archives Masters of the Air is the authoritative deeply moving and important account of the world's first and only bomber war

General Walter Krueger Kevin C. Holzimmer, 2007 A military biography of the general who led the U S Sixth Army in the Southwest Pacific in World War II including grueling jungle campaigns in New Britain and New Guinea and who was subsequently chosen by General MacArthur to lead the ground invasion of both the Philippines and Japan **Flak** Edward B. Westermann, 2001 Air raid sirens wail searchlight beams flash across the sky and the night is aflame with tracer fire and aerial explosions as Allied bombers and German anti aircraft units duel in the thundering darkness Such cinematic scenes played out with increasing frequency as World War II ground to a close were more than mere stock material for movie melodramas As Edward Westermann reveals they point to a key but largely unappreciated aspect of the German war effort that has yet to get its full due Long the neglected stepchild in studies of World War II air campaigns German flak or anti aircraft units have been frequently dismissed by American British and German historians and by veterans of the European air war as ineffective weapons that wasted valuable materiel and personnel resources desperately needed elsewhere by the Third Reich Westermann emphatically disagrees with that view and makes a convincing case for the significant contributions made by the entire range of German anti aircraft defenses During the Allied air campaigns against the Third Reich well over a million tons of bombs were dropped upon the German homeland killing nearly 300 000 civilians wounding another 780 000 and destroying more than 3 500 000 industrial and residential structures Not surprisingly that aerial Armageddon has inspired countless studies of both the victorious Allied bombing offensive and the ultimately doomed Luftwaffe defense of its own skies By contrast flak units have virtually been ignored despite the fact that they employed more than a million men and women were responsible for more than half of all Allied aircraft losses forced Allied bombers to fly far above high accuracy altitudes and thus allowed Germany to hold out far longer than it might have otherwise Westermann's definitive study sheds new light on every facet of the development and organization of this vital defense arm including **Strategy for Chaos** Colin Gray, 2004-08-02 In this volume Professor Colin Gray develops and applies the theory and scholarship on the allegedly historical practice of the Revolution in Military Affairs RMA in order to improve our comprehension of how and why strategy works The author explores the RMA hypothesis both theoretically and historically The book argues that the conduct of an RMA has to be examined as a form of strategic behaviour which means that of necessity it must work as strategy works The great RMA debate of the 1990s is reviewed empathetically though sceptically by the author with every major school of thought allowed its day in court The author presents three historical RMAs as case studies for his argument those arguably revealed in the wars of the French Revolution and Napoleon in World War I and in the nuclear age The focus of his analysis is how these grand RMAs functioned strategically The conclusions that he draws from these empirical exercises are then applied to help us understand what indeed is and what is not happening with the much vaunted information technology led RMA of today *The Presidency of Franklin Delano Roosevelt* George T. McJimsey, 2000 Concise and refreshingly balanced

this history portrays FDR as he confronted crises of epic proportions during his record 12 year tenure as our nation's chief executive McJimsey gives a fresh account of Roosevelt's landmark administration and offers a new perspective on the New Deal 12 photos

The Vietnam War Re-Examined Michael Kort, 2018 An overview of the revisionist case on the Vietnam War showing how it could have been won by the US at a lower cost than was suffered in defeat

Why the Axis Lost John Arquilla, 2020-03-13 The factors leading to the defeat of the Axis Powers in World War II have been debated for decades One prevalent view is that overwhelming Allied superiority in materials and manpower doomed the Axis Another holds that key strategic and tactical blunders lost the war from Hitler halting his panzers outside Dunkirk allowing more than 300 000 trapped Allied soldiers to escape to Admiral Yamamoto falling into the trap set by the U S Navy at Midway Providing a fresh perspective on the war this study challenges both views and offers an alternative explanation the Germans Japanese and Italians made poor design choices in ships planes tanks and information security before and during the war that forced them to fight with weapons and systems that were too soon outmatched by the Allies The unprecedented arms race of World War II posed a fundamental design challenge the Axis powers sometimes met but never mastered

Worshipping the Myths of World War II Edward W. Wood, Jr., 2006 Is any war a good war In *Worshipping the Myths of World War II* the author takes a critical look at what he sees is America's dedication to war as panacea and as Washington's primary method for leading the world Articulating why he believes the lessons of World War II are profoundly relevant to today's events Edward W Wood Jr reflects on such topics as the killing of innocents which became increasingly accepted during the war on how actual killing is usually ignored in war discussions and reporting on the lifetime impact of frontline duty which he knew firsthand on the widely accepted concept of the Greatest Generation on present criteria for judging war memoirs and novels on the fallacy that the United States won the war largely on its own and on the effect that the Holocaust had on our national concepts of evil and purity His final chapter centers on how the war on terror is different from World War II and why the myths created about the latter hide that reality

Battle for the Ruhr Derek S. Zumbro, 2006 A richly detailed epic narrative that gives the perspective of the German officers soldiers and civilians trapped in one of the bloodiest battles toward the end of World War II ultimately leading to the massacre of 350 000 German troops Shows what it looked felt and sounded like for the German troops encircled by the Allied juggernaut in the west as they dealt with Hitler's increasingly surreal commands to stand and fight to the last man
