Truth is ever to be found in simplicity and not in multiplicity and confusion of things I have just three things to teach or say to the contemporary Humans that simplicity Patience and compassion are the three building blocks of humanity Simplicity and humanity are the ultimate sophistications of human civilization They are the essence of happiness since great acts are made up of small deeds All I have is a sense of duty toward all people and attachment to those with whom I have become intimate Thus the next evolutionary step for me that mankind is to be more from man to kind Earth provides enough to satisfy every man s need not everyman s greed Hence I have taken up writing books to mould other beings to be humans not as savage since we Hominids were savage in early stage and now it is high time to turn out ourselves into humans Simplicity which is the essence of happiness is great act of humans for doing small deeds Right from retirement as an Audit Officer from the Office of the Principal Accountant General Audit Andhra Pradesh Hyderabad on 01 07 2003 I studied LL B at the evening age of 60 to 69 years while writing certain controversial books like i Human Life A Philosophical Audit ii We Think Therefore We Are iii My Mind is My Mosque iv Tears of Terrorism v After all Whose Life is It any Way a book on Euthanasia vi Know your India Open a new Page for writing Nationalism for India s Nationalism vii Paradise Lost a real life story of a Jihadists killing his own mother in Syria for the sake of Blessing of Paradise by the Allah viii Spicy Trade How India was subjected to Invasion by Arabs Europeans and finally tampered One India into Three viz Pakistan India and Bangladesh ix Father Turns Monster real story relating to a father to save his child by killing innocent peoples and plucked their organs like Lungs and Heart and used for Transplantation and replacement of his sons Lungs and Heart x Tridevi Trident story relating to three sisters killing their father who became Psycho in raping the children including themselves and this is also a real story I normally portray in a books only facts not fiction poetry and no fairy tails My aim is let the decide what is fact and what fiction and develop his personality accordingly since what ever that feels perceives desires expressions and emotions are all the offshoots of the Brain The meaning of life is to take birth to grow to feed to develop energy procreate children and finally to die and merge into the womb of Earth as a piece of nuclei That is it Hence I did not show craze for the monetary returns but only to show the people how the realm of our Society is inflamed with monetary gains This my story in short The Cambridge Companion to Utopian Literature Gregory Claeys,2010-08-05 Since

the publication of Thomas More's genre defining work *Utopia* in 1516 the field of utopian literature has evolved into an ever expanding domain This Companion presents an extensive historical survey of the development of utopianism from the publication of *Utopia* to today's dark and despairing tendency towards dystopian pessimism epitomised by works such as George Orwell's *Nineteen Eighty Four* and Margaret Atwood's *The Handmaid's Tale* Chapters address the difficult definition of the concept of utopia and consider its relation to science fiction and other literary genres The volume takes an innovative approach to the major themes predominating within the utopian and dystopian literary tradition including feminism romance and ecology and explores in detail the vexed question of the purportedly western nature of the concept of utopia The reader is provided with a balanced overview of the evolution and current state of a long standing rich tradition of historical political and literary scholarship

Christian Arabic Apologetics during the Abbasid Period (750-1258) Samir Khalil Samir, Jorgen Nielsen, 2018-08-14 During the first six seven centuries of the Islamic era there was a very lively exchange between Christian and Islamic thinking It was a period when Christian theologians of various denominations had to find ways of expressing their traditional ideas in Arabic In the process their thinking developed The papers in this volume represent the wide range of this field including detailed studies of such key writers as Ab R itah Ya y b Ad and Theodore Ab Q rrah as well as probably the earliest anonymous Christian apology in Arabic The Islamic context in which such writers worked is also dealt with as is the wider geographical spread of Christian Arabic thought extending to Islamic Spain

Science and Religion in Mamluk Egypt Nahyan Fancy, 2013-06-03 The discovery of the pulmonary transit of blood was a ground breaking discovery in the history of the life sciences and a prerequisite for William Harvey's fully developed theory of blood circulation three centuries later This book is the first attempt at understanding Ibn al Naf's anatomical discovery from within the medical and theological works of this thirteenth century physician jurist and his broader social religious and intellectual contexts Although Ibn al Naf's did not posit a theory of blood circulation he nevertheless challenged the reigning Galenic and Avicennian physiological theories and the then prevailing anatomical understandings of the heart Far from being a happy guess Ibn al Naf's anatomical result is rooted in an extensive re evaluation of the reigning medical theories Moreover this book shows that Ibn al Naf's re evaluation is itself a result of his engagement with post Avicennian debates on the relationship between reason and revelation and the rationality of traditionalist beliefs such as bodily resurrection Breaking new ground by showing how medicine philosophy and theology were intertwined in the intellectual fabric of pre modern Islamic societies *Science and Religion in Mamluk Egypt* will be of interest to students and scholars of the History of Science the History of Medicine and Islamic Studies
