How We Think N. Katherine Hayles, 2024-05-31 How do we think N Katherine Hayles poses this question at the beginning of this bracing exploration of the idea that we think through with and alongside media As the age of print passes and new technologies appear every day this proposition has become far more complicated particularly for the traditionally print based disciplines in the humanities and qualitative social sciences With a rift growing between digital scholarship and its print based counterpart Hayles argues for contemporary technogenesis the belief that humans and technics are coevolving and advocates for what she calls comparative media studies a new approach to locating digital work within print traditions and vice versa Hayles examines the evolution of the field from the traditional humanities and how the digital humanities are changing academic scholarship research teaching and publication She goes on to depict the neurological consequences of working in digital media where skimming and scanning or hyper reading and analysis through machine algorithms are forms of reading as valid as close reading once was Hayles contends that we must recognize all three types of reading and understand the limitations and possibilities of each In addition to illustrating what a comparative media perspective entails Hayles explores the technogenesis spiral in its full complexity She considers the effects of early databases such as telegraph code books and confronts our changing perceptions of time and space in the digital age illustrating this through three innovative digital productions Steve Tomasula s electronic novel TOC Steven Hall s The Raw Shark Texts and Mark Z Danielewski s Only Revolutions Deepening our understanding of the extraordinary transformative powers digital technologies have placed in the hands of humanists How We Think presents a cogent rationale for tackling the challenges facing the humanities today

The Cambridge Companion to Literature in a Digital Age Adam Hammond, 2024-11-14 Literature has experienced two great medium shifts each with profound implications for its forms genres and cultures that from orality to writing and that from writing to printing Today we are experiencing a third shift from printed to digital forms As with the previous shifts this transformation is reconfiguring literature and literary culture The Cambridge Companion to Literature in the Digital Age is organized around the question of what is at stake for literary studies in this latest transition Rather than dividing its chapters by methodology or approach this volume proceeds by exploring the major categories of literary investigation that are coming under pressure in the digital age concepts such as the canon periodization authorship and narrative With chapters written by leading experts in all facets of literary studies this book shows why all those who read study and teach literature today ought to attend to the digital

Steven Hall, 2021-02-04 Ingeniously plotted and compulsively well paced Sunday Times A cracking detective story that seems to be investigating its own existence Jeff Noon Are you there Tom I stood in the doorway staring at the phone My father had been dead for almost seven years When Thomas Quinn receives a seemingly impossible voice message he can't help but wonder if Andrew Black a legendary reclusive mystery writer and his father's protégé is somehow involved Thomas knows that Black can't be trusted that he should be avoided at all costs But as the search for answers spirals into an examination of the nature of time entropy the true forms of angels fictional stalkers and the secrets of the nativity set Thomas realises that he might not have a choice History, Memory and Nostalgia in Literature and Culture Regina Rudaitytė, 2018-07-27

The advent of the new age has alerted us to the conflicted nature of historical memory which defined the 20th century while simultaneously assaulting us with new historical upheavals that demand responsibility and critical consideration As the historical text bears traces of the writing subject the element of deception is remarkable meaning historical memory easily lends itself to forgery and false and subjective projections As such how do we think about the past about history about memory and how does memory function Is history an objective account a collection of dry reliable facts Is it an imaginative narrative tinged with nostalgia a projection of our wishful thinking the workings of our subjective perceptions and attitudes our states of mind The essays in this volume focus on the relevance of the past to the present and future in terms of the shifting attitudes to personal and collective experiences that have shaped dominant Western critical discourses about history memory and nostalgia The contributors here take issue with the epistemological hermeneutic ethical and aesthetic dimensions of the representational practices through which we revisit and revise the meaning of the past **The**
