G. H. Mead Hans Joas, 1997-09-16 This major study reassesses the work of the American pragmatist George Herbert Mead 1863-1931 which had a significant impact in fields ranging from metaphysics and ethics to sociology and social psychology The work of American pragmatist George Herbert Mead 1863-1931 had a strong influence in fields ranging from metaphysics and ethics to sociology and social psychology In this book Hans Joas interweaves Mead's political and intellectual biography with the development of his theories The key concept of the study is practical intersubjectivity a term Joas introduces to characterize the link implicit in Mead's work between a theory of intersubjectivity and a theory of praxis Throughout the book Joas stresses the practical

social and political nature of Mead's work. Besides comparing Mead to the other American pragmatists, Joas discusses the relation between Mead's thought and that of such Europeans as Habermas, Apel, Husserl, Merleau-Ponty, and Piaget. Joas's revisionist portrait of Mead as a socially engaged intellectual with its emphasis on his relevance for contemporary philosophy and social science has been a key factor in the revival of interest in Mead. The author's new preface includes an update on pragmatism studies in general and on Mead studies in particular.

The Chicago School of Sociology Martin Bulmer, 1986-08-15 From 1915 to 1935 the inventive community of social scientists at the University of Chicago pioneered empirical research and a variety of qualitative and quantitative methods shaping the future of twentieth-century American sociology and related fields as well. Martin Bulmer's history of the Chicago school of sociology describes the university's role in creating research-based and publication-oriented graduate schools of social science. This is an important piece of work on the history of sociology, but it is more than merely historical. Martin Bulmer's undertaking is also to explain why historical events occurred as they did using potentially general theoretical ideas. He has studied what he sees as the period from 1915 to 1935 when the Chicago School most flourished and defines the nature of its achievements and what made them possible. It is likely to become the indispensable historical source for its topic.

Contemporary Social Psychological Theories Peter James Burke, 2006 This text presents the most important and influential social psychological theories and research programs in contemporary sociology. Original chapters by the scholars who initiated and developed these theoretical perspectives provide full descriptions of each theory, its background, development, and future. The first four chapters cover general approaches organized around fundamental principles and issues: symbolic interaction, social exchange, distributive justice, and rational choice. The following chapters focus on specific research programs and theories examining identity, affect, comparison processes, power, and dependence, social exchange, status construction, and legitimacy. A concluding chapter provides an analysis of and commentary on the state of the theoretical programs in sociological social psychology.
