Rock physics experiments and numerical simulations are indispensable tools in geology and mineral resources exploration. Experiments can provide real data on the physical properties of rocks while numerical simulations can reproduce these properties and predict behavior under unknown conditions on a computer. Understanding the physical properties of rocks is crucial in energy source exploration and development. Rock physics experiments can perform various tests on samples under controlled environments. These experiments can provide real data on the physical properties. In contrast, numerical simulations have the advantages of low cost and high flexibility. Through numerical simulations, the physical properties of rocks can be reproduced on a computer and their behavior under unknown conditions can be predicted. Combining rock physics experiments with numerical simulations can provide a more comprehensive understanding of the physical properties of rocks and offer more accurate data support for energy source exploration and development.

*Slope Engineering for Mountain Roads* Gareth J. Hearn, 2011. Provides a complete guide to the study, design, construction, and management of landslide and slope engineering measures for mountain roads, with emphasis on low cost. The geographical focus is on the tropics and sub tropics, but is also highly relevant to other regions where heavy rain, steep slopes, and weak

soils and rocks combine to create slope instability The causes and mechanisms of landslides are described and the hazards they pose to mountain roads are illustrated Methods of desk study field mapping and ground investigation are reviewed and illustrated with emphasis on geomorphological and engineering geological techniques The design and construction of alignments earthworks drainage retaining structures the stabilization of soil slopes and rock slopes and the control of erosion on slopes and in streams covered Slope management as part of road maintenance and operation is reviewed and procedures for risk assessment and works prioritization are described      *Learning Directory* ,1970
