Christian, 2023-08-07 Monster hunting is more than just going out into the woods or hanging out in graveyards. The history and performance of monster hunting from Alexander the Great to scientific expeditions of the Victorian era can lead us directly to modern-day Bigfoot searches. Combining methods of scientific exploration with aspects of tourism theory, demonstrates how monster hunting is performative and through an analysis tool called The Cryptid Tourist Gaze, this book examines how and why we go looking for monsters and the ways in which small towns celebrate the monsters that once haunted them. By looking at specific museums such as The North American Bigfoot Center and Expedition Bigfoot, The Sasquatch Museum, as well as various festivals and conferences such as The Mothman Festival and the UFO Festival in Roswell, we can witness the ways modern monster hunting practices are performed and see how much they have evolved from their predecessors. Through themes of liminality, community, and initiation, the performance of monster hunting through cryptid tourism allows both participants and observers to gain insight into why looking for monsters, proving their existence, and sharing experiences with other believers is so important. **Beasts of the World** Andy McGrath, 2022-01-25

Beasts of the World is a seven-part series which seeks to investigate the histories, evidence, and common theories surrounding the numerous cryptid creatures that have been reported around the globe. In Volume 1, Hairy Humanoids, we examine the diverse collection of hairy, bipedal, man-like monsters that are believed to inhabit the world's remote and lonely regions and ask the question: do they represent a single species or could there be other lesser-known varieties of Wildmen yet to be revealed? This book seeks to classify some of these distinct kinds and proposes a separation even when two or more types or species appear to be sharing a similar geographic area based upon key physiological and behavioural differences. And so we find that the Man Ape, Bigfoot of the Pacific Northwest, is something quite different to the Wildman, Almasty of the Caucasus Mountains, and that the Relict Ape, known as the Yeti, is more akin to the Florida Skunk Ape than the Chinese Yeren. Are these mysterious
