States a city that was a center of blue collar manufacturing is now dominated by the service economy particularly health care which employs more Americans than any other industry Gabriel Winant takes us inside the Rust Belt to show how America's cities have weathered new economic realities In Pittsburgh's neighborhoods he finds that a new working class has emerged in the wake of deindustrialization As steelworkers and their families grew older they required more health care Even as the industrial economy contracted sharply the care economy thrived Hospitals and nursing homes went on hiring sprees But many care jobs bear little resemblance to the manufacturing work the city lost Unlike their blue collar predecessors home health aides and hospital staff work unpredictable hours for low pay And the new working class disproportionately comprises women and people of color Today health care workers are on the front lines of our most pressing crises yet we have been slow to appreciate that they are the face of our twenty first century workforce *The Next Shift* offers unique insights into how we got here and what could happen next If health care employees along with other essential workers can translate the increasing recognition of their economic value into political power they may become a major force in the twenty first century **Everyday Ethics and Social**

Change Anna Lisa Peterson, 2009 Americans increasingly cite moral values as a factor in how they vote but when we define morality simply in terms of a voter's position on gay marriage and abortion we lose sight of the ethical decisions that guide our everyday lives In our encounters with friends family members nature and nonhuman creatures we practice a nonutilitarian morality that makes sacrifice a rational and reasonable choice Recognizing these everyday ethics Anna L Peterson argues helps us move past the seemingly irreconcilable conflicts of culture and refocus on issues that affect real

social change Peterson begins by divining a second language for personal and political values a vocabulary derived from the loving and mutually beneficial relationships of daily life Even if our interactions with others are fleeting and fragmentary they provide a viable alternative to the contractual and atomistic attitudes of mainstream culture Everyday ethics point toward a more just humane and sustainable society and to acknowledge moments of grace in our daily encounters is to realize a different way of relating to people and nonhuman nature an alternative ethic to cynicism and rank consumerism In redefining the parameters of morality Peterson enables us to make fundamental problems such as the distribution of wealth the use of public land and natural resources labor and employment policy and the character of political institutions the preferred focus of debate and action
