### **Management Scholarship and Organisational Change**

Miriam Green,2019-01-08 Change is a crucial and inescapable process for many organisations It remains a constant challenge for managers and many change management initiatives fail Burns and Stalker s seminal text on managing change The Management of Innovation has often been used as a basis for research in mainstream management journals and has been represented as an important theory in popular and long established management textbooks The issues raised in that book are still being grappled with by academics and practitioners today Miriam Green provides a critical analysis of the mainstream construction of knowledge on change management through an examination of representations of that text The main thesis of her book is that this literature though valuable does not provide a full picture Its objectivist approach ignores the role of other factors raised in the original study These factors include the effects of power politics resistance and employee influence on the outcomes of managerial change strategies and on other organisational processes with important consequences for the understanding of change initiatives by both academics and practitioners This is part of an ongoing debate in management studies and more widely in the social sciences about theoretical approaches and research methods The originality of this book lies in its in depth comparison of an entire monograph on organisations facing technological and commercial change with an equally in depth analysis of the ways this work has been represented and used as a basis for teaching and research It highlights the limitations of the exclusive use of one approach to explain the complications arising from organisational change It challenges the scientific justification offered for that approach and supports arguments for more inclusive and sustainable scholarship of greater relevance to academics managers and other organisational stakeholders

Capon,2012-12-06 Business and management education has an important impact on business practice throughout the world To a very large extent possession of the MBA degree is a passport into the upper reaches of management and CEOs of many major corporations have earned an MBA It is a reasonable inference that the education received by these leaders and managers during their MBA experience has an important impact on the way that businesses throughout the world are led and managed and that major corporate decisions are made The heart of the MBA education is the curriculum and curriculum design is perhaps the most important strategic function for a business school faculty to undertake In order to understand the many issues concerning this contemporary curriculum review this book examines three related contextual domains First it details the long term growth of business and management education

Second it examines the major theoretical and empirical literatures on organizational evolution and decision making paying special attention to decision making in institutions of higher education Finally the book describes the previous major curriculum review at Columbia Business School in the late 1950s and the subsequent changes that formed the curriculum that was changed in 1992 This book demonstrates what can be achieved by an institution that sets high standards for its business education and assists faculty and administrators in other schools of business and management as they contemplate revision of their curricula In addition it provides a prime example of curriculum design effort in one of the leading institutions worldwide Finally it will be of interest to scholars in several different fields notably higher education curriculum review organizational decision making and long run organizational evolution      **Federal Procurement Regulations** ,1981

Kumar,2013-11-12 In an attempt to instil trust in their performance credibility integrity efficiency cost effectiveness and good governance many public organizations are in effect viewing tax paying citizens as consumers Little research exists to explore synergies between the market economy public administration reformation and their complex bilateral effects This

book takes a timely look at the heightened need for public administration reform as a result of the economic challenges currently faced by nations across the globe. In particular, it explores the roles of eGovernment and a citizen-centric focus in this transformation. Public Administration Reform examines several commonly held assumptions about public administration: the public sector is slow and bureaucratic; government employees are frequently disengaged; and government agencies are sometimes wasteful. eGovernment is proposed as a key tool in the improvement of both public services and reputations of public organizations.
