Sara Martín, 2025-05-30 *Masculinity in Contemporary Science Fiction by Men* No Plans for the Future is the first comprehensive study of the self representation of men in SF novels published in the twenty first century by male authors Exploring a broad selection of writers and works the fourteen chapters present a panoramic overview of men s contributions to current SF and explore their slow but noticeable progress in the representation of gender The impact of feminism and gender studies and the demands of readers have profoundly transformed men s SF which now presents far more caring and vulnerable male characters The old stereotypes are being replaced by a collective reflection on how men and masculinity are changing though the lack of a common agenda results in novels that while exciting and often challenging sometimes miss the chance to imagine a better anti patriarchal pro feminist future for men and for all human beings The authors analysed include Robert Charles Wilson Geoff Ryman Samuel R Delany Richard K Morgan John Scalzi Iain M Banks Ernest Cline James S A Corey Colson Whitehead Andy Weir Daniel H Wilson Ian McDonald Yoon Ha Lee Tade Thompson Neal Stephenson and Kim Stanley Robinson *Science Fiction and Empire*

**Transrealist Fiction** Damien Broderick, 2000-06-30 Transrealist writing treats immediate perceptions in a fantastic way according to science fiction writer and mathematician Rudy Rucker who originated the term In the expanded sense argued in this book it also intensifies imaginative fiction by writing the fantastic from the standpoint of richly personalized experience Transrealism is also related to slipstream writing another category introduced into studies of speculative fiction to account for texts that seem to follow

trajectories mapped by the huge body of science fiction accumulated in the last century while retaining a central interest in traditional literary strategies This book examines a variety of work from the transrealist perspective something that has not been done previously It emphasizes the texts of Philip K Dick and Rucker himself while it additionally engages the texts of such slipstream writers as Kurt Vonnegut J G Ballard and John Barth It places its argument against the antihumanist trend in science fiction and builds comparisons with more traditional varieties of science fiction works *A Companion to Science Fiction* David Seed, 2008-04-15 A Companion to Science Fiction assembles essays by an international range of scholars which discuss the contexts themes and methods used by science fiction writers This Companion conveys the scale and variety of science fiction Shows how science fiction has been used as a means of debating cultural issues Essays by an international range of scholars discuss the contexts themes and methods used by science fiction writers Addresses general topics such as the history and origins of the genre its engagement with science and gender and national variations of science fiction around the English speaking world Maps out connections between science fiction television the cinema virtual reality technology and other aspects of the culture Includes a section focusing on major figures such as H G Wells Arthur C Clarke and Ursula Le Guin Offers close readings of particular novels from Mary Shelley's *Frankenstein* to Margaret Atwood's *The Handmaid's Tale*

*Tomorrow* Sherryl Vint, 2007-01-01 *Bodies of Tomorrow* argues for the importance of challenging visions of humanity in the future that overlook our responsibility as embodied beings connected to a material world **Notional Identities** Thomas Christie, 2014-07-18 *Notional Identities* takes up the challenge of engaging with the popular genres of speculative fiction and crime fiction by Scottish authors from the mid 1970s until the beginning of the twenty first century examining a variety of significant novels from across the decades in the light of wider considerations of ideology genre and national identity The book investigates the extent to which the national political and cultural climate of this tumultuous era informed the narrative form and social commentary of such works and considers the manner in which and the extent to which a specific and

identifiably Scottish response to these ideological matters can be identified in popular prose fiction during the period under discussion. Although Scottish literary fiction of recent decades has been studied in considerable depth, Scottish popular genre literature has received markedly less critical scrutiny in comparison. *Notional Identities* aims to help in redressing this balance by examining popular Scottish texts of the stated period in order to reflect upon whether a significant relationship can be discerned between genre fiction and the mainstream of Scottish literary writing and to consider the characteristics of the literary connections which exist between these different modes of writing.

*Impossibility Fiction* Derek Littlewood, Peter Stockwell, 1996. Impossibility fiction is an intergenre that has recently been the resort of many writers searching for new ways of understanding and expressing the real world of the imagination, making use of fantasy, alternative history and science fiction. Coping with ideas that are both impossible and realistically constructed is the ultimate contemporary challenge of our technology. The chapters of this book move towards establishing appropriate readings that allow contemporary readers to negotiate unreality, a skill that the end of the millennium is making inevitably necessary. Such strategies have long been the preserve of literary and cultural study and here a number of well-regarded scholars and some new to the field make their contribution to an area that has become increasingly important in recent years. From Mary Shelley to Philip K. Dick, Iain M. Banks to J. G. Ballard, taking in African American science fiction, *Jurassic Park* and Kurt Vonnegut and exploring issues of alternative history and ideology, feminism, the Holocaust, characterisation and impossible geography, this collection is an important source book for all those interested in the literature, culture and philosophy of realistic impossible worlds.

**Scotland as Science Fiction** Caroline McCracken-Flesher, 2012. Scots like Iain M. Banks and Ken MacLeod lead in a futuristic tradition, for from MacDonald, Barrie and Stevenson onwards Scots have been speculating in ways derived from their unique circumstances. Lacking political power, they imagine future spaces and different places. *Captain Jack Zodiac* Michael Kandel, 1992.

**Lieux de vie en science-fiction** Danièle André, 2021-04-29. Un lieu de vie peut être un espace restreint, clos et très délimité, ou il peut être aussi vaste que l'univers. Pourtant, il ne se limite pas à un espace géographique, il est aussi parfois un espace plus abstrait, uniquement délimité par des liens sociaux. Enfin, il peut aussi être virtuel, fantasmé ou vécu comme tel. Les textes rassemblés dans cet ouvrage offrent des regards croisés sur les manières dont la science-fiction, quels que soient ses formes et supports, comprend et utilise la notion de lieux de vie pour la redéfinir, l'interroger et porter un autre regard sur notre monde dans ses différentes dimensions : sociale, politique, architecturale, urbaine, etc.
